CJAC seminar postponed

we should do something for the full . . . peopleonly. I was a bit disgracing," he continued, "because I was hoping it could be done," he said.

Instead, Simonides and Moser would discuss with CJAC the formation of a joint program with the Colloquium Committee. "When the time is right, the students will materialize it is no clear," he said, offering mid-October as a potential date.

I agreed with the Colloquium [Committee]'s suggestion that we do this well, even if it takes a little longer," CJAC's purpose is to improve communication between various members of the MIT community, he said, and "it will not serve this purpose if we do not do a good job.

Simonides mentioned the possibility of holding the colloquium over the Independent Activities Period, although he indicated that opinions have not favored

Gray calls UCal regents

(Continued from page 1) immunity that the California regents are granted.

Despite student protests and a faculty resolution favoring divestiture, SJST and the MIT Corporation have steadfastly refused to divest from businesses linked to South Africa.

South Africa's apartheid policies "deemse and dehumanize and literally envelope 70 percent of the population," Gray said.

While that is something we all condemn, I believe that the connection between divestment as a policy and as a solution to that problem is so remote, so loose, as to make divestment symbolically important but practically irrelevant," he said.

The effect of divestment on apartheid, Gray said, is like the effect "of pushing on a string.

Arguments favoring divestiture

holding the forum in January. Merritt notes lack of time because Colloquium Committee Chairman Travis R. Merritt said the program was not to be held this fall because of the short notice and a lack of communications between CJAC and the Colloquium Committee.

There was a "mild misunderstanding about the issue. . . . sphere of responsibility," Merritt conceded. But he saw no evidence of a lack of commitment on the part of the administration. "I don't think they can be accused of bad faith yet," he said.

The event is still planned, either for an early second semester, Merritt said. He noted that the fall program had never been actually scheduled.

Activist lauds Morrison

for arms control efforts

(Continued from page 1) United States "should abolish almost all tactical and intercontinental nuclear weapons, and cut back to a small, invulnerable second-strike minimum deterrent force."

Military secrets are unimportant to major policy decisions, and "knowledge and values that are easily accessible to all of us" should be the only considerations in formulating nuclear arms policy, Forsberg said.

Forsberg had learned two main lessons from working with Philip Morris, she said. One was that "in a democracy, secrecy should not stand in the way of the right of the people to choose." The other was that the concept of power in the state should be based on "a faith in people, a deep egalitarianism tempered by sober realism."

Sentry takes you a step ahead... to the world-class technology of Schlumberger.

If you have the kind of technical talent that keeps you a step ahead, then you'll thrive on the excitement at Sentry Test Systems. We're part of Schlumberger, Ltd's Computer Aided Systems Group. As a result, our market and our perspective are truly global. Our technology dominates the field of computer-aided test equipment for high-speed integrated circuits, including LSI and VLSI devices.

At Sentry, you can design, build and market new systems to support future generations of semiconductor devices. You'll be involved in the development of products that leading companies around the world require to move forward.

It follows that we offer exceptional career opportunities. If you're a graduate with a BS or MS in electrical engineering or computer science, consider joining Sentry Test Systems in the following areas:

- Design Engineering
- Software Engineering
- Reliability Engineering

Contact your placement office, or send your resume to University Relations Manager, Sentry Test Systems, 1601 Technology Dr., San Jose, CA 95115. An equal opportunity employer.
