The new release adds many features, and at the same time speeds up log-in time and makes more memory available to the workstations users.

These changes are documented in the user release notes, which are available in printed form in every cluster, in the Athena consulting office and in Graphic Arts. They are also available in the on-line help system.

If you do not find that performance improves considerably after the fix is released, Project Athena would like to hear from you about it. You can talk to Athena through its consultants, in person in the consulting office or by mailing us.

Indeed, if you had asked the consultants about the delays you were experiencing, you would have been told about the bug in the release and about the work being done to fix it.

Second, you point out that help is too slow. You're right, it is. Project Athena did not anticipate the speed problems when designing it, and now that the mistake has been realized, a new, faster on-line help system is being developed.

In the meantime, the text-based version of help, which is quite fast, is available. In any case, other versions are superior to what users used to get when they had to help a small group of 7th and 8th graders.

You can talk to Athena through its consultants, in person in the consulting office or by mailing us.
