Harvard Bridge to be reconstructed

(Continued from page 1)

Currently, traffic has been forced to the two lanes on the bridge's East side. The DPW plans to rebuild half the bridge at a time, enabling them to keep the bridge open to traffic.

"We recognize that the bridge has to be open," Pickard affirmed. To relay the concerns of commuters that use the bridge, the DPW has opted to keep the bridge open during construction "in a condition that will allow partial traffic flow."

Still, progress has been slow on the reconstruction. Pickard explained that bids would probably be given out this fall and that some construction could be done on the bridge in the winter.

Captain Albert Swanson, historian at the Metropolitan District Commission, admitted, "It's been difficult to acquire the finance to rebuild it."

"Just because there has been little activity doesn't mean we're not working," Pickard said. "We're working as hard as we can."

He emphasized that last year's renovation project to stabilize the bridge has made it safe to sustain traffic and that pedestrians and commuters should not be concerned about the bridge's safety.

We'll be on campus

October 5 & 6, 1987

Qualified college students are invited to meet with us and explore the career opportunities...the innovative technology...the industry leadership that is Motorola's Semiconductor Products Sector.

On-campus interviews will be held for ELECTRICAL ENGINEERING MAJORS.

We will also accept resumes for MECHANICAL ENGINEERING, COMPUTER SCIENCE, MANUFACTURING ENGINEERING, and CHEMICAL ENGINEERING positions.

For more information, stop by your College Placement Office or write to Manager, College Recruiting at the appropriate address below.
