AMERICAN LEGION CATECHISM

Following is the continuation of the article run in the last issue:

When was the Legion Started?

It was first organized in Paris March 15 to 17, 1919, by a thousand officers and men, delegates from all the units of the American Expeditionary Force to an organization meeting, which adopted a tentative constitution and selected the name "American Legion."

What Has Been Done in America Regarding It?

The action of the Paris meeting was confirmed and indorsed by a similar meeting held in St. Louis May 8 to 10, 1919, when the Legion was formally recognized by the troops who served in the United States. The Paris meeting appointed an executive committee of 17 officers and men to represent the troops in France in the conduct of the Legion. The St. Louis meeting appointed a similar committee. These two executive committees have amalgamated.

Who Are the Officers of this National Governing Body?

Henry D. Lindsley, Texas, chairman; Bennett C. Clark, Missouri, vice-chairman; Erie Fisher Wood, Pennsylvania, secretary; Gasper Bacon, Massachusetts, treasurer.

Where are the Temporary National Headquarters of the Legion?

At 19 West 44th St., New York city.

When will the Final Step in the Organization of the Legion Take Place?

Nov. 10, 11 (Armistice Day), and 12, at Minneapolis, Minn., when a great national convention will be held.

(TO BE CONTINUED)

RESIGNS AS CHAIRMAN

(Continued from page 1)

George P. Paine, of Madison, Wis., A.B., Ph.D., instructor in engineering mathematics University of Wisconsin; Mr. Paine will conduct research work at Harvard University and at Blue Hills Meteorological Observatory.

Another important development which no doubt will bring about practical results of value to the engineering profession is the recent affiliation of the Engineering Foundation with the National Research Council. To contribute to the mutual collaboration of the two institutions, office space in the Engineering Societies Building has been provided by the Engineering Foundation to serve as the New York Office of the Engineering Division of the National Research Council, and the Foundation, having brought its office to the adjacent room, in addition proffers to the Council and its Engineering Division such secretarial services as the Foundation may from time to time determine.

The office of the Engineering Division of the National Research Council was opened on June 1, and is now operating under the direction of Galen H. Clevenger, acting chairman of the division. The National Research Council proposed that its Engineering Division, comprising in all not less than 23 or more than 28 members, of whom at least 7 and not more than 12, shall be members at large, be so organized as to include at least 5 members of the Engineering Foundation, and, including these 5, 17 members of the Founder Societies; this proposal was accepted by the Engineering Foundation as well calculated to meet the mutual requirements of the Foundation and the Council. It is the purpose of the Engineering Foundation to collaborate with the National Research Council in the activities of its Engineering Division, and to make such appropriations to aid its specific undertakings as the Foundation may from time to time determine.

RECORD REGISTRATION IS EXPECTED HERE NEXT FALL

Following a precedent set by summer school registration the fall registration will surpass all previous enrollments. The number now attending the summer courses is nearly 1400; a number by far in excess of any of previous summers.

The fall registration is expected to better the spring enrollment by nearly thousand students. This increase should total the student body to twenty-five hundred, a new record in student enrollments at the Institute.
