There's a new career option for today's quantitative graduates. It's not in academia. It's not in Corporate America. It's not in the Silicon Valley. It's on Wall Street.

Today Wall Street's "quants" are literally shaping the future of high finance. They're developing a new generation of investment products, pioneering new ways to improve profitability, and creating new opportunities for investors and issuers. And for their quantitative creativity, they're being recognized with qualitative rewards. With challenge, responsibility and recognition.

Yet you might be surprised to learn that many of Wall Street's most successful "quants" have no prior experience in finance or economics. They come from backgrounds in math, physics, engineering, operations research, computer science, and other quantitative disciplines.

If forging the way into new frontiers sounds exciting to you, Salomon Brothers Inc. has the opportunity you seek. A major investment banking and market-making firm, we're Wall Street's leading employer of "quant" graduates. And since our research and technology management departments are the most respected in the industry you'll be working with some of the top talent in your field.

Want to learn more about the challenge of working with a Wall Street leader in one of today's most rewarding quantitative careers? Join us at the Salomon Brothers presentation scheduled for your campus. And see how far your future can go.
