Summer Undergraduate Research Programs
in the
Graduate Biomedical Sciences

New York University Medical Center
June 5 - August 4, 1995

The Sackler Institute of Graduate Biomedical Sciences invites applications from students for participation in a summer research internship program at New York University Medical Center. The purpose of the program is to give students who may be interested in pursuing careers in the biomedical sciences (M.D.-Ph.D. or Ph.D.) the opportunity to conduct research and to be exposed to the excitement of an academic medical environment at a major research center. Students may work with faculty in the disciplines of biochemistry, cellular and molecular biology, immunology, microbiology, molecular oncology, neuroscience and physiology, parasitology, pharmacology, and virology.

Trainees enrolled in the program will receive a stipend of $2,500, round trip travel expenses to New York City, and housing at the Medical Center. Underrepresented minority students are encouraged to apply.

For an application, please write to either:

Mr. Antonio J.D. Rocha, Coordinator
Summer Undergraduate Research Program
New York University School of Medicine
550 First Avenue
New York, NY 10016

Ms. Dionne Sandiford, Coordinator
Office of Minority Affairs and Student Services
New York University School of Medicine
550 First Avenue
New York, NY 10016

Application Deadline: February 1

WE HELPED BILL.
We Can Help You!

BEFORE

AFTER

Listen to Bill C.'s amazing story:

Barely 85, he was a normal 85-year-old man until he was getting tired, and his memory and vision were so bad that he had to have help in his office and at home. Bill knew he needed help, so he made an appointment with H.A.I.R. A few days later, he had a spiky crop of hair. There's been no looking back for him since. It's been one date after another. His friends don't make fun of him anymore. A couple of years back, he even became the president of a major western nation. All he can say now is, 'I am not only the president, I am also a client. Thank you, H.A.I.R.'

Looks like a Vivarin night.

The big one's only 12 hours away. You could have paid more attention in class, but tonight you've gotta cram. First, you better keep those eyes from closing. Revive with Vivarin. Safe as coffee, it helps keep you awake and mentally alert for hours. So when your most difficult problem to solve is how to stay awake...make it a Vivarin night!

Revive with VIVARIN.
