The impact of the donors are scared any one month. activity of the mines is more by the Executive Committee. They called up. "We don't tried so hard to (tuition according to the stock in December. If not affect MIT's finances."

Merritt of the overwhelming response. The changes in the system are expected to be effected before the Class of 1992 arrives next fall. Merritt is also considering granting a small amount of money to advisors to encourage and allow for more activities with advisors. Merritt would also like to see departments take part in encouraging faculty members to teach seminars. The Physics Department, for example, considers seminars full courses.

Vandals damage 6,004 machines over weekend (Continued from page 1)
Lab 6.111, suggested that 24-hour staffing of the equipment room may be a solution to the access problem. "This is what we originally wanted to do with 6.111. Unfortunately, budget constraints prevented us from doing so," he said.
The computers were originally donated by Hewlett-Packard to MIT some years ago, Sussman said. Paton estimated that the current cost of replacing the computers would be about $20,000 apiece. "The real cost can't be estimated by replacing or repairing the computers but rather by the time lost by students," commented Louis D. Brudia '89, lecturer of 6.001 in prior semesters. "Last term, someone in 6.001 tampered with the operating system," he said. The tampering caused much grief for students attempting to finish their assignments, Brudia noted.

UASO plans changes to strengthen freshmen advising (Continued from page 1)
program. In an advisor seminar, an advisor has his or her advisees in weekly informal discussions. Currently there are 35 advisor-led seminars.

In addition to increasing the number of seminars, expansion will also involve integration of advisor and regular freshman seminars, core subject discussion groups, and student seminars. This year over 600 freshmen requested spots in advance seminars; however, less than half were able to be accommodated. "The reason results are very encouraging," said Merritt of the overwhelming response. The changes in the system are expected to be effected before the Class of 1992 arrives next fall. Merritt is also considering granting a small amount of money to advisors to encourage and allow for more activities with advisors. Merritt would also like to see departments take part in encouraging faculty members to teach seminars. The Physics Department, for example, considers seminars full courses.

October stock market crash did not affect MIT's finances (Continued from page 1)
The impact of the crash on the investment and Executive Committees will be determined more by the steady state activity of the market than on any one month. Strehle wanted to assure the community that the stock market crash will have no effect on tuition. "We don't raise or lower tuition according to the stock market," he noted.

Strehle added that "the press tried so hard to create a panic. They called up to ask if the donors are scared and are not giving anymore. No, we're not closing the doors to send students home."

MIT's $550 million dollar "Campaign for the Future" capital campaign will continue on course, Strehle continued. MIT's donors still have faith, he said, citing an unexpectedly large show of interest in the campaign's kickoff in New York coming up early in December. But MIT did cancel plans to announce an increase in its fundraising goal after the market fell, according to The Chronicle of Higher Education.

Expert Systems Consultants

Coopers & Lybrand is an international accounting and management consulting organization that employs over 40,000 professionals worldwide. Right now we're looking for Expert Systems Consultants who would like to work in New York, Boston or Dallas with one of the nation's most advanced and sophisticated expert systems practices.

Our consultants in this practice help analyze, evaluate, develop and implement knowledge-based systems to support senior management in their decision making.

Qualified candidates will have a Masters or Doctorate degree in either Computer Science, Software Engineering or Management Science, plus one to ten years experience in knowledge engineering or software engineering. Specific knowledge in financial services or manufacturing and excellent written and oral communication skills are required.

In addition, candidates must possess a willingness to work both independently and as a part of a team, applying a unique combination of skills in the following areas:

- Automated Knowledge Acquisition
- Cooperating Expert Systems
- Planning and Scheduling
- Real-time Expert Systems
- Diagnostic Expert Systems
- Computer-aided Software Engineering

If you would like to play a vital role in one of the largest AI and expert systems consulting practices in the world, with a stimulating work environment, unlimited growth potential and highly competitive salary, consider Coopers & Lybrand.

We will be holding interviews on campus on December 2nd in the placement office, room 12-170. Please see Miriam Diamond of your placement office to schedule an interview. Students can sign up until 3 p.m. on Tuesday, December 1st.

Coopers & Lybrand is an equal opportunity employer.
