

Compulsory Meal System Planned In Senior House

Beginning immediately after Spring vacation, on April 4, 5 and 6, the new Senior House will be open for inspection by the student body from noon until 5:00 P.M. Since the new dorm will be used to house convocation guests, it will be nearly complete by this time.

New Meal System

One feature of the new dorm, unusual at Technology, will be the meal plan. Students will be required to pay for fifteen meals per week, and the cost of this dining service will be \$10 per week. No meals will be served by the dining service on weekends, but a snack bar will be operated in the evenings and also on weekends. Of course, the snack bar will cost extra.

The barracks dormitory will be open again next September, but limited in occupancy to 250 men. Rent in the barracks will still be \$85 per term while rent in the new Senior House and in the permanent dormitories has not been definitely fixed as yet for next term. The fall term will be a twenty week term, because of the fact that school will start one week earlier in September.

Same Rent for all Rooms

It was announced by Professor Hamilton, Chairman of the Dormitory Board, that each of the rooms in the new Senior House would cost the same price per man, regardless of the fact that it was a single, double or even larger room. The reason being that the rooms in the new dormitory were built as doubles or triples, whereas the old dormitory doubles and triples are in reality, crowding more men into each room.

Dial Phones

In addition there will be a dial phone in each room of the new dormitory, capable of reaching Institute points such as the dorms or barracks, as well as local rooms.

Rent schedules for the new Senior House will be announced in The Tech soon after the Convocation.

Voo Doo Presents Nautical Museum With Model Ship

Next week, in the lobby of Building 10, VOO DOO plans to unveil an exquisitely proportioned ship model, which they will then present, with full military and naval honors, to the newly revamped Nautical Museum. Numerous dignitaries are expected to attend the ceremony.

Full plans for the unveiling and presentation have not yet been prepared, but the Admiralty Division of VOO DOO has released some information. The ceremony will take place at high noon, probably on Wednesday. The well-veiled model will be on display during the morning, along with the elaborate ways and tanks that will be used during the launching proceedings.

Come Early

Just before noon, grandstands will be installed, and hot dog, popcorn, and hardtack vendors will begin to circulate through the crowd. Admission is free, but interested persons are advised to arrive early to be sure of obtaining seats. Special arrangements will be made for overflow audiences, either in the VOO DOO office, the Boston Arena, the Smith House, Room 7-003, or all of them.

Promptly at noon, William Schneider, '49, accompanied by an honor guard, will arrive in the Lobby of Building 10, carrying a magnum of Orange Crush, which he will use to christen the sleek craft. Rear Admiral L.L.Lillim will be on hand to accept the donation. He will be dressed in full bathing suit.

Eastgate Project Features Unique Double Exposure

The Eastgate apartment home, now under construction just East of the Senior House on Memorial Drive, will be completed in the fall of 1950. From the air, the twelve-story building will look like the letter "E" facing the Charles River Basin. It will have 261 apartments: 109 with two bedrooms; 92 with one bedroom; 29 with three bedrooms, and 28 studio apartments.

Plans show that every apartment is so located that its living room receives direct sunlight and affords a clear view of the river. This arrangement of rooms is possible only because of its unique floor plan. The corridors in the main part of the building are located on the north side so as to protect these apartments from north winds, but in the wings the corridors are conventionally located in the center of the building.

Faster Elevator Service

To make the apartments larger and to provide faster elevator service the corridors are only on every third floor. Apartments on non-corridor floors are reached by private stairways to the corridor floors.

The floor plan shows how occupants will be able to get thorough ventilation in hot summer weather because of the resulting double exposure.

Flood of Applications

According to Mr. Keyes of the D.I.C., 340 applications have been received for the 261 apartments. 300 of these are from persons connected with Technology: 175 from members of the faculty, 100 from employees, and 25 from students. No statement as to the probable price of these apartments is yet available for publication.

Extra Mugs Delayed

The Junior Mug Lift Committee announces that there will be a delay in delivering the extra mugs ordered for those who wanted another. The mugs will be ready within three weeks, and their arrival will be announced at a later date.

Forum Planned To Air Gripes

"Improved Teaching" Topic Of Discussion

"How may the quality of instruction at Technology be improved," the first in a projected series of forums sponsored by the Student-Faculty Committee, will be held on Monday, March 21, at 5:00 p.m. in Room 10-250.

The Committee, composed of both student and faculty members, believes that the improvement of instruction is a subject of interest to every member of the Institute family, and the forum is designed to give both students and faculty an opportunity to express their views.

Dean John E. Burchard will act as moderator for the forum, and speakers will include Dean George R. Harrison, Professor Hans Mueller, Gordon Ralsbeck G., and James T. Jensen '50. Each of these men represents a different viewpoint on the topic, and there will be ample time for discussion after the brief remarks of the speakers.

Dorm Situation Probed By Comm.

Various Methods Found For Gaining Admission

Last Monday the "barracks investigating committee" of the Dormitory Committee submitted its report of ways and means of entering the dormitories. The committee found 134 men from the Class of '51 and 22 men from the Class of '52 were, at present, residents of the dormitories.

Of these men, only six could be found that either gave no answer when asked how they entered the dorms, or else could not be reached. A partial breakdown of the listings included:

23 foreign students, 18 medical excuses, 57 into suites, 20 arbitrarily assigned or special cases and 7 by lottery.

The committee wishes to state that vacancies should be filled more promptly, and further wished to call attention to the fact that policy is not clearly enough stated in Institute bulletins. In the opinion of the committee, the management errors were small, and the management is to be commended.

ONCE IN A LIFETIME

STATEMENT BY DEAN BURCHARD General Chairman Convocation Committee

The glamour which naturally attends the appearance at M.I.T. of such world figures as President Truman and Mr. Churchill should not blind us to the other great riches which are in store at our Convocation.

It is seldom that any generation of students has an opportunity to greet on its own doorstep, so to speak, such a famous company as we have fortunately been able to assemble for this Convocation. It has happened in not more than two to three other universities in this country; it is not likely to happen again at M.I.T. for a long time.

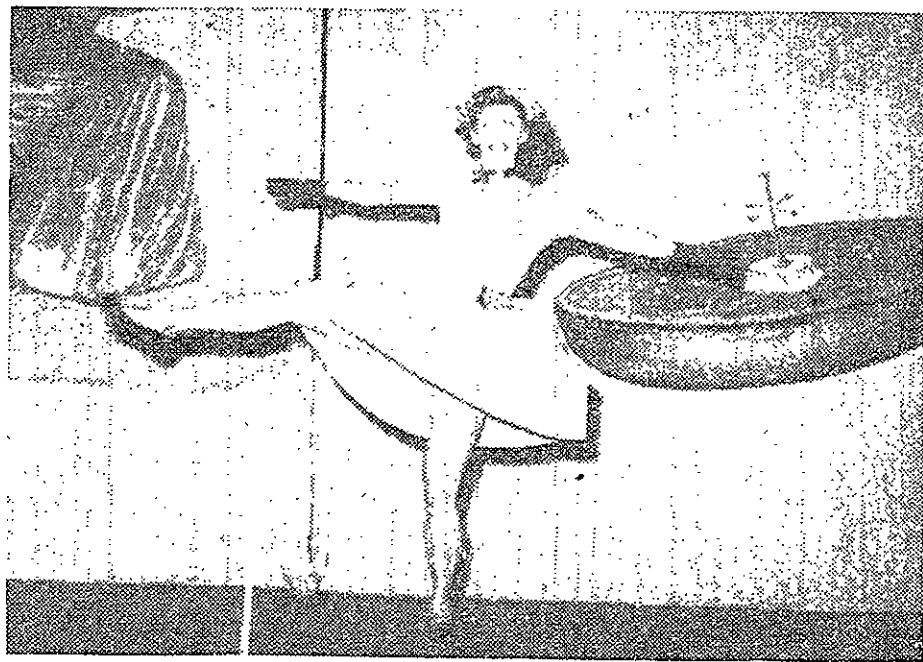

If the full value of the opportunity to hear and see great men in many fields is embraced, the experience will be one which all of us may treasure for the rest of our lives. And great as will be the memory of having sat in the presence of such a hero as the wartime Prime Minister of Great Britain, it is by no means certain that some of the things others will say may not have a greater effect on the lives of some of us.

This Convocation begins with the address by Dr. Compton on Thursday afternoon. This address is the keystone of the whole edifice. While all the events bid fair to be crowded to overflowing, we of the committee are especially anxious that our own students shall not regret later any opportunity which they may have failed to grasp. The same thing applies to all the panels in which all the speakers are distinguished and many are historic in their own right.

Tech Show Tickets Are Still Available For Tonight And Sat.

Tired of Boston, the cast of "O Say Can You Si" embark tonight for Poncho Poncho, South America. Last minute touches on newly painted scenery made and script changes completed, the 1949 Tech Show is ready for the public eye.

According to Business Manager Dick Glenn, plenty of good

Miss Aileen Howell executes a fast turn at Thursday night's dress rehearsal of Tech Show.

More Men Needed For A. A. Positions

Freshmen interested in working for the Athletic Association may apply for positions as assistant managers at the A. A. Smoker to be held Monday, March 21, at 5:00 p.m. in Room 3-270.

An increase in the number of students participating in athletics, officially two thousand out of Technology's thirty-eight hundred undergraduates, has created a need for more student managers in both the sports and administrative departments. The student managers will prepare budgets, schedule future contests and provide for the teams needs. With regards to sports, there is an immediate need in crew, lacrosse, baseball, track, golf, and tennis. The treasury, equipment, and publicity departments all need assistants.

The smoker will feature movies of the spring sports, and short talks by each coach.

Elections Notice

Election petitions for class officers may be obtained at the Information Office in Building 7, or at the Walker Memorial Committee Office beginning Monday, March 21. Deadline for petitions will be at 5:00 p.m. on Tuesday, April 5. Petitions should be submitted at the Walker Memorial Committee Office.

Stratton Semi-finals Here Next Week

Next Monday and Tuesday, March 21 and 22, the Stratton Prize Competition will hold its semi-final eliminations at 4:00 p.m. in Room 2-390. The contest involves the oral presentation of papers on technical topics, and each speaker is limited to fifteen minutes.

The six finalists chosen will compete on April 11 for a first prize of \$100, and five additional prizes totaling \$100 more. Students, faculty and staff are cordially invited to attend the trials.

seats are available for both the Friday and Saturday performances.

The Gottlieb, Lang Combo

Comedians extraordinaire Gottlieb and Lang form something of a Bing Crosby, Bob Hope combo. Andy croons and wows the women, while Joe is a fast talking comic who mouths himself into every situation. Later on, a straw hat and cane routine clinches the identity.

Aileen Howell and Nathalie Foss amply fill the feminine leads with their characterizations of "Ginny" and "Juanita."

Aileen, who directed the show's unique ballet numbers, is a standout in her own dance routines and vocals. Nathalie, besides adding to

(Continued on Page 4)

Elections Approved At Recent Meeting Of Institute Comm.

The Institute Committee held its regular meeting on March 16 at 5:15 p.m. with President Thomas Toohy, '49, presiding.

The following proposals were passed upon:

1. The election of T.C.A. officers were approved. The following list of officers was submitted: Michael J. Fitzmorris, Jr., '50, President; Carl F. Mellin, Jr., '50, Vice President; Arthur C. Savoth, '50, Secretary; Donald E. Rose, '50; Casper Zublin, Boys' Work Director.
2. The election of I.F.C. officers was approved. They are: C. J. Jacobie, III, '50, Chairman; James A. Hooper, '50, Secretary; Joseph D. Fleming, '50, Treasurer.
3. Guy C. Bell, '50, was elected Junior member of the Judicial Committee to fill out the term of Harry F. Raab, Jr., '50.
4. The amendment to the Constitution of WMIT was approved.
5. The Constitution of the Institute of Food Technologist was approved.
6. The Constitution of the M.I.T. Society for Psychic Research was approved.

THE TUMULT AND THE SHOUTING DIES

The Dormitory Committee's special subcommittee investigating Dormitory admission policy has submitted its final report. The document is published elsewhere in this issue of *The Tech*.

Apparently, the inquiry was done very methodically and thoroughly. A list was made of all the freshmen and Sophomores living in the dormitories and each individual was checked against a possible means of getting into his present accommodations. Only a relatively small number seemed to be in the Dormitories illicitly, but it was apparent that quite a few had gotten in by methods other than those indicated in the catalog, the housing bulletins, or the information given to barracks residents. There was no indication that any priority list had been maintained for transfer from Building 22.

As far as the management of the Dormitories is concerned, the committee found no one who was remiss in his duty. It was evident, however, that the actual policy and the published policy were far from a state of agreement. This matter seems to us to be very clearly the responsibility of the Dormitory Board. There need have been no difficulties had a realistic and workable program been defined in the first place. We hope that in the future the Dormitory Board will avoid such blunders.

RIGHTS OF PROXIES

One incident that marred the proceedings of the meeting at which the report mentioned above was submitted was the exclusion from the first reading of the report of the Dormitory Committee members who were present by proxy. The motion under which the subcommittee was set up originally specified that the report of the group be submitted in a closed meeting so that any findings which might implicate any students or members of the dormitory administration would not be released to the general public without the approval of the Dormitory Committee. It was perfectly proper that the meeting be closed for this purpose.

The motion passed by the Committee, however, was to the effect that "all non-regular members, including proxies," be asked to leave the room. Proxy representatives are legal members of the Committee to the extent specified in the proxy, and it seems rather high-handed to expel them from any meeting. If secrecy is desired, it should be stated to all members present that they are expected to keep the information divulged confidential, and it should be sufficient to respect the integrity of the proxy members as that of the regular members.

It has been argued that the proxy members at this particular meeting were there illegally since they did not have the proper credentials. In the first place, this defense is begging the question. In the second place, nowhere in the minutes of the meeting is it indicated that these members were challenged; they were merely excluded as "non-regular members."

It was difficult to determine just what the legal status of a proxy representative is under the Dormitory Committee constitution since it is at present being revised. One would think that until the new one is adopted, the old constitution remains in effect, but there are apparently some differing opinions on this point.

Whatever the case, here is another example of the need for clarity and concreteness when stating the rules of an organization's behavior. It is also obvious that any rules which are important enough to be made are also important enough to be observed.

Fraternity Findings

By JOHN THOMAS

This is, if I've counted right, the sixth week of the year's second torture session, and I suppose that most of you dear readers feel as punchy as I. Something like the freshmen around our house who have just been poleaxed by Professor Sear's SHM. At any rate, it struck me that the Phi Delt's are quite timely in announcing their Hell Dance for this Saturday. Evidently trying to lose all contact with the outer world, they are asking that their guests come in anything but ordinary dress. Just be sure you don't show up in a sport coat.

The Phi Beta Epsilons are furthering a pleasant idea by holding a house cocktail party and buffet dinner before Tech Show for the brothers and their dates.

I understand that the Out House Orgy followed a well established course last week. Bob Lincoln got out his banjo and Lindsay Russell and Lou Lehmann their guitars, and everyone ended up singing downstairs in the basement party room.

The Delta Psi's welcomed the month of March last Saturday, or at least that was the proffered reason for the party. The interest apparently centered around a new recipe for punch that had just been smuggled in from the wilds of Williams by a brother there.

Tech Family Finds Solar House Life Is Pretty Hot Stuff

By DONALD BERNITT

Life in a solar house is not much different from life in an ordinary house—except that life is more fun. Mr. and Mrs. Harold B. Reid, and their 17-month-old son, residents of Tech's solar house near Westgate, are thoroughly pleased with the solar energy heated house.

House Cleaning Easy

From a housewife's point-of-view Mrs. Reid says the house can't be beat for efficiency. The furnishings are all easily cleaned, and dust and dirt can't get into the solar house in as many ways as it does in an ordinary house, and there is no need for opening windows because the house is well-ventilated.

Toby, the Reid's little boy, likes the house, too. He likes to stand at the long full-length front window, watching the birds that gather in the solar house's sheltered front yard. Mr. Reid reports that he hasn't had a cold since they moved in, and he gets more than a normal quota of sunshine while remaining indoors.

The view from the living room is a spacious one of the Charles River Basin and Boston. Mrs. Reid often watches the racing crews training in the late afternoon. At night, Boston and Brookline's neon-lighted skyline is the view through the ceiling-to-floor window which is the entire south wall of the house.

In The Spotlight

The list of the composers on the program of the Symphony Orchestra Concert a week ago last Saturday included the name of Charles E. Chase, '50, who wrote a prelude which the audience seemed to appreciate. How did a Techman's name come into such company as Mozart and Bach?

Quit Piano Lessons

Charley is a Junior in Course VIII, a member of the Glee Club, and President of the Psychic Research Society. His early childhood, spent in Lyndonville, Vt., did not show any promise of a great musical career. As a matter of fact, he began taking piano lessons when he was in the third grade, but disliked them so much that he quit after a few months. He went to

St. Johnsbury Junior Conservatory, where he took a sort of accelerated course as "Composition major, Piano minor." Before leaving for M.I.T., Charley gave a few piano recitals in St. Johnsbury.

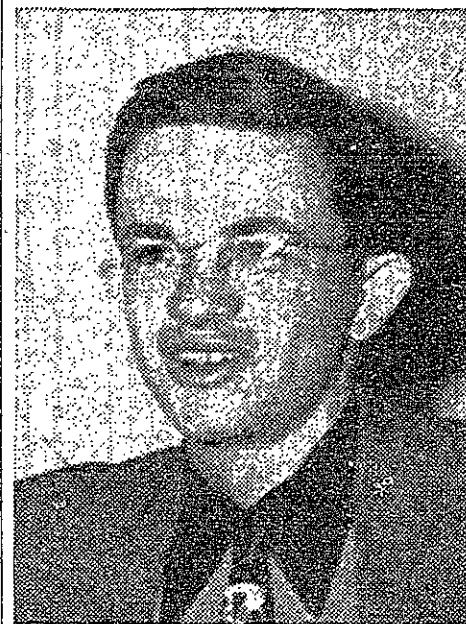

Techtet Accompanist

As he was always interested in composition, Charley managed to learn all he knows about instrumentation out of books and is a member of a "Junior Composers' Club" at the New England Conservatory, where he has taken some courses in counterpoint. His further interest in music is shown by the fact that he was accompanist for the Techtet, the dormitory singing group which won first prize and Egbert at the All-Tech Sing.

Tough Choice

Charley is doubtful about the future, as he finds it difficult to choose between science and music. He will probably concentrate on nuclear physics courses, and hopes eventually to receive his doctorate in that field. Last year, Charley had been accepted by the musical school at Yale, and was all set to go, when he changed his mind at the last minute. "Physicists don't eat much," he reasoned, "but at least they eat something." He felt that a composer who wants to write according to his own taste cannot depend on his music for his livelihood. So Charley is still a Techman, although a pretty unusual one.

COMPOSER CHASE

public school in Lyndonville, then to the Lyndon Institute in the same locality, and finally thence to Tech.

Course at Conservatory

His second, and more serious contact with the music world occurred in 1944, when Charley once more took piano lessons. This time, however, the results were better, and a year later he transferred to the

house, the Reids were kept busy explaining the details of their solar house to visitors. One photographer, looking for something of the interior features which would distinguish it from a conventional house, went away totally frustrated. The house, from all interior appearances, is simply a very modern and tastefully decorated house.

While most of the energy used to heat the house is derived from the sun almost directly, supplemental heat for prolonged cloudy periods is supplied electrically. Automatic recording devices keep an accurate log of the energy received from solar sources and the auxiliary electrical unit.

FROM MISCELLANEOUS TO LACROSSE

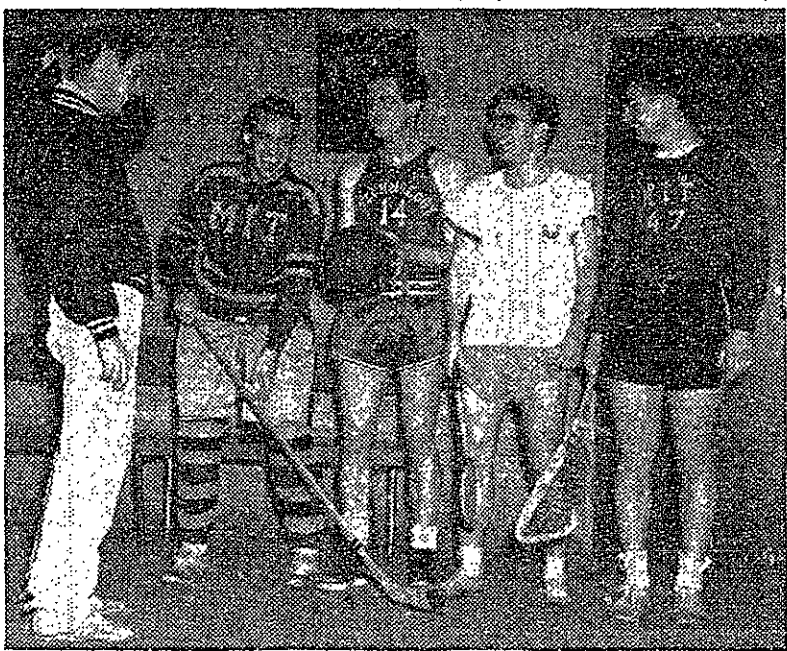

Photo by Gerhardt

Coach Ben Martin is scratching his head, and do you blame him? Three of the four lacrosse players pictured above have apparently forgotten what sport they are out for, and reported in the uniform of the sport they have just finished captaining. From left to right are: Ted Madden, hockey captain; Jim Madden, basketball captain; and Bill Stoney, squash captain. The fourth man is Tom Tsotsi, co-captain of the lacrosse team, who is playing it straight. All four men figure prominently in Martin's 1949 lacrosse plans.

Intramural Swimming Meet Will Be Held Wednesday

Finals of the intramural swimming meet will be held at Alumni Pool next Wednesday evening beginning at 7:30 p.m. The eliminations in the various events began last night and will continue through tonight, tomorrow, and Monday evenings. The intramural swimming cup will be presented to the winning team.

Mass. Coaches Will Meet Here
Dever, Julian, Donelli To Address Mentors

At the invitation of the MIT A. A., the Massachusetts State Coaches' Association will hold its annual spring meeting at Tech tomorrow. The meeting will be held at 10:00 a.m. and will be followed by a dinner at 1:15 p.m. in the Graduate House.

Governor Paul A. Dever will be the featured speaker at the dinner meeting. Other speakers will be Ivan Geiger, Director of Athletics, Dean Burchard, and Belden Bly.

George Lopez, President of the A. A., will be among the speakers at the morning meeting. The principal business of the meeting will be several clinics to be held on various sports.

Among the notables who will take part in the clinics are Alvin "Dogie" Julian, coach of the Boston Celtics, Buff Donelli, BU football coach, Butch Jordon of Harvard, and Stuffy McInnis and Warren Berg, baseball mentors at Harvard and Tech, respectively. Oscar Hedlund of Tech and Jaakko Mikkola of Harvard will speak at the track clinic.

Baseball Squad Trimmed to 30; Schedule Released

Starting their second year of varsity baseball since the war, Tech's ball players have been working out in Rockwell Cage for the past two weeks under the watchful eye of their new coach, Warren Berg. The squad has been cut to thirty men, and Berg plans to trim the roster to eighteen before the season's opener on April 13 against Wesleyan.

This spring will see the Engineers playing an extensive thirteen-game schedule against teams from all over New England. Nine of the games will be played at home, which means plenty of good baseball for Tech fans during April and May.

Tech Skiers Score In NH; Smith Hurt

Racing against the best competition in the East, Tech's Jim Reid finished 20th in the Eastern Downhill skiing races last Saturday at Pinkham Notch, N. H. Other Engineer finishers were Knut Kloster, Jack Bent, and Henrik Bull, who took 33rd, 43rd and 65th in a field of over 70 entries.

The races were marred by a bad accident which befell Per Smith. Smith went off the trail in an icy spot and went spinning into the woods, breaking both his legs. He is now resting in North Conway Hospital.

In the slalom championships held on Cranmore Mountain Sunday, Kloster finished 17th and Bent 21st.

Marshall Captains Team

The chief loss from last year's club captain was Danny Harms, a fine catcher and the team's sole .300 hitter. Heading the list of returning veterans is captain-elect Lloyd Marshall, who was one of the pitching mainstays of last year. Other proven veterans are third baseman Joe D'Annunzio, catcher Gerry Walworth and outfielders Barney, MacMillan, Hogan, and Gushee.

Among the promising sophomores on the squad are catcher Gene Lubarsky, lefthanded pitcher Stan Moulton, shortstop Frank Jacobanis and outfielder Peter Philliou. Lubarsky and Moulton have looked particularly impressive in the cage to date, but it is still too early to make any definite statements about the squad. When the weather turns milder and the team goes outdoors, the boys will have a better opportunity to show their talents.

Handicapped Last Year

Last year's diamond team played eight games, winning two and losing six, despite the handicaps of lack of season practice time, a very poor field, a coach with very little coaching experience, and an unknown group of players who had never played together before.

This year, however, the situation is much brighter. Rockwell Cage gives the squad a chance to get into shape before the start of the season. The new baseball field being completed on Briggs Field should be a great improvement over the field near Cottage Farm Bridge which the team was forced to use last year. And Warren Berg, beginning his first season at the helm of the Engineers, is not lacking in experience, having coached the Harvard freshmen for the past three seasons, turning out some successful teams.

AA CONTINUES DRIVE FOR OLD EQUIPMENT

The Athletic Association's drive to collect used sports equipment will continue through next Monday, March 21. All equipment collected will be sent in the name of MIT to a European technical school.

Students may donate any old equipment by bringing it over to Briggs Field House, or by depositing it in a special box located in the Information Office.

Tech Show

(Continued from Page 1)

the scenery, also sings some of the show's feature songs.

Everybody who saw "Charley's Aunt" will readily recognize the philosophizing "Old Prospector" as Bob Abelson. Bob directed the show and is a dynamic force behind all the rehearsals.

El Dico, the fabulous gambler of Pancho Pancho who only collects 48.2 per cent of the total income of Pancho Pancho, is played by Dennis Allegretti. His competition for the control of the town is in the

form of the roly-poly General Miguellos played by Mariano Romaguera who is right at home in his own environment.
