Practice is Over.

Every 90 minutes, the Coast Guard saves a life. An impressive statistic from a small group of people who also stop drug smugglers, protect the environment and more. As a member of the Coast Guard, these opportunities become your opportunities–eight away. The day you join, practice is over and you’re on!

So if you want action and you’re looking for a chance to do something important, take a look at America’s smallest armed force.
The U.S. Coast Guard.
Be Part of the Action!

U.S. Coast Guard & Coast Guard Reserve

IS Publishes Catalog of Hardware and Software at Selected Sites at MIT

Use the Catalog to make informed decisions about buying computer equipment. Find out:
- Where you can try out a scanner
- Which offices use a Sun as a server on their Macintosh networks
- Who has numerical software for UNIX that’s inexpensive or free
- What types of robots live on campus

... and much, much more!

Computers are a big investment, both in money and the time it takes to research.

The Catalog identifies the specific hardware and software used by selected departments, groups, and offices at MIT. It also includes names of contact people. The Catalog of Computer Hardware and Software at Selected Sites at MIT, can help you make informed buying decisions by tapping into other computing resources on campus.

For the first edition, the Catalog database was built from 31 sites. The Catalog doesn’t contain an exhaustive list of all computers or computer sites at MIT - the aim was to represent a rich mix of the hardware and software installed on campus.

A general product index and three indexed listings – of computer systems, hardware, and software – will help you find out what’s being used at the sites. The data in the catalog was current as of April. Over time, of course, sites will phase out some products and install new ones, but the setup of most sites shouldn’t change significantly.

How Can I Get a Copy?
The Catalog costs $5 (cash or MIT requisition). You can buy copies at the Microcomputer Center, W20-021, or at IS User Accounts, 11-205. Copies are available for you to browse through in most of the MIT libraries.
