A remodelled Network reses-

tant opened its doors to the MIT community on Tuesday after over two months of renova-
tions. The renovations are one of several changes being made to campus dining facilities by ARA, MIT's food service contractor.

The restaurant is "designed to be an eating and a meeting place, and feature an attractive menu and an informal atmosphere," according to What's Cookin', a newsletter published by ARA.

Networks was closed on July 3 for renovations. The restaurant was originally slated to be renamed "Hackers Haven." This was later shortened to "Hackers."

Dean of EECS and HHASS change

Professor of Electrical Engi-

nelling and Computer Science, Prof. Joseph Moses, was named dean of the school of engineering in January. Prof. Moses succeeded Gerald L. Wilson, '61, who had been dean since 1981. Prof. Moses, a former head of the Department of Electrical Engineer-

ing and Computer Science, plans to continue the innovations begun by his predecessor to en-

sure MIT's rank as the number one engineering school in the United States.

"This new role will allow me to bring my passion for education and research to the forefront," said Moses. "I am excited about the opportunities ahead and look forward to working with the students, faculty, and staff to achieve our goals."}

FHC report to be discussed

By Roslyn M. Lerner

The two-year-old report of the Freshman Housing Committee is receiving increasing interest from students, and may once again become the subject of pub-

cic debate.

The committee, which was ap-

pointed by the former Provost, John M. Deutch '61, was asked to exam-

ine the way freshmen choose their living groups and are orient-

ated when they first arrive at MIT. Among other things, the report suggested that all freshmen live on campus, with rush for inde-

pendent living groups postponed until later that year.

Faculty Chair and Provost of MIT Science and Engineering, Professor of Chemistry Mark S. Wrighton was selected by Pres-

ident of MIT. Professor of Chemistry Mark S. Wrighton was selected by Pres-

ident of MIT. Professor of Chemistry Mark S. Wrighton was selected by Pres-

ident of MIT.

"The report from the committee is a valuable resource for us as we continue to develop and improve our housing options," said Wrighton.

"As the FHC, we have made significant progress in recent years, but there is still work to be done to ensure that our students have an excellent living experience," he added.

Dean of Student Affairs

"We are excited to see the interest in our report growing," said Dean of Student Affairs, Professor of Chemistry Mark S. Wrighton. "We encourage all students to review the report and share their thoughts with us.

"We are committed to ensuring that our students have the best possible experience at MIT, and the FHC report is an important tool in achieving this goal."
