

THE TECH

Published every Monday, Wednesday, and Friday during the college year by students of the Massachusetts Institute of Technology.
Entered as second-class matter October 6, 1904, at the post office at Boston, Mass., under the Act of Congress of March 3, 1879.

All communications regarding advertisements should be addressed to the Business Manager. Regarding subscriptions address the Circulation Manager.

Subscription - \$1.50 per year in advance. Single Copies 3 Cents.

Subscriptions within the Boston Postal District and outside of United States must be accompanied by postage.

Printed by Old Colony Press, Boston.

Monday, February 24, 1908.

GRATIFYING.

The large part that the professors of the Institute have come to take in public affairs can not but be gratifying to all connected with the Institute. The single instances of Prof. Winslow's testimony on the cause of fog in the Back Bay, and of Prof. Doten's connection with the research department of the School for Social Workers, given in another column of this issue, are only examples of the kind of work that members of the Faculty are constantly being called upon to do.

It is gratifying to the students to know that they are being taught by such men, and it is also gratifying to all who are working for the best interests of the Institute to have Technology so well advertised in the world of public affairs and the world of education.

NO TIME LIKE THE PRESENT.

Today regular work begins for the weight men, and tomorrow the long distance runners will start a course of training preparatory to this year's season. It is the intention of Coach Kanaly to develop as much of the latent material at Tech as possible. In this he should be sincerely backed by every man at the Institute, not alone in spirit, but in bodily presence and work as well.

In the field events Tech has always been weak, and this weakness has lost more than meet. As in all other branches of athletics, a good weight man has to be developed and many a Tech man who thinks he is unable to put the shot or throw the hammer may, by faithful practice, become a future record-breaker.

So too, with cross-country running, Udale, who last spring broke the New England intercollegiate record for the two-mile run, and Eldred, who has done such good work in the mile, are both instances of men who have been developed by Technology's cross-country system.

But it is important that each man who would like to enjoy the fun and exercise of athletic work should report to Coach Kanaly, not two or three days or two or three weeks from now, but at once.

FOLLOWING BOOKS ARE MISSING.

Students are Requested to Return Them at Once.

Copies of the following books belonging in the Engineering Library are recently missing from the shelves. Will anyone seeing any of these books in the drawing rooms or class rooms kindly return them to the librarian at once, as they are text-books in daily use in the library, and the only copies owned by the Institute:

Godfrey, E. Structural Engineering. Book 1, Tables. 1905.

Kent, Mechanical Engineer's Pocket Book.

Peabody, C. H. Thermodynamics of the Steam Engine. Ed. 4, 1903.

Trantwine, Engineer's Handbook. Ed. 3, 1902.

Merriam, M. Treatise on Hydraulics. Ed. 8, 1905.

Sanborn, F. B. Mechanics—Problems for Engineering Students. Ed. 1, 1902.

Molitor & Beard, E. J. Manual for the resident engineers. 1903.

WILL TALK ON MISSION WORK.

Rev. Fr. Walsh to Address Catholic Club.

On Tuesday evening Rev. Fr. Walsh will give an interesting lecture before the Catholic Club on work accomplished by the missions in China. Rev. Fr. Walsh is thoroughly acquainted with the missionary work going on in the Far East. The meeting will be held in 16 Rogers at 8 P.M.

DEGREE OF REGULATION INCREASED.

Prof. Lawrence Adds Regulation to Westinghouse Generators.

By the addition of another Tirrell regulator, Professor R. R. Lawrence has increased the degree of potential regulation on the power plant. Heretofore an alternating current regulator has regulated the voltage on the 100 kilowatt 60 cycle generator alone. A direct current regulator has now been placed in connection with the two Westinghouse generators so that the direct current voltage can be regulated as well. The regulation of the load in a testing laboratory is a very important matter in as much as the degree of accuracy in performing many of the tests is dependent upon the constancy of the impressed voltage so that this additional regulator is a most valuable accession to the electrical engineering laboratory.

RELIGION LACKS POWER.

"The amount of power that God gives us is in proportion to the load we carry or the work we do," said Rev. A. Z. Conrad of Park St. Church, yesterday at the Y. M. C. A. meeting.

He further said, "If religion lacks anything it is power. The reason is that Christians who are faultless as to the form of their religion are not alive. They are like the silver statues of the apostles which Cromwell found in the niches of York Cathedral, and which he set about doing good by making them into coin."

Much interest is being shown by Tech men in the advertising competition of the American Motor Company. A large number of men have been to this company's store on Clarendon street, opposite the Walker Building to look over the M. M. motorcycle preparatory to writing adds.

The Marsh-Metz machine sold in this store ought to be of interest to all Institute men in mechanical engineering work, because of its construction and engine.

"Shave Yourself"

I have already convinced over a million men that a daily home shave with my razor is a habit that every self-respecting man should acquire. I have taught them that the "Gillette" way is the only way to save time and money,—to maintain an unruffled disposition and to be sure of perfect hygienic shaving conditions.

My razor is increasing in popularity every day, because it is absolutely dependable—it is always ready for use—no stropping—no honing—and it gives as light or as close a shave as you may wish, without danger of cutting or scratching.

I am proving more conclusively every day, that while there may be room for argument as to what shaving accessories one should use, there is no doubt about the Razor. There is but one perfect razor—for all men—to be used under all conditions—and that is my razor—the "Gillette."

When you buy a safety razor get the best—the "Gillette." It will last you for the rest of your life—it is not a toy—it will always give you complete satisfaction.

The double-edged, flexible blades are so inexpensive that when they become dull you throw them away as you would an old pen.

King Gillette

The Gillette Safety Razor Set consists of a triple silver plated holder, 12 double-edged blades—24 keen edges, packed in a velvet lined leather case and the price is \$5.00 at all the leading Jewelry, Drug, Cutlery, Hardware and Sporting Goods dealers.

Combination Sets from \$6.50 to \$50.00

Ask your dealer for the "GILLETTE" today. If substitutes are offered, refuse them and write us at once for our booklet and free trial offer.
