SPREAD HELD INDOORS.

Rain Forced Class Day Spread into Rogers Library. Day Successful.

For the second time in the history of class day at the Institute the class day spread was held indoors yesterday. The inclement weather precluded all possibility of having the spread on the lawn.

Members of the graduating class, mothers and fathers, sisters and sweethearts gathered yesterday at two o'clock in Huntington Hall to hear the addresses and laugh at the stunts of the seniors.

Pres. Lawrence Allen opened the exercises with a short introductory speech presenting First Marshall John H. Leavell. The first marshall welcomed the guests and spoke of the life at the Institute. Mr. Leavell then introduced Donald G. Robbins, Class Historian and Statistician.

The class history and statistics were presented together in the form of a thesis. Starting off with a seriousness which promised a real thesis, there followed one of the most clever presentations of statistics ever given at class day exercises. The thesis was purported to be on the accurate determination of the action and reaction of the Class of 1907 and certain exterior reagents. The material used was divided up into various solutions. The first solution was a conglomerate mass of men in a certain amount of unity of purpose. This solution was first made up in 1903.

The chief reagents used were a

WORLD IS MORAL.

More so Than College, says Dr. Worcester to Seniors in Baccalaureate Sermon.

For spiritual and moral advice the seniors went Sunday afternoon to Trinity church, where the baccalaureate sermon was given by Rev. Dr. Elwood Worcester of the Emmanuel church. The seniors gathered in the rain upon Rogers steps a little before 4 o'clock and marched in a body.

Dr. Worcester spoke in part as follows:

"One of the most striking signs of our times is the labor it imposes on youth. Certainly the most significant spiritual fact in the past 50 years of our history is the development of that vast, graduated, complex system of education whose sole purpose is to train the minds and characters of the young. For this end no sacrifice is too great, no legitimate undertaking too costly. For this end our government, which ordinarily takes a somewhat parsimonious view of its duties to individuals, pours out its treasures like water. To this sacred cause come the princely gifts of individuals. The necessity of education is the one appeal that is not in vain.

Youth Made Longer.

"The years of pupilage have lengthened and the tasks devolving upon early life have grown heavier. We see signs of this everywhere in the tendency of all good colleges to raise their standards of admission, to lengthen their courses and

Technology won both singles and doubles in the eighth annual New England intercollegiate lawn tennis championships with J. I. B. Larned and W. B. Coffin as the Institute men to win all matches. Larned walked off with the singles, his preliminary matches coming easy, but in the finals he had to fight to beat his opponent Budlong of Brown. Larned and Coffin won the doubles.

On the first day Larned in the singles made a good start winning from Thompson of Williams in a lively two-set match, and removing Stearns of Dartmouth from the going in two love sets. Larned met the Wesleyan tennis crack on the second day in a match that was the feature of the day. It was a good match, interesting all the way, punctuated with some splendid rallies. Larned was the steadier and had more force, and his win was earned in straight sets.

Larned placed very accurately, using the ground stroke almost all the time. He was very sure on lobs, and his only fault was an unnecessary fluctuation in the first set.

When he overcame this weakness Larned began to win. White's backhand was unreliable and his best shot was a deep drive off the forehand. This, when it was in, was about sure of the ace, but it was too many times the cause of error to be reliable.

The first set was prettily played, and the men won own service until the fifth game, when Larned broke through and won off White, fol-

BROKE TWO RECORDS.

Dartmouth Wins. Tech Secures Fourth Place in New England Intercollegiates.

Surprising all spectators, and breaking two out of the three records established at the New England Intercollegiates on May 26, the Tech track team secured fourth place in the meet with twenty-one points, easily out-distancing Williams, her old rival, who finished fifth with only eleven.

Dartmouth won the meet very comfortably with forty-seven points, while Brown and Amherst ran a very close race for second place, the former eventually winning out with twenty-eight and a half points against the twenty-seven scored by her rival.

Udale's race in the two mile was the feature of the day. Starting in nineteenth place from the pole he was lost in the crowd during the first quarter, while Gallup of Brown, who drew the pole, took the lead. By the time the half-mile mark was reached, Udale had drawn away from the crowd and opened up a considerable lead. At the end of the mile he had increased this to fifty yards, doing the first half of the distance in 4 m. 57 sec.

From then on he maintained this lead. All the athletic experts looked on incredulously, and marveled that a Tech man should be able to run such a race. The general opinion was that it would be impossible for him to hold the pace. Udale, however, only lengthened his stride and began to set a faster pace for the second mile, holding it to the end, and finishing with a splendid sprint sixty yards ahead of Gallup. The time was 9 m. 52 4-5 sec., clipping 9 sec. off the New England Intercollegiate record established by Gallup at Tech Field two weeks previous. Greene of Brown was third and MacGregor of Tech won fourth place by a brilliant sprint at the finish.

The second record was broken by Gram in the semi-final of the 220-yard dash when he defeated

INCREASES NOTED.

At the annual meeting of the directors of the Co-operative Society the treasurer's report for the year 1906-07 was presented, showing a increase in membership and receipts from sales in the various buildings.

This year the society has handed over \$950 to the Bursar, who has used it for scholarship and loan purposes. \$500 has gone to the regular scholarship fund, while the other \$450 has been used as a part of a so called Bursar's fund.

This latter is a sum of money which Bursar Rand has gathered together, the income from which is to be used to help the students who through no fault of their own lose scholarships and to help those who are occasionally found working under conditions that are a serious handicap to good studying.
