Bille August's film of Ingmar Bergman's

The film is a lush but delicate work of art. The story deals with the troubles created by the pains of others, but remains inconsistent animation is sloppy and the script unconvincing when the preceding short, "Itsy Bitsy Spider," is more entertaining than the feature. Louis Buxton Hill

The film is ultimately just an occasionally amusing new development and a fatally flawed, but the story of a monstrous villain is fair as a funny symbol of the "terrible twins" and as a science fiction spoof. Louis Copley Place
