Call for Papers
MIT-ACM Computer Science Conference

The third MIT-ACM Undergraduate Computer Science Conference will recognize and display quality research done by MIT undergraduates. MIT undergraduates will present papers on a wide variety of Computer Science subjects. The authors of the best papers will receive cash awards. All accepted papers will be distributed.

The goal of this conference is to assemble undergraduates in a forum which:
1. Expands the realm of undergraduate education to issues beyond class subjects;
2. Encourages communication of technical ideas among a peer group;
3. Allows undergraduates to present their work in a formal setting;
4. Provides undergraduates experience with writing and presenting papers.

The conference will cover topics relating to Computer Science. Suitable sources include:
- Term projects for classes (e.g. 6.111 or 6.036);
- UROP projects;
- Summer jobs, including non-proprietary VI-A assignments;
- In-progress theses;
- Personal hacks, which others would find technologically interesting.

We enthusiastically solicit short papers, of about six typed single-spaced pages; or 1800 words. Please submit three copies of papers to the Conference Chairperson by March 15, 1991. Papers must not have been published or submitted elsewhere for publication. Authors of accepted and rejected papers will be notified by April 1, 1991. Papers will be judged on technical content, cleverness, interestingness, and quality of writing.

For information, contact: Conference Chairperson, Michael de la Maas, MacGregor E124; x5-9240; mdlm@ai.mit.edu.

Grad Students

- How do you feel about graduate life?
- Do you feel there are needed changes at the institute?
- Do you think grad students should participate in making these changes?

Maybe you should be a GSC committee representative?

The GSC is now accepting nominations for representatives for the following FUN committees:

- Committee on Discipline
- Corporate Joint Advisory Committee
- Board of the Association of MIT Alumnae
- The Inauguration Committee
- Committee on Privacy
- Committee on Use of Humans as Experimental Subjects
- Ad Hoc Committee on Military Impact on Campus Research

Interested? Call the GSC office right now, x3-2199.

Don't delay. The price of eternal vigilance is fish.

---

Now you can afford to dream in color.

Apple introduces the Macintosh LC. If you thought that finding a color Macintosh system you could afford was just a dream, then the new, affordable Macintosh LC is a dream come true.

The Macintosh LC is rich in color. Unlike many computers that can display only 16 colors at once, the Macintosh LC expands your palette to 256 colors. It also comes with a microphone and new sound-input technology that lets you personalize your work by adding voice or other sounds.

Like every Macintosh computer, the LC is easy to set up and easy to master. And it runs thousands of available applications that all work in the same, consistent way—so once you've learned one program, you're well on your way to learning them all. The Macintosh LC even lets you share information with someone who uses a different type of computer—thanks to the versatile Apple SuperDrive, which can read from and write to Macintosh, MS-DOS, OS/2, and Apple II floppy disks.

Take a look at the Macintosh LC and see what it gives you. Then pinch yourself. It's better than a dream—it's a Macintosh.
