Institute honors McNair
Building 37 named after Challenger astronaut

By Robert E. Potter II
Building 37 was dedicated to the Ronald E. McNair PhD ’76 by the
University after MIT's position in the Space Shuttle Challenger
incident last Jan. 28. The building houses the Department of Space
Research and part of the aeronautics and astronautics department.

Cheryl M. McNair, Ronald E. McNair's widow, presented the Institute
with the "T" patch, which entitles TAs to MIT, that McNair took aboard the
failed Challenger mission. The National Aeronautics and Space
Administration had found the patch in the wreckage and returned it
so McNair's family could have it.

"We had a meeting to discuss whether we will survive or meet the fate of the others," said Kelley. He also
explained that the sponsoring groups had a charge against them. "We do not fund internally," he
continued.

"We feel threatened by new policy"
The International Students Assis-
tance Association, which received ap-
proximately $9520 for last year, was
provided only $600 for the 1987-88
year, Kelley said. One reason for the
failure was the failure of ISA to submit
their budget by the Feb. 24 deadline,
Kelley claimed. As a result, the group received no funding for the full term.

ISA Executive Committee
The ISA has filed a suit against the
National Aeronautics and Space
Administration for $5,000. The
reason is that the ISA claims they were
not given proper notice of the
reduction in funding.

"Although we are always willing to reconcile with the ISA, we hope that the ISA has the option of appealing this decision to the Undergraduate Association

TCA buses leave 30 in New York
By Earl C. Yen
Two buses chartered by the Technology Community Association
(translated to MIT community
members from New York City to Boston on Nov. 30 appear-
antly never showed up, leaving approximately 170 students stranded.

TCA chartered four buses from Stork Transportation, a Boston-based
company, to run the Boston-New York City route over Thanksgiving vacation, said Dick Jessen, the TCA's
president.

The buses were scheduled to pick up students at four different locations in New York City at 2:40 pm and
then deposit them at Reginald, pulled the cord revealing the dedication engraving. The inscription on the engraving is a quote of McNair's
dead and reads:

"My wish is that we would allow this plaque to stay in place."
