DEPARTMENTS RELOCATE

Owing to the large number of students expected next year, Dr. Dewey's department of Engineering Administration is to move to the first floor of building 1 to give the enlarged History and Mathematics classes more room.

The Annapolis students in Naval Construction are likewise going to take up new quarters in building 1, on the third floor. This will give them the privacy required, as they can practically shut off that section of the building. The quarters for both departments are ready for the change with the exception of painting.

The chemical laboratory for the Mining Engineers, on the fourth floor of building 8, is likewise nearing completion. Holes for the water and gas pipes have been drilled, and some of the plumbing installed.

SUGGEST THAT NAMES "HUN" AND "BOCHE" BE DROPPED

A popular weekly review, published in London, has astonished its readers with the following:

"Germany is now, technically, a friendly Power or soon will be. That being so, we suggest that our press might with advantage discontinue its sprightly habit of using the words 'Hun' and 'Boche' on all possible occasions. We shall soon have the German Embassy again occupied, and it would really be deplorable if its chief were commonly referred to in print as the 'Hun Ambassador' or the 'Boche diplomat.'

"It is not because of our love for the Germans, but regard of our own reputation for good manners, that this suggestion is made.

"We will be sorry to part with 'Boche.' The name was an inspiration. 'Hun' has no merit except brevity, and all persons of good sense will be glad to see it go."

WALKER MEMORIAL FURNISHES INEXPENSIVE SUMMER GAMES

Many students are taking advantage of the tennis courts during the summer to get needed exercise, plus the pleasure of a good fast game. Tennis is a game that can be played by all as the cost is exceedingly low. The billiard room and bowling alleys are also open from eleven to eight every day during the summer. Rainy days find both of these well filled. The fee for the use of the tennis court is 10 cents per hour for each person, and 40 cents per hour for the billiard tables. Bowling is 10 cents a string.

LANSINGH '98 HEADS WINDOW CO.

(Continued from page 1)

Council of National Defense at Washington, D. C., serving under Dr. Hollis Godfrey, one of the advisors of this Council. He continued work along different engineering lines until June, 1917, when he sailed for France to represent Technology, which was later consolidated with the American University Union in Europe with headquarters in Paris and with branches in England and Rome. For a year he served as a director of the Technology Bureau in the Union and also as business manager and assistant director of the organization, whose purpose it was to serve college men and friends in service abroad and to promote closer relationship between American and foreign universities. In July, 1918, he returned to the States and in October was placed

by the Government in the Metz Plant at Waltham, Mass., as works manager for the Government. He continued in this capacity until April, 1919, and in June became president of The Lunken Window Co., Cincinnati, Ohio. Mr. Lansingh has been prominent in the activities of the Illuminating Engineering Society having been its general secretary in 1906 and president for the term ending in December, 1912. He has also served the society in other offices and on committees, and has been closely identified with the advancement of scientific principles concerning the use of reflectors of light sources. In collaboration with J. R. Cravath he wrote a book, "Practical Illumination," which has had a very wide circulation and is not only in the library of every man interested in lighting, but has been used extensively as a text book in many educational institutions.
