Bowdoin defeats women’s hockey
(Continued from page 16) with more scoring chances. The MIT team certainly had the faster skaters during the first period. But the Engineers did not put this speed to their best advantage as they too often relied on slower passes and broke the ice score, the third came as confusion on the MIT bench gave Bowdoin a breakaway. Although much of the scoring was done in the first two periods, the third was the most exciting. The Engineers, who had earlier had trouble getting out of their own zone, now seemed more at ease. Their passes connected more often. The MIT defense was halting Bowdoin at their own blue line, stopping them from racing up the ice. The Engineers, with their much improved defensive play, seemed to have clicked. But it was much too late. Despite keeping the puck in the Bowdoin zone, the MIT players could manage few shots onto the net as shots were often deflected wide. The final goal of the game came with only 13 seconds left in the game on a stick-long surge by a Bowdoin player, bringing the final score to 8-1.

Suffolk, 4; MIT, 3

Suffolk again take the lead at the 13:27 mark of the second period with a goal by Brian Balut ’87, replacing at center Jeff Bates ’90 who had been injured earlier in the game, helped set up three goals with excellent forechecking. The line of Brown, Per-Gunnar Oseby ’89, and Gary Zemtener ’90 played exceptionally well despite some problems finishing plays. Peter Gasparini ’88 again put in a fine performance in goal, stopping 34 of 40 shots. The MIT men’s hockey team played its last two home games of the season next week. The Beacons face Nichols College on Wednesday, Feb. 18, and Skidmore College on Friday, Feb. 20.

Suffolk vs. MIT

MIT 1 1 1 4
Suffolk 1 1 0 3

FIRST PERIOD — MIT, Brown (Zemtener) 9:21; Suffolk, Zulon (Piracini, Demaso) 11:03.
SECOND PERIOD — Suffolk, Demas (Brown) 13:14; MIT, Zemtener (Balut) 15:49.
THIRD PERIOD — Suffolk, Hamilton (Kynastr, Giustini) 9:23; MIT, Zemtener (Brown) 17:10.
OVERTIME — MIT, Russell (Balut, Zemtener) 8:49.
SAVES — MIT, Gasparini, 33; Suffolk, Samson, 20.

In fact, we’ll even pay you more than $600 a month while you attend. That’s in addition to paying for your tuition, required books and fees. It’s all part of the Armed Forces Health Professions Scholarship Program. And here is how it works!

If you’re selected for a Physician’s Scholarship—from the Army, Navy, or Air Force—you’re commissioned as an officer in the Reserve.

While you’re in school, you’ll serve 45 days a year on active duty, gaining valuable medical experience. After graduation, you will serve three or more years, the length depending on the requirements of the Service selected and years of scholarship assistance received.

As an Armed Forces physician you’ll receive officer’s pay and benefits, and enjoy the advantages of working regular hours. You’ll also see a diversity of patients and have opportunities to use sophisticated medical technology.

But most important, while you’re in medical school we’ll help pay the bills. For more information, send in this coupon. There is no obligation.

BELIEVE YOUR EYES

You’ve heard it before: leading edge technology, training and growth opportunities. Fine talk, but so many companies claim to be special. We at Acuson would like the opportunity to show you the difference at our On-Campus Presentation/Demonstration.

The visible difference begins with our technology: real-time ultrasound medical imaging systems that enable physicians to "see" inside the human body with greater precision and resolution than ever before. It’s why we’re known as the industry’s “Gold Standard”. A reputation we’re expanding through ambitious R&D and accelerated paths from idea to implementation. Dynamic, young and successful, Acuson is achievement and excitement you won’t see elsewhere.

But don’t take our word for it. If you’re a BS, MS or PhD graduate in one of the following areas, come see and believe for yourself.

Software Engineers (EE or CS)

Hardware test diagnostics, scientific programming, real-time microprocessor systems programming.

Laboratory Engineers (EE)

So analysis, acoustic engineers, lab engineers.

Manufacturing Engineers (EE)

Test engineer (analog emphasis), electronic manufacturing.

ON-CAMPUS Presentation/Demonstration:
Tuesday, February 24 — 7-9 p.m.
Room 1-132
Interviews: Wednesdays, February 25
Details or to schedule an interview, Acuson, 1210 Charleston Road, P.O. Box 7293, Mountain View, CA 94039. Contact Tami Smith, E.R. We are an equal opportunity employer.
