Blind militarism is for cowardly

To the Editor:

Debates that bring to attention how wars affecting our lives are always healthy. But the week before the Spring Break, these pages carried some of the most bizarre arguments about militarism on campus. Sandra M. Schlipf '90 alleged that ROTC students were "cheered two ROTC 'young men" who displayed their machismo and rudeness. She also boasted of having screamed at ROTC protesters, March 20.

To the point? The civil rights movement came about precisely through protests and disruptions. On that same day, James H. Ferguson G said ROTC, military defended US freedom. March 20, who seems to have been thorough, was quoted by the hypnotists of the TV show "Amerika," as saying the idea of world communism and peace... merely constitute a facade for communist totalitarianism. He wrote, "It has yet to be shown that the common man can govern himself."

Needless to say, these ideas are nothing new. Similar ideas have always been expressed by right-wing reactionaries. They have always run the rhetoric of fascism, militarism, and jingoistic nuclearism. The United States is staging maneuvers close to Nicaragua in preparation for an invasion of that country. The United States is doing so since their illegal invasion of the Dominican Republic in 1965.

The United States is staging maneuvers close to Nicaragua in preparation for an invasion of that country. The United States is doing so since their illegal invasion of the Dominican Republic between 1964 and 1975 in Indo-China alone; they killed 4000 civilians in the Dominican Republic in 1965. The United States is staging maneuvers close to Nicaragua in preparation for an invasion of that country. The United States is doing so since their illegal invasion of the Dominican Republic in 1965. The United States is doing so since their illegal invasion of the Dominican Republic in 1965.

If detected early, colorectal cancer is very high. Because we now know how to detect it early, and we know how to fight it once we detect it. Write us for our simple checkup guidelines.
