WHAT IS SPECIAL ABOUT A PHARMACY?

A Pharmacy or Drug Store has a prescription laboratory, which is licensed to dispense prescriptions and drugs under the supervision of a licensed, registered pharmacist.

WHY MUST PHARMACISTS BE LICENSED?

Because most drugs, if not properly taken, can actually cause harm. Some, when combined with other drugs, can change into a different compound that is not effective, and can become harmful. Each dispensed medicine must be potent and active and its dosage checked by the pharmacist for safe use. Pharmacists must pass an examination to prove they have this knowledge to protect you.

PHARMACISTS ARE DRUG SPECIALISTS.

To obtain their license to practice pharmacy they must now attend a college of pharmacy for at least five years. They must serve an internship in a pharmacy, just as a physician does in a hospital. Because of their knowledge of drugs and medicines, people are always safer when they obtain any medicine from a pharmacist.

WE WELCOME QUESTIONS.

In addition to compounding and dispensing prescriptions, we carry many other products used or taken to keep you healthy. If you have any questions we can usually answer, we can help you get the best results from the medicines and health aids you need.
