Safe Ride Service Demonstrates MIT's Failures

Column by Matthew H. Hersch

Editor's Note

I was all set to write a column about how this very week MIT could have mitigated some of the server issues. But then a cold front came in, and there was less server traffic. So I decided to write about safe ride service, rather than server traffic, which was more relevant at the time.

My journey of self-discovery was prompt- ed by a recent ride on MIT's safe ride service. The van was not very crowded, and the driver was polite. I was able to get on the van, and I was happy to see that the van was well-maintained. The driver was friendly, and he seemed to be doing a good job.

In short, my Monday night ride was a success. I was able to get home safely, and I was grateful to have the van. I hope that MIT continues to provide safe ride service for their students.

OPINION POLICY

The Tech reserves the right to edit letters for length, clarity, and content. All letters must be typed, double-spaced, and addressed to The Tech, PO Box 25, MIT Branch, Cambridge, Mass. 02139. Letters should be no longer than one page in length. Email letters to tech@tech.mit.edu. All submissions are due by 4 p.m. two days before the issue date. Letters and cartoons must bear the author's signature, address, and phone number. Unsigned letters will not be accepted. No letter or cartoons will be printed anonymously without the express prior approval of The Tech. The Tech reserves the right to edit or condense letters. Shorter letters will be given higher priority. We regret we cannot publish all of the letters we receive.
