Now that you’ve made it through college, ask your parents for a graduation present to help you get through life.

A Macintosh™ personal computer.

If you’re headed off into the business world, we highly recommend our new Macintosh SE. Between its one megabyte of RAM, double-sided 800K internal disk drives and expandability, it lets you put all the power of a corner office on a single corner of your desk.

If your parents buy the idea of a Macintosh, but feel like maybe they’ve donated enough to your future the past four years, there’s always the powerful Macintosh Plus with its one megabyte of RAM, 128K of ROM and double-sided internal disk drive.

It’s considerably more affordable, yet still has enough power to run hundreds of leading software programs.

Of course, with either Macintosh, you get our advanced point-and-click mouse technology that makes using them easier than passing Pinball Theory 101. So you can immediately be productive, without taking a course in remedial computing.

The affordable and powerful Macintosh Plus. And the expandable Macintosh SE. Both let you work faster, smarter — and more creatively. Add the ImageWriter™ II printer, and you’ll produce crisp, impressive copies to prove it.

To learn more, visit your campus microcomputer center. Soon.

Because once you’re out of school, you’re out of luck.

As a full time faculty, staff or student at MIT, you are eligible to purchase a MACINTOSH COMPUTER through the Apple University program. For further information, visit the MIT Microcomputer Center or call 253-7686.

Hours 10 AM — 4 PM, Monday — Friday.
