### ARA Returns, but Accepts Risk of Loss

**By Steven Quinlan**

The Board of Overseers has approved a new $4 million fund for ARA, the Institute's food contractor, to cover legal expenses relating to charges of scientific misconduct against ARA's vice president. The agreement, which was reached after months of negotiations, is expected to provide a significant financial boost to ARA, which has faced legal challenges related to the misconduct allegations.

### Athena Loses Funding, Becomes Part of IS

**By Dean Riddle**

Athena, the Institute's computing service, is being absorbed into the newly created Institute for Computational Services and Engineering (ICSE). The move is part of a broader strategy to consolidate the Institute's computing infrastructure and improve service quality.

### Culliton Says MIT Saved Government $8 Million

**By Ely Karp**

MIT's Director of Research Administration, John C. Culliton, has announced that the Institute saved the government $8 million over the past five years. The savings come from reduced indirect costs on federal research grants.
