

Now Ashdown House

Graduate House renamed to honor Prof. Ashdown

Dr. Avery Allen Ashdown, formerly the Master in Residence of the MIT Graduate House, will see it renamed Ashdown House, in his honor, June 14.

The Graduate House Executive Committee announced yesterday that the house would be named after the Professor Emeritus of Chemistry, who was Housemaster from 1933, when the graduate residence was opened, until 1962.

He was the first faculty resident in an MIT dormitory, thus establishing the present dormitory housemaster-tutor system.

Dr. Ashdown organized the first on-campus graduate housing at the personal request of the then President Dr. Karl Taylor Compton of MIT. The first Graduate House was located in the Faculty Houses, now known as Senior House.

In 1937, when graduate enrollment was increasing rapidly, he was instrumental in MIT's purchase of the present Graduate House. He supervised its renovation and lived there as master for 25 years. The building was the former Riverbank Court Hotel, and its master's suite was for some time the home of the Pres-

Dr. Avery Ashdown

ident of the Harvard Trust Company.

In his more than thirty years of association with graduate students, he has witnessed an increase in graduate enrollment from about 350 students in 1933 to about 3,500 today. The Graduate House now provides quarters for some 450 students.

Dr. Ashdown was born in North Collins, New York, in 1891, and received his masters degree in 1916 at the University of Rochester. In addition he was Acting City Chemist of Rochester in 1919, as well as an instructor at the University for four years. He received his Ph.D degree from MIT in 1924, having held the Institute's distinguished Grasselli Fellowship.

Queen contest

The finalists for the Spring Weekend Queen contest will be chosen by a general undergraduate election which is in progress and will continue through this Friday.

Voters can register their choice in a booth in the Lobby of Building 10. They will choose from among the pictures of dates submitted by MIT students attending Spring Weekend.

Those dates whose pictures receive the six highest voting totals will be designated as finalists, and will be announced in next week's The Tech.

The Spring Weekend Committee will then choose a winner from these six.

Banquet marks changeover

Bill Byrn received formal recognition as the new Undergraduate Association President at the Fourth Annual Incomm Change-over Dinner at The Graduate House Campus Room, Tuesday, April 6.

He presented a gavel to Bill Samuels, the retiring UAP. The gavel was inscribed with the words, "Institute Committee Chairman." Byrn also spoke briefly, placing great emphasis on the Student Center, which will open next fall. He expressed his anxiety "to get to work" on this project.

Presidential address

Dr. Julius Adams Stratton, President of the Institute, spoke at the Dinner. He mentioned that it is important to understand the role of students and administration in the University, and cited a recent conference of university presidents in Brazil, at which this topic was discussed.

Referring to the recent events at the University of California at Berkeley, he stressed that "in order to have fruitful constructive relations, we must clearly define and identify different areas of responsibility." Dr. Stratton went on to designate three such areas of concern: areas where students have full authority, areas where students have no authority, and finally areas in which students' advice should be valued by the administration, with whom the final decision rests.

The President made a point of "reaffirming a profound belief in the necessity of student government," and noted the importance of free channels of communication among the faculty, administration, and student government.

The President concluded by

Photo by John Torode
Bill Byrn, new UAP, (left) and Bill Samuels, retiring UAP, (right) address combined incoming and outgoing Institute Committees at change-over dinner sponsored by the Deans' Office at Grad House, Tuesday, April 6.

stating that we "have come a long way in working out definitions for the above areas of responsibility."

Dean Wadleigh speaks

Dean Kenneth Wadleigh of Student Affairs pointed out two specific areas of concern which he feels are imminent. Off campus, the Dean would like to see more encouragement directed towards responsible student involvement in large problems. Examples of this are the National Civil Rights crisis, the War in Viet Nam, and the improvement of the nearby Boston Community, with students offering assistance in various areas.

On campus, the Dean mentioned that next year a new Freshman curriculum will take effect, and student help will be needed to

encourage the new freshmen and counsel them in course selection, which will be more varied than it has been in the past.

ME Open House set for tomorrow

The Department of Mechanical Engineering will hold an open house for all freshmen and undesignated sophomores tomorrow from 3 to 6 p.m. in the Engineering Projects Laboratory, Building 3.

The open house will give the students an opportunity to meet some of the staff members of the department, to learn about opportunities in the field of mechanical engineering, and to see some of the projects presently being undertaken by the department.

The less academic side of the open house will include refreshments and a contest based on engineering judgment.

TSE elects Perritt to president's post

At a meeting of the board of directors of Technology Students Enterprises, Inc., Wednesday, April 7, Hank Perritt '66 was selected as President for the new year.

Also elected at the meeting were Terry Vanderwerff '66 and Bill Roeseler '65 as Vice-Presidents and Paul Branstad '66 as Treasurer.

Perritt, who is past President of the Class of 1966 and is President of Sigma Alpha Epsilon, discussed some general plans for TSE for the coming year. At present the organization provides for student entrepreneurship activity in managing charter flights, dormitory laundry service and magazine concessions. Plans for the coming year include investigation of airline ticket sales and closer cooperation between TSE and other student service groups.

Perritt indicated concern with the lack of information available to most MIT students about the opportunities for their involvement in TSE and the services available. He said the coming year would see a stepped-up advertising campaign in addition to exploration of new opportunities of service to the MIT Community.

Jr. Science Symposium held last week at Tech

Photo by John Torode
Dr. Hans Teuber, head of the department of psychology, addresses high school students and teachers at the third annual Junior Science Symposium. About 100 students and 50 teachers attended the two-day program here Thursday and Friday.

2200 at Carnival

Phi Delt's win first place

by John Corwin

Alpha Phi Omega awarded first prize to Phi Delta Theta Fraternity last weekend for the outstanding booth at the APO Carnival Saturday night.

The booth drew 1566 tickets, followed closely by the Alpha Epsilon Pi booth, which drew 1560 tickets.

The billiards course, organized by the Graduate Student Council, was voted the most original booth.

The Baker Frosh Council was victorious in the Ulysses S. Grant Memorial Beer Can Stacking Contest. The other three competing groups were disqualified for miscellaneous reasons.

The Carnival received a gross of \$1650 from an estimated 2,200 visitors. It is interesting to note that this year APO gave a 5c refund on each 10c ticket to the group sponsoring the booth which drew the ticket, as opposed to a 3.3c refund last year. APO felt that this policy resulted in more and better booths at the Carnival.

Harry Otaguro '67 was selected by APO to organize the Carnival, and he was in charge of its successful execution.

Karen Henry, MIT '67, was crowned Queen of the Carnival. A crown was presented to her by Frederick G. Fassett, Dean of

Residence.

Among the booths at the carnival were an egg-throwing contest by Sigma Nu, a student-dunking by Zeta Beta Tau, a car demolition by Delta Upsilon, a beer-can crushing exercise by Baker House, and a hat-tossing contest by Theta Delta Chi.

Photo by Bill Bloomquist
Dean Frederick Fassett crowns Karen Henry '67 Queen of the 1965 APO Carnival Saturday night at Rockwell Cage.

Course drop date

M. Bryce Leggett, Executive Officer of the Institute Committee on Academic Performance, has issued the following announcement concerning dropping subjects:

"May 7 is the last date upon which an undergraduate student may cancel a subject for which he is registered simply by the filling of a Registration Correction Card approved by his Faculty Counselor. After that date a petition to the Committee is required."

The Committee will allow such late cancellations only in the case of extenuating circumstances. The fact that a student is failing is not considered a valid reason for a late cancellation."

PRC to organize at next meeting

There will be an organization meeting of the 1965-66 Public Relations Committee at SAE, 484 Beacon Street, at 3 p.m., Sunday, April 18. Discussion of projects and the appointment of subcommittees will be the main orders of business.

Current PRC projects include the "yellow pages" of publicity information, the "social calendar," the "Freshman Picture Book," an introduction to the Student Center to be written for "The Tech," and feedback of student opinion to the Publications and Public Relations Offices to help update the MIT public image.

People interested in the problems of communications, publicity, advertising, writing, and public relations are most urgently needed. All interested Freshmen and sophomores are urged to attend. Further information may be obtained from Ralph Schmitt, PRC Chairman, X3782.

Inscomm selects Subcommittees

Inscomm conducted elections Sunday night for Student Center Committee members, Secretariat Division heads and Judcomm Secretary in the Vannevar Bush Room.

Elected as Senior Members of the Student Center Committee were John Montanus (PGD), incidentally Editor of The Tech, Gary Schliekert (Burton), and Rob Taylor (SAE).

The newly elected Junior Members are Frank March (Burton), Bill Flor (LCA), and Ted Nygreen (SAE).

The Secretariat Division Heads are Gary Garmon (PGD), Tom Newkirk (DU), Marty Golder (SN), and Gerry Tomanek (BTP).

Benjamin J. Gikis '66 was elected Secretary of the Inscomm Judicial Committee.

Sjostrom aggravated by abuse of MIT name

R. L. Sjostrom, president of the Sjostrom Automations, Inc. and an alumnus of MIT, has written 'The Tech' concerning an abuse of the good name of MIT in an advertisement for the Morse Chain Company which appeared in 'Business Week'.

The ad which raised Mr. Sjostrom's ire stated that the Ithaca, New York chain company trained its distributors at 'MIT' several times in large letters. The ad did state once in very small print that 'MIT' stood for 'Morse Institute of Technology.'

Over 23,000 attend Open House

By Sue Downs

Jay Hammerness, assistant to the dean of student affairs, announced that over 23,000 people attended MIT's Open House last Saturday.

Henry Lichstein '65, chairman of the Open House Committee, added that Open House was highly successful in improving the image of MIT: "Not only did the guests learn of the breadth and diversity of MIT, but also the students and faculty had a chance to see what the various departments do." Over one hundred guides were on hand to give guided tours, and lectures and displays were presented by the various departments.

Prizes of fifty dollars each were given to three of these exhibits. The Judges Prize for Showmanship and Dramatic Flare was awarded to Phi Lambda Upsilon for its Chemistry Magic Show. Open House Awards for Special Distinction were awarded to the Engineering Project Lab of the Mechanical Engineering Department for the clarity and ingenuity with which a wide variety of engineering projects were presented to the public and to the Political Science Students for their imaginative and sustained effectiveness of their presentation of an international relations game of major scope.

In addition to these prizes, Eta Kappa Nu, the electrical engineering honorary society, and the E. E. Student Faculty Committee awarded two twenty-five dollar prizes for the best displays in the E. E. department's exhibit. Paul Eckstein '66 and Chuck Holdaway

Photos by Bill Park

Techmen display the wonders of science technology to the amazed public at MIT's Open House last Saturday. Official estimates place attendance at over 23,000 area residents. All departments designed exhibits designed to interest the public.

'66 won these awards. Holdaway designed and built an elaborate "nim" playing computer and Eckstein demonstrated a post code modulation system. Honorable mention and five dollar awards went to Marty Crone '66 and Bruce Barron '67.

Electronics thwarts would-be lovers near British Columbia girls' dorm

By Jeff Trimmer

For those of you who have made the weekly dash to the wilds of Wellesley in order to make the 1:00 am or 2:00 am deadline, we might point to the situation at the University of British Columbia. It seems that the new Totem Park Girl's Dorm is surrounded by an eight foot wall with spotlighted grounds on either side of it.

The dorm also has a very effective burglar alarm, and the grounds are crawling with sensitive microphones. These are all combined to confound the would-be sex degenerate.

But the situation is further confused to frustrate those of you who might be inclined to sit and

"talk things over" at the door before bidding a fond farewell to your date. A girl has four seconds from the time she and her date get to the door (as indicated by the microphones) to get inside without triggering the burglar alarm. As the California Tech noted, "It looks like the big thing this year at the university is going to be a new and more exciting form of 'Beat the Clock'."

Back in February we reported a new college fad — that of shower taking. Well, a new record has been reported at the University of Utah. A frosh engineer set the record in a two-by-four foot shower by splashing for 75 hours and 24 minutes. The shower left his skin wrinkled like a dried prune,

and he had to be rubbed with vaseline every two hours.

Emerging from his sanitary venture, he was met by cameras, reporters, a horde of students, and an irate telegram from his parents.

The Minnesota Daily, newspaper of the University of Minnesota, printed a letter from some rather irate young ladies. It seems the paper ran an article describing one of the women's dormitories there, Sanford, as "the most active building on campus." These girls, who call themselves the VIRGINS (Very Irritated Residents, Going Insane Nightly at Sanford), took exception to the article, and proclaimed that Sanford was the "most outmoded and Victorian place in the university community."

As they wrote, "Sanford is the (Please turn to page 5)

John Lauritzen wanted further knowledge

He's finding it at Western Electric

When the University of Nevada awarded John Lauritzen his B.S.E.E. in 1961, it was only the first big step in the learning program he envisions for himself. This led him to Western Electric. For WE agrees that ever-increasing knowledge is essential to the development of its engineers—and is helping John in furthering his education.

John attended one of Western Electric's three Graduate Engineering Training Centers and graduated with honors. Now, through the Company-paid Tuition Refund Plan, John is working toward his Master's in Industrial Management at Brooklyn Polytechnic Institute. He is currently a planning engineer developing test equipment for the Bell

System's revolutionary electronic telephone switching system.

If you set the highest standards for yourself, both educationally and professionally, we should talk. Western Electric's vast communications job as manufacturing unit of the Bell System provides many opportunities for fast-moving careers for electrical, mechanical and industrial engineers, as well as for physical science, liberal arts and business majors. Get your copy of the Western Electric Career Opportunities booklet from your Placement Officer. And be sure to arrange for an interview when the Bell System recruiting team visits your campus.

Fifty-eight faculty promoted

Provost Charles H. Townes announced Friday that the Executive Committee of the Corporation had approved the promotions of the following members of the Faculty. The promotions will be effective July 1.

In Aeronautics, Judson R. Baron, Jack L. Kerrebrock, Wallace E. Vander Velde, and H. Philip Whitaker were promoted to professor.

Ross H. Smith became a full professor of Athletics.

In Chemistry, E. Lee Gamble, Irwin Oppenheim, and Dietmar Seyferth were named full professors.

In Chemical Engineering, Robert C. Reid was promoted to full professor.

In City Planning, Bernard J. Frieden was named associate professor.

In Civil Engineering, Peter S. Eagleson and Frederick J. McGarry were promoted to professor; Ronald T. McLaughlin to associate professor.

In Economics, Richard S. Eckaus, Franklin M. Fisher, and Myron Weiner became full professors.

In Electrical Engineering, Alan H. Barrett, Fernando J. Corbato, George W. Pratt, Jr., and William W. Seifert were named full professors; Jack B. Dennis, Fred-eric A. Morganthaler, Robert P. Rafuse, and Harry L. Van Trees, Jr., were elevated to associate professors.

In Humanities, Bruce Mazlish became a professor. Walter F. Urbach, Jerry A. Fodor, and Jerold J. Katz became associate professors.

In Management, Donald C. Carroll, Geoffrey P. E. Clarkson, Gordon M. Kaufman, and Edward B. Roberts were named associate

professors.

In Mathematics, Sigurdur Helgason, Arthur P. Mattuck, Franklin P. Peterson, and Gian-Carlo Rota were promoted to full professors. Christopher Hunter and Alan Toomre became associate professors.

In Mechanical Engineering, Nathan H. Cook was promoted to full professor; Ali S. Argon, Dwight M. B. Baumann, S. William Gouse, Jr., Philip G. Hill, and Edward F. Kurtz, Jr., were promoted to associate professors.

Edward S. Kline became a full professor of Modern Languages. In Naval Architecture, Ernest G. Frankel was promoted to associate professor.

In Naval Architecture, Ernst P. Gyftopoulos and Norman C. Rasmussen became professors. Kent F. Hansen became an associate professor.

In Nutrition, Leo Friedman and Paul M. Newberne became full professors. Louis C. Fillios and Gerald N. Wogan were promoted to associate professors.

In Physics, John G. King, George B. Benedek, and George W. Clark were made full professors. Richard H. Lemmer became an associate professor.

In Psychology, Stephan L. Chorover was promoted to associate professor.

Boston faculty discuss facets of Vietnam

There will be a sequence of lectures by faculty members of colleges from the Greater Boston area tonight on the general topic of Vietnam. The program will begin at 7 p.m. at Lowell Lecture Hall, Harvard University and will continue until 3 a.m.

Some of the speakers will be Dr. Harold Isaacs, Research Associate, Center for International Studies, MIT, who will speak on "The Beginning: 1945 and After"; Prof. John K. Galbraith, Paul M. Warburg, Professor of Economics, Harvard, whose topic of discussion will be "Vietnam: The History and Options"; Prof. Lucian Pye, Professor of Economics, MIT, who will speak about "Social Change and Political Development"; and Prof. Philip Morrison, Professor of Physics (visiting), MIT, whose topic is "The Response in Washington."

Additional Speakers include Dr. Mark Mancall, Research Fellow in East Asian Studies, Harvard; Professor Heinz Lubasz, associate professor of history, Brandeis; Professor Benjamin Schwartz, professor of history and government.

SWANK, NEW YORK — SOLE DISTRIBUTOR

Impressions of the weekend

Usually there is an eerie stillness in the halls of the Institute on Saturdays; the corridors have a hollow dullness in their twisting reaches, and it is hard to believe that the central building is really the heart of the world's foremost, fastest-moving scientific institution.

Last Saturday, though, the tranquility of the school was shattered as nearly 25,000 people came to see for themselves just what is this complex enigma called MIT. Perhaps many of them left more confused than when they had come; but most took with them a feeling of the aims, the achievement, and the dedication which even the students and faculty find it almost impossible to explain.

They took with them memories of Hans-Lukas Teuber, head of the Department of Psychology, demonstrating the illusion of vision, or of earnest young freshmen explaining and duplicating some of the wonders performed by "Doc" Edgerton with his strobe apparatus. They marveled at graduates playing political games, and sophomores analyzing RNA. They laughed at signs advertising "real live coeds" serving "refreshments."

Later that evening, visitors (including a Life photographer) watched Techmen enjoying "A Night of Rebelry." Most seemed totally unaware of the solemnity of the occasion, and concentrated more on dunking the UAP than celebrating anything. Other booths offered opportunities to "think like a hamster" as it crawled into colored holes, or throw eggs at leering students, or to vent frustrations on an automobile with a sledgehammer.

The whole day may have seemed confusing to visitors, but then nobody else understands it either. It was fun, but useful; half-serious, half-humorous. Somehow it reminded us of the recent attempts of national magazines to explain what college is all about; the more you see of it, the harder it is to categorize neatly.

Fortunately, nobody at MIT particularly wants to be categorized. One of the freedoms we enjoy is the freedom from simplified, pat classification. We are not all Joe College, or beatniks, or civil rightists. The important things we share in common, our aims, our responsibilities, our standards of excellence, are no restriction on the development of our individual personalities.

We hope our guests did get some inkling of what makes an MIT man; the effects of quality were apparent, at least. But those who expected to find a typical Techman must have been disappointed. The success of the weekend is due in part to the cause of this disappointment: an attempt to show, in all its kaleidoscopic complexity, the world we attempt to cope with as students of MIT.

by Chuck Kolb

27. What does the average Techman wear? Do you conjure up a picture of dirty tennis shoes, grubby levis, grungy sweatshirts and a three days growth? Are you going to be surprised when you see next September's issue of Esquire Magazine.

For some reason, known only to the editors of Esquire, MIT was chosen as the site of a photo article showing the world what next fall's well dressed college men will be wearing. Needless to say, Esquire provided the clothes; while the Public Relations Committee of Inscomm provided the handsome, all-American boy scientists to model them.

Photographers from Esquire shot pictures of our fashion plates at various locations around the Institute Thursday through Sunday last week. Models were from SAE, ICA, DTD, AEPi, DU and Baker House.

28. MIT has been saved; saved that is from the spectre

of student riots and demonstrations over the censorship imposed by Activities Council. It seems, at least according to a small group of grad students, that the student body was about to rise over the fact that student political groups could not post notice of rallies or demonstrations on the Secretariat bulletin boards in the main Institute.

However, Activities Council, bowing under the threat of 'Berkley,' voted Friday afternoon to allow recognized student groups to advertise mass demonstrations on the bulletin boards.

29. President Stratton reaffirmed MIT's long adherence to the principle of equal opportunity for all by signing a 'Plan for Progress' statement pledging a continued policy of non-discrimination last week. The agreement is with the President's Committee on Equal Opportunity. MIT is the first university in Massachusetts to sign such a pledge.

Unsigned editorials in The Tech are the opinion of The Tech's Board of Directors, not that of MIT. The Tech welcomes letters from its readers. Space permitting, such letters will be printed in whole or in part, if deemed by the editor to be of sufficient interest or benefit to the community. Brevity increases the chance of publication. Anonymous letters will not be printed, but names will be withheld upon request.

With thanks

The renaming of the Graduate House after Professor Avery Ashdown is a fitting tribute to a life of service to the MIT community. Even after his retirement, Professor Ashdown is a familiar figure in chemistry lectures and labs and at his daily workout in the Alumni Pool.

The activity of such a man, in our modern, work-avoiding world is a fine example to students and faculty alike. This example will be preserved by naming in his honor the residence where, as its Master, he contributed thirty years of his labors for the graduate students.

Epilogue

The banquet on April 6 was the final bow for the leaders of the class of '65, marking the end of nearly four years of hard work and considerable achievement. The banquet singled out the members of Inscomm, who in the past year have been faced with the extensive reorganization as well as the usual problems of student government.

Certainly special thanks are due UAP Samuels and his Executive Committee, and also the chairmen of the Student Center, Public Relations, and Educational Policy Committees in a year of special challenge. But other leaders, past and current, and indeed the whole class can look with satisfaction on a college life full of action in and out of the classroom.

The new Inscomm, and especially the class of '66, has a formidable task ahead, to follow up the beginnings made by their predecessors and establish a firm policy under the new government and in the new Student Center. It is vital that next year begin in the right spirit, that the changes in both academic and extracurricular life be adequately prepared for. The '65 leaders have started the fight against apathy; as their successors continue, we hope the men who started much of the action can have the satisfaction of seeing it effectively carried out.

Inside Inscomm

ISC Chairman elected; budgets in preparation

By Bill Byrn, UAP

Varouj Aivazian '67 of Armenia was elected chairman of the International Students Council last Thursday by a vote of that group. The entire membership of the Institute Committee is now chosen.

The budgets and general program of the various subcommittees will be worked up in the next few weeks. Accordingly, any of you who have ideas or programs that you feel should be included in the plans of the Public Relations Committee, the Student Committee on Educational Policy, the International Students Council, etc., I am sure that the chairman of the committee will be glad to hear them.

Jim Puis '67, president of the Young Republicans, was sent to a conference at Fordham this past weekend, sponsored by the United Student Governments of the USA, a new group which is in competition with the old National Student Association. He will report to the Institute Committee some time in the future about the possibility of MIT membership in the group.

There will be a meeting of all persons wishing to hear a detailed description of the facilities in the Student Center on the 28th. The next day a meeting will be held to schedule Kresge and the Student Center.

The old and new Student Center Committees and Inscomm will tour the Student Center this afternoon at 4:30, leaving from Kresge.

The next meeting of Inscomm will be held this Sunday at 7:30 pm. Place of the meeting will be announced via the bulletin boards. The plans for Spring Weekend are going along smoothly. New additions are being made to improve the weekend and distribute the profit to those attending.

We are still looking for delegates to the Boston University Symposium on birth control. Delegates can attend without charge on the 23rd and 24th of April.

Members will be needed for the Dedication Committee to plan the Student Center ceremonies. Elections will be handled by the Executive Committee.

Letters to The Tech

Tickets again
To the Editor:
Again this week the Humanities Department has mismanaged the distribution of tickets of its lectures. The New York City Ballet affair irritated those of the MIT student body who had access to only several hundred tickets. The ticket distribution arrangements for "Waiting For Godot" were virtually unpublicized before vacation; the posters that eventually came out with the statement that

tickets would be available after Wednesday noon were at best misleading. By Wednesday, there were perhaps fifty tickets available to those who relied on the posters.

The system for distribution was that a professor in the Department could get tickets for his students, yet those professors outside the field of literature did not necessarily have tickets and many upperclassmen in other fields were cut off.

Neither the play nor the ballet had any direct relation to any particular course. If they had, seats should have certainly been available to those involved. If the intention was to offer the lectures to those in humanities, some free distribution within the department should have been organized; the remaining tickets should have been given away publicly so that interested students would have a reasonable chance to attend the lectures. Since the lectures were

SYSTEMS ENGINEERING OPPORTUNITIES FOR NEW GRADUATES

MITRE works on the basic design and general system engineering of complex information, control, sensor, and communication systems for the United States Government. An important part of its mission is the development of new techniques in these areas and advancement of the general technology.

openings are available in:

COMMUNICATIONS—for work on the engineering of communication networks, range instrumentation, tactical air control, and survivable communications.

SENSOR SYSTEMS AND TECHNIQUES—to support theoretical and experimental programs on advanced radar and optical detection and tracking systems. Work includes feasibility and techniques analysis, systems synthesis and performance evaluation.

NATIONAL MILITARY COMMAND SYSTEM—for systems analysis and feasibility studies, communications systems analysis, systems design, integration, and design verification.

COMPUTER PROGRAMMING TECHNIQUES—development and support of monitors, compilers, real time simulations, time sharing systems, etc.

TACTICAL SYSTEMS—men with interest in tactical, light-weight equipments for surveillance, communications, data processing and display... system test planning and evaluation and operations analysis.

SYSTEMS ANALYSIS—men with interest in military systems or operations analysis with a background in physics, mathematics, operations research, or industrial management.

If you have or will soon receive a degree in electronics, mathematics or physics, and have done well academically, contact MITRE. Write to R. J. Seamans, Supervisor, Professional Placement, The MITRE Corp., Box 208, Dept. CNE, Bedford, Mass. MITRE also has openings in Washington, D.C.

THE
MITRE
CORPORATION
An Equal Opportunity Employer

MITRE is in the design and development of command and control systems. MITRE was established in 1958 to serve only the United States Government. An independent nonprofit corporation, MITRE is technical advisor and systems engineer for the Electronic Systems Division of the Air Force Systems Command, and also serves the Department of Defense, the Federal Aviation Agency.

27 schools represented

Student Services Conference Held

From as far south as the several universities in Washington, D.C. and from as far west as the University of Illinois, representatives from 27 universities gathered in the Boston area this last weekend for a Student Services Conference.

MIT was represented by the Social Services Committee, the largest, though youngest, service group on campus. The conference was sponsored by the Student Action Movement of Boston, a service corps of 6 Boston churches, by the Wellesley Service Organization, and by Harvard's Phillips Brooks House; it was held at the B.U. Union.

The topics of the speakers, panels, and discussion groups were chosen to touch on the basic problems service groups encounter. The topic for Thursday evening was education. Most service groups put emphasis on tutoring programs in their work. Speakers included Harvard and Yale faculty members and MIT SSC's Mike Efron '65, "Tutoring Plus"

project chairman. Monday morning the discussion was on settlement houses, a social work institution peculiar to New England and the Chicago areas.

The speaker for the luncheon was Mr. Abrams Engleman, an expert on organization and administration of campus service groups. He stressed the need for students to have active university support and a strong expert advisory staff. Students can easily do more harm than good if volunteers go to work with good intentions as their only training.

Friday evening there was a presentation of a program for high school dropouts that was run last summer by the University of Pennsylvania in the city of Philadelphia. This program was well financed and carefully studied by the university, the President's Committee on a Domestic Job Corps, and the U.S. Office of Education. Saturday morning were presentation of actual projects by Yale's APO, Harvard's PBH work in a Cambridge housing project, and Columbia's SEER reading program. Afternoon discussion was on mental health work, and the evening speaker was Mr. Alan Guskin, a director of the War on Poverty's VISTA program, who spoke on the facts of poverty.

One result of the conference was the general impression that social work is truly a new frontier in light of America's millions

of poor. The federal government has entered in support of social action with money and a pool of the best professional experts. It is to be expected that college students are doing more work in the field of service, especially in urban centers.

College World...

(Continued from Page 3)

place where the modern young women of today are forced to wear skirts to evening meals; where no political affiliations may be publicly proclaimed; where no bikinis are allowed anywhere on the premises; where open-open houses are limited to about one per quarter; where the girls must wear skirts in the co-ed lounge (yes, we do occasionally admit men to our hallowed halls); where neither bathing suits nor short-shorts are allowed in the ront hall.

"In other words, one is expected to behave like a sheltered and protected young lady — a pose which is very difficult to maintain in this day and age. For those who, in spite of your article, still believe Sanford to be a quiet and staid establishment, we suggest that they visit our foyer some weekend evening at about 1:55 am, at which time they will be treated to a revelation of the true, suppressed personalities of some of our residents." Coeds, take heart.

Letters:

(Continued from page 4)

publicized throughout the Institute, a Building 10 "free-for-all" would have worked. The Lecture Series Committee and others have found the system workable and reasonably equitable. But from the last two lectures, the Humanities Department has earned more enmity than the distribution of twelve hundred seats among the student body should arouse.

Richard Engle, '65

'Godot' exemplifies modern, creative

By Jeff Stokes

This is the age of creative theater, and I'm not talking about haphazard improvisation. I'm talking about a medium in which playwright, director, actors and stage crew get together and work out a unified piece of art, democratically. Each department performs a creative act of its own, whereas in the past only the playwright was allowed to create. The poet dictated the piece, and actor, director and stage designer followed his instructions faithfully, the way an orchestra follows a sheet of music. Of course the playwright today is still responsible for the outline and for the philosophical message of his play, but he is not the only one to say how that message is to be conveyed to the audience.

Anyone who saw the Boston Theatre Company's production of Samuel Beckett's 'Waiting for Godot' at Kresge or in the Hotel Bostonian's miniature theater, will agree that it belongs to this age. Without the inflections, gestures, and gymnastics of the actors, without the simple but meaningful stage set, without the lighting effects, and without the overview of the director, Beckett's play

'WAITING FOR GODOT' a play by Samuel Beckett; directed by David Wheeler; cast: Paul B. Price as Estragon, Paul Benedict as Vladimir, Jerome Raphael as Pozzo, Joseph Hindy as Lucky, and Nym Cooke as the boy; presented at Kresge and the Hotel Bostonian Playhouse.

could have been dead and uninspiring; the author could not possibly have prescribed all the detail to which the production owes its crowning excellence; this had to come from the actors themselves.

Mr. Beckett would have gone out of his mind trying to write down in words every last genuflection and scowl, and director David Wheeler would have slipped out of his just trying to obey him. The tree, for example, was not described at all in the play, other than in the characters' mouths; in Beckett's preliminary description it is simply 'a small tree.' In the hands of set designer Alexander Pertzoff 'a small tree' took on a remarkable double symbolism apparently not intended by the author. And yet this symbolism does not depart from the overall scheme of the play, but rather, emphasizes its message. It could be argued that the lowly set designer should not meddle

Jerome Raphael, Paul Price, Di Di and Gogo, prattle aimlessly, benefiting in the Boston Theatre 'Waiting for Godot.'

with an author's creation, but is it meddling when the set man uses his inventiveness to further the effect desired by the playwright? Try to apply the principal of non-meddling to the actors, and it will fall apart. Without a great deal of originality on the part of the cast, the lifeless printed word could never be wrought into something plausible and captivating. On paper Gogo and Didi's relationship must sound pretty stilted, but Paul B. Price and Paul Benedict turn it into something sensitive and highly realistic, given the warped personalities of the characters.

The theater company, which normally works in the cramped quarters of the Hotel Bostonian, has shown that it deserves a larger theater, although perhaps not quite as large as Kresge. To those of us who sat up in back, there were times when Mr. Benedict seemed to be talking into his abundant mustache and, although we enjoyed the exquisite poetry of Lucky's thinking ('quoiquoiquoiquoi'), we missed most of its precious meaning. But

Harry Golden to present 'Only in America'; LSC to bring Jules Feiffer in May

The Lecture Series Committee will present Harry Golden, author of 'Only in America,' in Kresge auditorium at 8:00 p.m. tonight.

Mr. Golden is editor and author of the 'Carolina Israelite,' a sixteen page publication which is a compilation of his recollections on anything under the sun. Collections of these short essays have been reprinted in a number of books, the most famous being 'Only in America;' and 'For 2c Plain.' Both have spent considerable time as No. 1 on the best seller list.

Because of the publication of these books, the 'Carolina Israelite' has grown from an obscure magazine to one with a circulation of nearly 50,000. Mr. Golden's talk is entitled 'Only in America.'

The only other L.S.C. lecture this term will be given by Jules Feiffer on May 13 in Kresge Auditorium. Feiffer is the cartoonist originally of the 'Village Voice,' whose cynical cartoons have appeared in five books and are currently being published in 'Playboy.'

Peking Opera coming Saturday

The Rho Psi Fraternity, in collaboration with the Greater Boston Chinese Cultural Association and the Chinese Intercollegiate Council, is presenting the opera 'The Romance of Mu Kuh Fort' this Saturday, April 17 at 8:30 pm in Kresge Auditorium.

Peking Opera dates back to the Chiang dynasty when it was an entertainment much enjoyed by the royal court. Today it is still the most popular musical art enjoyed by the Chinese general public.

'The Romance of Mu Kuh Fort' is based on the famous saga of the Yang generals, and takes place in the eleventh century when China was fighting against the neighboring kingdom of Liao.

Tickets can be obtained by mail order from Chinese Opera 1965, 19 Irma Ave., Watertown, Massachusetts, or by calling UN 4-6900, ext. 2910. All seats are reserved and are priced at \$2.50 and \$4.00.

Tech Show '66 needs director, script, composer

With TECH SHOW '65 now a pleasant memory, a search for new talent for next year's show is now under way.

The managing board of TECH SHOW '66, along with faculty advisor A. R. Gurney, would like to encourage interested students to seriously consider how they might lend their talents to the perpetuation of the Tech Show tradition. Several persons instrumental in the '65 show are graduating, leaving many vacancies to be filled by talented members of the MIT community.

Those who are interested in writing TECH SHOW '66 are invited and encouraged to submit a scenario for consideration at the beginning of the Fall term. The

show to be produced will then be chosen by Prof. Gurney on the basis of these scenarios and discussions with the authors. Aspiring composers might also make plans for the Fall at which time they may meet with the author to discuss his show. The other positions in need of talented people are director, stage manager and crew, costumes and set crew, orchestra, and publicity men, as well as the actors themselves.

Sometime in the near future a meeting will be held to enable all interested students to meet with last year's staff to discuss the possibilities for the '66 show and the production of a musical comedy in general.

No, I was just thinking about what to give Sue. It's our anniversary.

2. You're not even married.

We've known each other three full weeks.

3. You give a gift every week?

We try to remember the important dates.

4. Isn't that overdoing it a bit?

Not when you're in love.

5. You'll be broke before you get to the altar.

Oh, we're very practical. Sue gave me a pocket pepper grinder and I gave her my B+ theme on Parental Attitudes Among the Arawak Indians.

6. If you really want to be practical, why don't you get a Living Insurance policy from Equitable—and give her security. That way, when you get married, you'll know that she and the kids will always be provided for if something should happen to you.

Swell idea. Now, what do you think she'd like for National Crab Apple Day?

For information about Living Insurance, see The Man from Equitable. For complete information about career opportunities at Equitable, see your Placement Officer, or write to Edward D. McDougal, Manager, Manpower Development Division.

Graduate crews beaten by Clark as early advantage folds in sprint

Both boats of the MIT graduate crew, rowing on a choppy 2000 meter course at Lake Quinsigamond, were defeated twice by a surprisingly strong Clark University Saturday, April 10.

In the preliminary race, the second grad boat, rowing at a steady rating of 29 was able to nose out Holy Cross and the Clark JV's for second place honors. The Clark freshmen had little difficulty with the harsh conditions and won by two lengths. Again in the feature race, the superior condition of the Clark crew prevailed. At the start, MIT was able to build a four seat advantage over Clark, Dartmouth lightweight, and Holy Cross.

However, Clark and Dartmouth soon forged ahead and steadily rowed away from MIT. At the 1500 meter mark the grad crew tried to muster a sprint, but this futile effort failed to close the gap, and the crew was soundly defeated by Clark and Dartmouth.

The boat consisted of bow—Adam Bell; 2—Bill Johnson; 3—Paul Blaiklock; 4—Paul Fine; 5—Ralph Kopperman; 6—Jean Balling; 7—Chuck Roth; stroke—John Barton; and cox—Chuck Wilbur.

The next race is April 24 at Amherst against BU, American International College, and the hosting college.

RADAR THAT SEES LIKE A FROG

Now there's a new radar system which, like the frog, can see everywhere without motion. It does three jobs simultaneously: searches the entire sky for missiles, pinpoints the location of targets already spotted, and sorts out real missiles from decoys. All in less time than it takes to blink an eye.

It's done by steering the radar beam

electronically, and is the result of development work for missile defense by the scientists of a GT&E subsidiary.

Producing a radar system as versatile as this is the result of the ever increasing emphasis on research by the GT&E family of subsidiaries—research that stands as our solid base for future growth.

Baseball squad drops two

Photo by Saul Mooslen

Erik Jensen '67 scores the first of MIT's three runs in the 13-3 loss to Wesleyan Saturday, April 10. Jensen scored from second on a single by Tom Bailey '66. Tech's other runs came on a two run homer by Roy Wittenbach '65.

By Jerrold Sabath

The Tech nine suffered two crushing defeats last week, losing to Boston College 20-1 and to Wesleyan 13-3. After a rather successful opening week, the team's record has slipped to 2-3.

Tuesday's game against Boston College found MIT the target of a three-hitter. Fifteen walks, two hit batsmen, and four errors gave the hard-hitting BC squad ample scoring opportunities.

The Wesleyan game featured a 360-foot homer into the tennis courts as well as a grand slammer; unfortunately, both were by MIT (vs BC).

Bicycle team forming; Squad needs coaching

Bicycle racing is developing great interest in many New England colleges.

Here at Tech, an interested body of men is looking for leadership on the faculty level, membership on the student level, and a manager to form a cycle team. If they can get more people interested in the sport, it will be possible to do some racing this Spring.

The team is organizing to race this Spring, and, with sufficient manpower, a club could form at the same time. There are about a dozen men at present who have expressed interest in learning about racing. The problem has been a lack of organization. If a coach or student manager were helping, they could begin racing soon.

If anyone is interested in any phase of cycling he should call Stan Brown, KE 6-1791 or Paavo Pyykkonen, d10353. Plans are being made for a trip April 19, so watch the duPont bulletin board for news.

Rugby team beats Fairfield 14-0; Second squad loses 5-3 decision

By Bob Sultan

The first team of the MIT rugby club demonstrated its strength Saturday by shutting out Fairfield U. 14-0, giving the team a record of 2 wins and 1 loss. The second team was defeated with a close final score of 5-3. Team Captain, Tom Van Tienhoven '66, described the first team as extremely good, and he hopes to get far with these top players. The two biggest tests will be this Saturday's game with the Boston Rugby Club and the Dartmouth game on May 1. Tom considers Dartmouth to be the top Eastern team. Both of these key games will be played at home. Captain Van Tienhoven pointed out that a number of newcomers to the team have been doing very

well. One of these is Murry Freeman from Australia who has shown himself to be an excellent player and is up there on the first team. Other promising newcomers are Buck Ogilvie, John Davis, and Mont Hubbard. Ogilvie scored the second team's only try in this Saturday's game. A try is worth 3 points, and if the conversion is made 2 points are added. The Coach, Professor Gordon Oates, describes the team as having great depth and strength made possible by the large turnout for the sport. Prof. Oates said that the quality of the rugby being played in Eastern schools is constantly improving. He added that the MIT team is playing excellent rugby and is becoming progressively stronger.

Meeting announced for intramural golf

The 1965 intramural golf tournament will take place May 1 at the George Wright Golf Club. There will be an important meeting for living group athletic chairmen or team captains on Wednesday, April 21 at 5 pm in the AA Manager's office of Dupont. It is imperative that each interested group be represented, so that rules, eligibility and starting times can be discussed.

in a new Chevrolet

'65 Chevrolet Impala Sport Coupe

'65 Chevelle Malibu 4-Door Station Wagon

'65 Chevy II Nova Sport Coupe

'65 Corvair Corsa Sport Coupe

If you've been sitting tight waiting for just your kind of car, with just your kind of power, at just your kind of price—wait no longer!

Chevrolet. It's a bigger, more beautiful car this year. Which is why that handsome silhouette could be mistaken for cars costing a thousand—even two thousand—dollars more.

Chevelle. This one's got lively looks, spirited power, a softer ride—and remarkable room atop a highly maneuverable wheelbase. No wonder it's today's favorite mid-size car.

Chevy II. No car so trim has a right to be so thrifty. But thrifty it is, with money-savers like brakes that adjust themselves and a long-lived exhaust system.

Corvair. Ask any '65 Corvair owner how it feels to drive a car with such easy steering, tenacious traction and responsive rear-engine power. And be ready to do lots of listening.

Heavies beat BU by length

By Chuck Hottinger

The MIT varsity heavyweight crewmen opened their season on the Charles River Saturday, April 10, with a decisive victory over a strong Boston University boat. It was the tenth annual win by the Engineers over the BU challengers, and quickly ended rumors of an unusually fast Terrier crew. The Tech Jayvees maintained tradition with an easy win over the Boston University JV squad.

Varsity Wins by length

The MIT varsity took an early lead of four seats in their 1 1/4 mile race with a solid stroke of 33, paced by Jim Falender '65. The BU boat settled down to 35 strokes per minute, and maintained the higher count most of the race. The Engineers had increased their lead to a full length at the Harvard Bridge, and slowly increased the gap to nearly 1 1/2 lengths at the half mile to go mark. At that point, the Terriers mounted a drive to catch the leading Tech shell by increasing their stroke to 36, while the MIT squad maintained their 33. BU moved to within 3/4 of a length, at which point Tech went into a final sprint at 38 strokes per minute. The Terriers maintained a count of 37, crossing the finish line nearly a full length behind MIT. Tech's winning time was a respectable 8:58.5, followed by the Boston University time of 9:01.6.

JV boat by three lengths

In an earlier race, the Tech Jayvees set the stage for the varsity match by soundly defeating the BU second boat. The Boston University JV squad was never in real contention after the start over the 1 1/4 mile course. MIT quickly moved to a 5 seat lead, understroking their opponents at 33, while BU settled down to a count of 35. The Engineers moved quickly ahead, achieving a lead of two lengths at the Harvard Bridge. Tech continued to forge ahead, leading by 2 1/2 lengths at the 1 1/4 mile post. MIT finished the race with a sprint at 36, while BU stayed at a count of 35, losing by about 3 lengths. Final time for the Tech JV boat

Photo by Gordon Olson

The MIT varsity heavyweight crew heads out for their race against Boston University last Saturday on the Charles River. Led by coxswain Jesse Lipcon '65 (far right) '65 and Capt. John Schilling '65 (second from left), MIT edged BU by a length.

was 9:14, leaving the Terriers in their wake with a final mark of 9:28.8.

Boat rigged Italian style

Saturday's season opener was of special note for many reasons. It marked the first race for the Tech varsity's Italian rigged shell. In this arrangement, the two and four man are on the starboard side, leaving port men at bow and three. Five and seven men remain on the starboard, while six and stroke stay on the port. The race also marked the first test of Coach Frailey's strategy of maintaining a higher stroke throughout the race. Even so, in both races, his squads were consistently overstroked by the losing BU shells. The race was also a big event for varsity coxswain Jesse Lipcon '65. His younger brother Eli, a sophomore at Boston University, coxed the losing BU varsity boat.

Both Tech boats required shuffling late in the week. Keith Stollenbach '66, regular stroke of varsity 8, was in Connecticut getting married, and was replaced by Jim Falender. A. K. Phillips '66 was missing from his seven seat in the JV boat due to illness.

3rd boat beats frosh

Earlier in the afternoon, the third varsity heavy boat rowed to a seven second victory in a time trial with the frosh light-

weights, avenging a previous loss the week before.

MIT Boatings

Varsity
Bow—Tom Rice '66; 2—John Schilling '65 (Capt.); 3—Sandy Blanchard '66; 4—Dave Waltz '65; 5—Robert Menzies '65; 6—Gregg Hancock '67; 7—Fred Eberle '66; Stroke—Jim Falender '65; Cox—Jesse Lipcon '65. MIT varsity: 8:58.5; BU varsity: 9:01.6.
Junior Varsity

Morash, Brown star

Trackmen defeat Colby

By Don Bosack

MIT's varsity trackmen topped Colby College 86-58 at Briggs Field Friday, April 9. The meet was the first of the trackmen's seven meet schedule.

Ken Morash '65, Sumner Brown '66, and Bob Dunlap '67 were Tech's leading scorers with two wins each. Morash took the pole vault with a 13' jump and went on to win the high hurdles in 15.8 seconds.

Brown won both the mile run and 800 yd. run with times of 4:33.3 and 2:03.6. Sprinter Dunlap took the 220 yd. dash in 22.8 seconds and the 400 yd. dash in 50.5 seconds.

The other Tech winners were Dave Osborne '67, 16 lb. hammer; Dave Carrier '65, broad jump; Joe Levangie '67, javelin; Rob Wesson, '66, two mile run; and Terry Dorschner '65, 440 yd. intermediate hurdles. Carrier also took a second in the triple jump.

16-lb. hammer—1. Osborne (MIT); 2. Callahan (MIT); 3. Carvelias (C) 15' 11".
Triple jump—1. Gilmore (C); 2. Carrier (MIT); 3. Ross (MIT) 41' 11".
Broad jump—1. Carrier (MIT); 2. Ross (MIT); 3. Cornia (C) 21' 1".
Shot put—1. Astor (C); 2. Barker (C); 3. Whitson (C) 36' 11/2".
Discus—1. Whitson (C); 2. Astor (C); 3. Barker (C) 126' 5".
Javelin—1. Levangie (MIT); 2. Ritter (C); 3. Ross (MIT) 163' 1".
Pole vault—1. Morash (MIT); 2. Keenar (MIT); 3. Dunn (C) 13'.
High jump—1. Aisner (C); 2. Young (C); 3. Jones (MIT) 5' 10".
Mile run—1. Brown (MIT); 2. Borchers (C); 3. Oliver (MIT) 4:33.3.
2-mile run—1. Wesson (MIT); 2. Oliver (MIT); 3. Cox (C) 10:11.6.
800 yd. dash—1. Brown (MIT); 2. Finkle (C) 57.0.

Sailors 3rd in regatta; Coast Guard captures Cup

By Chet Osborn

The MIT sailors placed third in the competition for the Boston Dinghy Club Challenge Cup at the Coast Guard Academy April 10 and 11. Tech had 185 points to the University of Rhode Island's 196 and the Coast Guard Academy's 198. Other contestants included the University of South Carolina, Yale, Dartmouth, Indiana and Princeton.

Cronberg MIT's A sailor

Sailing for MIT were Terry Cronberg in A division and Don Schwanz in B. Coast Guard pulled a wily old Yankee trick and put their best skipper, Tony Pettit, in B division, and had their second best skipper, Larry Ray, in A division. By this switch Coast Guard tried, with success, to salvage as many points as possible in A while picking up easy points in B. URI sailed Art Payne in A and Peter Green in B.

The races were sailed in a north wind on Saturday, blowing from 10 to 18 mph. Unlike the Charles River Basin, Coast Guard's Thames River has a significant effect due to current. When sailing against the current it is crucial to avoid the fastest parts of the river. By Saturday

night Tech was in the lead of the regatta with 120 points to Coast Guard's 109 and URI's 101.

Sunday morning brought south winds 10 to 15. Don Schwanz, sailing with a basketball injury from the night before, was caught over the line before the starting gun and had to restart, reducing him to last place. This was a turn in the tide for Tech. From that point on the MIT skippers regularly ended up on the side of the course away from the best wind, made tactical errors, and just banged the dinghy's for the rest of the regatta.

Next weekend the Tech team will be again competing on the Charles. Saturday and Sunday will see competition for the Owen trophy, and Monday Tech will sail for the Oberg Trophy.

Lacrossemen lose 8-7; Crush Holy Cross 11-2

By Neal Gilman

After losing to Middlebury, 8-7, on Tuesday, April 6, the MIT lacrosse team ended its five game losing streak by trouncing Holy Cross, 11-2 last Saturday. With this victory, the team's record now stands at 2-5.

In the first quarter of the Middlebury game, as in the other games, the team played very poorly. At first showing little spirit, the squad found themselves down 1-5 after one quarter, with Steve Schroeder '67 scoring the lone MIT goal on an assist from Art von Walberg '67.

Second quarter to MIT

The second quarter was all MIT. Pete Kirkwood '66 scored two and von Walberg one to put MIT back in the game 4-5. From then on it was a seesaw battle with MIT always one or two behind. Schroeder scored the last three MIT goals, two of which were assisted by Kirkwood, but they were not enough to prevent the 8-7 defeat.

Saturday, however, was a happier story. MIT had complete control of the game, only allowing Holy Cross two goals, and those in the last three minutes. Garland Taylor '67, starting as goal tender in his first varsity game, played extremely well, keeping Holy Cross scoreless during the three-fourths of the game which he played.

Schroeder, von Walberg star Schroeder again played well, scoring one goal while assisting four others, von Walberg scored a total of four goals. Loren Wood '66 scored three and assisted Captain Ron Mandle '65 for another. Dave Driscoll '65 driving in twice from the right corner mid-field line, scored both times, while Kirkwood assisted two others.

As a side note, Middlebury played Holy Cross the day after MIT's defeat, and outscored them only 9-5.

Frosh sports

Tennis team wins, 6-3

By John Kopolow

MIT's frosh tennis team looked very impressive in its first match of the spring, a 6-3 win over Browne & Nichols. In the first singles, Dennis Carlston put Tech out in front with a decisive 6-3, 6-2 triumph and Steve Deneroff followed up with a 6-4, 9-7 win. Carl Weissgerber defeated his opponent by a 6-3, 3-6, 6-2 count, and Bob Metcalf won 6-2, 6-4. The only Techmen to lose were Bill Carlson and Roy Shapiro.

The Beavers also fared well in doubles play. The team of Carlston and Deneroff won two 6-1 sets, and Metcalf and Carlson won 6-4, 7-5. Weissgerber and Shapiro were defeated in a very tight match, 3-6, 6-4, 6-8.

Crew

The freshman heavyweight crews raced against BU last Saturday but were able to win only one of three races. Over a distance of 1 1/4 miles Tech's first frosh boat finished only 5 seconds behind BU's first heavies, whose winning time was 9 min. 17.3 sec. The second frosh won their race in 9 min. 36.5 sec., but the third race saw BU's rowers win in a time of 9 min. 27 sec.

Under the same racing conditions last spring, both the first and second freshman boats were beaten badly by BU, the first by four lengths and the second by 3 1/2.

The lightweights fared much better against Tabor Academy. Even though MIT raced its #2 boat against Tabor's #1, and its #3 boat against Tabor's second, they still took both events. Rowing the Henley distance, the 2nd

frosh won in 5 min. 45.5 sec. and the 3rd frosh in 6 min. 34.5 sec.

Lacrosse

The freshman lacrosse team was soundly trounced by Governor Dummer in its first game of the season by a 12-4 score. The frosh certainly managed to hold their own both offensively and defensively in the first quarter, which ended in a 3-3 deadlock.

After that, however, their defense became leaky and their offense sluggish. Dummer continually kept the pressure on Tech's defensemen and, as a result, made four times as many scoring attempts as MIT. Julius Gutman was high scorer among the frosh as he fired two into the nets. The Beavers hope to even up their record this Saturday against Harvard.

Baseball

The frosh baseball squad also showed room for improvement last Saturday in dropping a 3-1 contest to Middlesex School. Complete lack of hitting was Tech's most glaring problem; not only did MIT fail to get a single hit, but of the 27 putouts made by Middlesex 24 were on strikeouts. Tech scored its only run in the 6th inning with the help of two infield throwing errors and a passed ball by the catcher, who let a third strike get away from him.

Starting pitcher Bob Kiburz came up with a sore arm after the very first inning and had to leave the game. He was replaced by Yoshiaki Moriawaki, who did an excellent job the rest of the way. The three runs he allowed were all unearned.

Netmen drop close 5-4 match to U. Mass; Petrick, Ruby impressive in doubles victory

By Mike Rodburg

The varsity netmen travelled to the University of Massachusetts on Saturday, April 10, and were defeated there in a closely fought contest, the outcome of which remained in doubt right up to the last point. The 4-5 defeat brings the varsity record to 1-5.

The conditions of the day were far more favorable — a strong wind was blowing and the Techmen found themselves on asphalt courts. Nevertheless, fine performances were turned in on both sides. Captain Bill Petrick, '65 in the first singles, won his match 2-6, 6-3, 6-1. Dave Chandler '66 played exceptionally well and came from behind to defeat a strong opponent, 3-6, 6-4, 6-4. John

St. Peter '67 likewise posted a win in the singles competition.

The first doubles team of Petrick and Paul Ruby '66 came on strong, as they have all season. This duo is one of the teams best assets, and they demonstrated this again Saturday with a 6-4, 6-4 win. The second doubles team of Erick Coe '67 and George Krauss '67 lost 9-11, 6-2, 6-2, and the score stood at four apiece. John St. Peter '66 and Doug Patz '65 performed brilliantly in a pitched battle to determine the day's victor. The first two sets were split and twice in the last set the score went to set point. UMass finally won the game 6-4, 4-6, 7-5, to take the match 5-4.
