OK. Enough theory. It's time to get hardcore about your career in software. With Microsoft.

We'll give you all the resources you want. Tens of millions in R&D funding. Along with one of the most elementary tools for thinking—a door, leading to your own private office (instead of the cubicles or—horrors—bullpens you find elsewhere). All backed by management that truly does speak your language, because they probably helped write it.

We're serious about software design. If you are, too, now you know the perfect place to start—Microsoft.

Software Design Engineers

We're working on everything from compilers, operating systems, and networking to sophisticated graphics, powerful productivity software, designing features in the user interface for a new generation of products, and some things that can't be mentioned in print. You could be, too, if you're about to graduate with a BS in Computer Science, Math, or a related major, with provable understanding of micros, "C", the 8086 family, UNIX®, XENIX™, or MS-DOS®.

Join Microsoft, and you'll not only have the opportunity to work with the world leader in microcomputer software, but also the opportunity to live in the beautiful Seattle area. And, while you've probably heard a lot about the gorgeous scenery around Puget Sound, you may not know that Seattle boasts the most active live theater west of Broadway. A cultural calendar filled with everything from film festivals to jazz concerts. As well as major league baseball, football and basketball.

To all of that, Microsoft adds a stunning modern campus, with amenities such as workout facilities, a parcours, and membership in a nearby health club. Plus an array of benefits for your personal and financial well-being.

How do you get hardcore? Attend our on-campus interview on Thursday, November 5. Contact your Career Placement Center to sign up. We are an equal opportunity employer.
