Program opportunities exist in both our Boston and Dallas locations and focus on both Operations and Systems Development.

The Systems Company of Fidelity Investments provides development, operations, and technology services to the business units of Fidelity Investments. We are currently recruiting graduating seniors for a select number of positions in the Systems Company Associates Program. The program includes four rotating assignments over a 24-month period in various system areas. It provides on-going technical and business training as well as a one-to-one coaching relationship with a Systems Company Manager.

Applicants will work with information-systems solutions across multiple technological platforms, operate in a progressive information-technology environment, and participate in the development and support of technology that is strategically critical to the success of the firm.

Extensive business and technical training will be provided.

To qualify, you should have experience in one of the following areas: Information Systems, Computer Science, Electrical Engineering, Mathematics, or BSEE. Additionally, you should possess an interest in financial services and securities industries, demonstrate leadership and problem-solving skills. Related intern or technical work experience is desirable. A minimum 3.5 GPA is required.

Fidelity Investments is committed to creating a diverse work environment, and proud to be an equal opportunity employer.
