Huntington Provides Temporary Relief For Undergraduate Housing Shortage

I am an effort to relieve undergraduate dormitory crowding, MIT signed a one-year lease for part of a dormitory at 620 Huntington Ave.

The dormitory, called Huntington Hall by MIT, has 150 rooms distributed over five floors, allowing for a significant increase in student housing capacity.

A Safe Ride has added a permanent stop at Huntington Hall to make it easier and safer for students to commute to and from campus. In addition, Huntington Hall is a dormitory cluster in the dormitory and phone lines in individual rooms.

Need to relieve crowding

The Huntington Hall lease was arranged to alleviate the overcrowding of on-campus housing, according to Arthur C. Stone, dean of undergraduate education and student affairs.

The dormitory is located near the campus center, close to the Business School, the Massachusetts Institute of Technology (MIT), and the Massachusetts Institute of Technology Sloan School of Management.

March 7

A 230 crowded rooms last year, Eisenmann said. At the end of September, 60 of the available rooms had been filled.

"We knew for a long time we were going to have trouble housing everybody," Smith said.

The court held, however, that because MIT was a nonprofit organization that offered reasonable cooperative and social admissions, Overlap was not illegal per se.

Limitations may exclude smaller colleges

MIT received much praise for serving the suit through the end, but university officials across the country are expressing concern over the limitation of cooperative arrangements.

Under the new guidelines, non-profit schools can participate in cooperative financial aid programs only if they agree to practice need-blind admissions and provide full financial aid to the need of their students.

The settlement agreement reached by the Justice Department and MIT is a first step toward recognizing the importance of certain cooperative arrangements among colleges and universities for student financial aid.

Huntington Hall is MIT's newest undergraduate dormitory. The dormitory was previously part of a dormitory at 620 Huntington Ave. in limited of 165 crowded rooms in order to house all of the incoming students.
