Living in the future — wish you were here

Bellcore — it's a place with a perfect view of the next century. The surf breaks on the leading edge.

On a clear day you can see the future taking shape. A future in which information will belong to everyone and move with the speed of light into every corner.

It's the perfect climate for new ideas — wish you were here.

We're the central research and technology source for the Bell operating companies. Our areas of inspired research cover software development, applied research, network information systems, systems engineering, network planning services and equipment assessment.

We have opportunities in our northern and central New Jersey facilities for individuals with BS, MS and PhD degrees in Computer or Electrical Engineering or Computer Science who can help us provide superior technology and implement strategies that will allow the Bell operating companies to deliver advanced systems to their customers. We're also looking for creative talent with PhD degrees in Mathematics, Statistics, Operations Research, Physics or Human Factors Engineering.

Working in the future is the place to be—if you would like to join us,

Sign up at the Career Planning & Placement Office to meet our recruiters on campus, November 13

Alternatively, send your resume detailing your education and experience to: Manager, Technical Employment, Bell Communications Research, Department 127/5438/87, 48-130, CN 1300, Piscataway, NJ 08854. An equal opportunity employer.
