Software Engineer

Active Voice, a rapidly growing and dynamic telecommunications software firm, is seeking a Software Engineer in this product development department. This person will be responsible for developing, testing, and maintaining new and existing software, and assisting with technical documentation and support.

Active Voice produces high quality PC-based telephony peripheral systems such as Voice Mail and Automated Restaurant systems. We offer competitive salary and benefits, and a stimulating and dynamic work place with opportunities for personal challenges and growth.

Requirements:

B.S.C.S. or equivalent.
Programming experience developing commercially available PC-based software (Ex: C, FORTRAN, OOP).
Strong written and verbal communication skills.
Strong troubleshooting and analysis skills.

Preferred:

Experience developing real-time applications.
Experience with PC based voice processing boards (Ex: Dialogic).
Experience developing Windows applications.
Experience dealing with windows telecommunications.

To apply, please send a letter and resume to Active Voice, 201 Third Avenue, Seattle, WA 98134. All Software Engineers. Active Voice is an equal opportunity employer.
