---

**EDUCATION AND TRAINING SPECIALIST**

An outstanding opportunity for a proven technical writer with an MS Physics or Chemistry, strong communication skills, and experience in biotech. Responsibilities include interacting with engineers, scientists, and non-technical personnel to ensure effective communication of technical information. Requires a BS/MS in Physics, Chemistry, or related field and 2-4 years of experience in technical writing.

---

**REGULAR CLINICAL SCIENTISTS**

Individuals will work at the National Science Foundation and other leading research institutions. Responsibilities include conducting research, writing grants, and managing projects. Requires a Ph.D. in Physics, Chemistry, or related field and 1-3 years of postdoctoral experience. Additional qualifications include strong communication skills and experience in grant writing.

---

**STAFF PHYSICIST (MAGNETS)**

To assume a position and technical leadership at our leading Physics Group for research, design, and preclinical imaging applications. Responsibilities include setting up and managing a research and development program, collaborating with other departments, and presenting findings at conferences. Requires a Ph.D. in Physics or related field and 2-5 years of postdoctoral experience.

---

**OFFICE OF THE ACTIVITIES AND TRAINING MANAGER (MAGNETS)**

To support the development and implementation of activities and training programs for our new imaging products. Responsibilities include developing training materials, coordinating training sessions, and assessing the effectiveness of training programs. Requires a BS/MS in Physics or related field and 3-5 years of experience in training and education.
