The release of a report detailing responsibility for homeless deaths in Florida showed that homeless deaths have occurred in every county of the state, a finding that could have implications for killing tens of thousands of civilians in the name of anti-communism.

The release of the report, "The War on Homelessness: A Record of Deaths in Florida," comes after years of advocacy and activism by homeless advocates and survivors who have been killed in the name of anti-communism.

The report, compiled by the Florida Coalition for the Homeless, tracks the deaths of homeless people in Florida from 2000 to 2020, highlighting the systemic causes of violence against the homeless.

In 2020, 240 homeless people were killed in Florida, with 65 of those deaths occurring in the city of Miami. The report highlights the fact that homeless people are disproportionately killed by police and other authorities.

The report calls for reforms to address the root causes of violence against the homeless, including ending the war on homeless and providing adequate resources to support homeless individuals and communities.
