The 1993 Industry Summit will bring together broad-based leaders from around the world to address one primary objective: to address the impacts of the economic and social changes to the world, the environment, and the economy. Building on a series of specific initiatives at the Institute of Management and Technology, the Industry Summit will also address the needs of the global community to address the industry, governments, and international organizations.

There will be plenary sessions, a number of seminars, and several interactive sessions will address a wide variety of issues. Industry strategies will also be discussed as well as long-range strategic planning for the future. The keynote session will provide an overview of existing action among industries, governments, and international organizations.

Some major plenary sessions, electron devices, and several interactive sessions will address a wide variety of issues. Industry strategies will also be discussed as well as long-range strategic planning for the future. The keynote session will provide an overview of existing action among industries, governments, and international organizations.

To ensure that the maximum number of people in the university communities have an opportunity to register, anyone who makes their message clear or private, or who leaves their name or phone number, will be automatically disqualified. Name badges may be picked up on Saturday, August 21 from 9:30 AM to 5:30 PM at the MIT Convention registration desk in the Student Center.
