Bush supports possible arms treaty

President George Bush is putting a tentative agreement to our arsenal of non-nuclear weapons in Europe. Secretary of State James A. Baker III and his Soviet counterpart, Eduard Shevardnadze, have talked down all the major points of the treaty, which should be signed next month. Bush says it will clear the way for military changes to match the political changes sweeping Europe. The treaty, which should be signed next month, will ban the testing of nuclear weapons in outer space. The proposed agreement will “re-draw the military map of Europe.” He said that despite the joining of tensions between East and West, “Europe is still the site of the greatest concentration of armed strength in the world.” Twenty-two countries are expected to sign the pact.

Soviet presence in Gulf increases; arms sales to Saudis will continue

The Soviet Union, which has been a major supplier of arms to Iraq, is now increasing its presence in the Gulf region. The Soviet Union has been providing weapons to Iraq, including fighter jets and missiles, in an attempt to increase its influence in the region. The United States has been trying to persuade the Soviet Union to reduce its support for Iraq. The United States has also been warning that any further increase in Soviet military presence in the Gulf could lead to a war.

Philippine soldiers stage rebellion

Philippine soldiers have occupied an oil company's headquarters in the southern island of Mindanao. The soldiers claim that they are protecting the area from Muslim rebels who are trying to establish an independent state. The rebels have been fighting government forces for several years, and the situation in the region is volatile.

NASA investigating loose beam

NASA managers are investigating the loss of a 70-pound metal beam that could have crashed into the Space Shuttle Atlantis during its recent mission. The beam was detached from the shuttle and is believed to have fallen into the Pacific Ocean. The investigation is being conducted by a team of NASA engineers and contractors.

Justice Department looking into oil prices

The Justice Department is looking into the possibility of price-fixing in the oil industry. The department is investigating whether oil companies are engaging in illegal price-fixing practices. The investigation is being conducted by a team of federal investigators.

Administration headers hard for deficit-reduction bill

President George Bush and congressional leaders are putting the finishing touches on a bill to reduce the federal budget deficit. The bill includes tax increases and spending cuts, and is expected to be signed into law this week.

Weather

Mild and dry

Sunny mild days and clear cool nights will be the rule over the next several days as cyclones track well to the northwest of southern New England. In the Atlantic, tropical storm Klaus is expected to affect the eastern United States, bringing gusty winds and rough seas. The storm will likely weaken as it moves towards the Carolinas.

Red Sox clinch division; fans celebrate wildly

The Boston Red Sox clinched their first American League East title in over a decade, and fans celebrated with a massive rally that lasted for hours. The celebration included parades, fireworks, and a large party at the Boston Commons. The Red Sox will now advance to the American League Championship Series, where they will face the New York Yankees. The Yankees have been the Red Sox's biggest rivals for many years, and the upcoming series is expected to be intense.

Dartmouth paper apologizes for anti-Semitic remark

The Dartmouth Review, a campus newspaper, has apologized for a column that included anti-Semitic remarks. The column contained derogatory language and made false claims about Jewish history and culture. The newspaper has removed the column and expressed regret for the harm caused.

Movie theater rejects NC-17 movie

A movie theater in New York City has refused to show a film that has been rated NC-17. The theater, which is owned by a major film studio, has decided not to screen the movie because it contains explicit content. The NC-17 rating is given to films that are deemed too explicit for general audiences.
