Eight More Men Appointed To Balance Large Registration

The latest report of Technology men cited for bravery in the World War reveals the following additions:

D. E. Aultman, '95, Brig. Gen., Croix de Guerre with 3 palms; Commander of the Legion of Honor.

R. B. Bagby '16, 1st Lt., Croix de Guerre; Belgian Order of the Crown.

C. Bennink '99, Major, Medal from French Society "Secours aux Blesses Militaires."

T. C. Clarke '93, Col., Croix de Guerre with silver star and palm.

R. S. Cook '21, 2d Lt. Cited in G. O. 94 1st Division, A. E. F., Dec. 13, 1918.

E. E. Dawson Jr., '14, Major. Citation of Merit from Gen. Pershing G.H.R.

H. W. Elis '16, Sgt. Citation "For exceptionally meritorious and conspicuous service at Tours." Gen. Pershing.

J. B. Franks, Jr., '15, Capt. Certificate of Meritorious Service.

I. G. Hall, Jr., '18, 2d Lt. Company cited 5 times: 3 by 6th French Army; 1 by 1st French Army and 1 by 3rd French Army.

C. B. Joe '23, Sgt., D. S. C.; Croix de Guerre.

R. G. Knowland '16, Capt. Citation by Chief of C. W. S., A. E. F. June 20, 1919.

S. L. Kuhn '17, Capt. Cited by 5th French Army Commander for work at St. Mihiel and in the Battle of the Argonne.

H. W. Long '18, Capt. Croix de Guerre.

G. R. Martin '19, Lt. Cited for Croix de Guerre.

W. H. Messenger '92, Capt. Recommended for D. S. M. (not received.)

M. W. Murray '08, Major. Letter of Commendation from Surgeon General, U. S. Army.

W. G. Perry, '07, Capt. Cited in G. O. 30, 1st Army Air Service Commander, Nov. 26, 1918.

A. Robinson '99, 2d Lt. Mentioned in Divisional Orders.

H. L. Rogers '89, Maj. Gen., D. S. M.; British, Companion of the Bath; French, Commander of the Legion of Honor; Belgian, Commander of the Order of the Crown.

B. Taylor, '99, Coll. Officer of the Legion of Honor; D. S. M.

J. M. White, '14, Capt. Croix de Guerre with silver star.

H. L. Williams '22, Italian Service Medal.

F. E. Williford '17, Col., Cited by Commander-in-Chief, A. E. F.

WALKER MEMORIAL AGAIN WELCOMES STUDENT BODY

Walker Memorial was not a minute behind time in opening up its many libraries, dining halls and amusement rooms. The main dining hall was a surprise to everyone with its newly finished floor, which will make dancing a pleasure and not an exercise. This floor will surely make the dormitory and club dances very popular this winter.

The opening of the galleries finishes the equipping of the building. Here are found new writing and card tables, and the walls are gradually being decorated with pictures.

The pool room and bowling alleys have not yet been changed and the offices throughout the building remain the same. The gymnasium is open to all who care to use it, but regular classes will not be held until after Field Day.

The cafeteria is receiving a large patronage, its popularity being manifested by the steady stream of students to and from Walker, from noon until 2 P. M.

Walker Memorial is the gift of the alumni to the student body. The need of a building as a recreation center and a home for activities was seen long ago by the men who had gone through the mill. Walker Memorial is therefore the personal property of each and every student. It was opened to the students December 3, 1918, being used by the Naval Aviators from the date of its completion until then. It was formally presented to the student body at the All-Technology Smoker, held in Walker, January 31, 1919 of this year.

BOILER USED AS RESERVOIR

Due to a leak which has lately appeared in one of the brine tanks of the ice plant in the Walker Memorial basement, an old steam boiler has been placed on the west side of the building and connected to care for the brine while the regular tank is under repair. The boiler will probably continue in its present use for a week or more.

SUPERINTENDENT CARES FOR ALL INSTITUTE MAILS

All mail addressed to students in care of the Institute is sent to the office of the Superintendent of Buildings and Power, room 3-005. This office is open for the distribution of mail from 10:30 a. m. to 12 noon and from 4 to 4:30 p. m. The office suggests that students call frequently to avoid needless delay in delivery. From time to time a list of uncalled-for letters will be posted in the main lobby.

At this office postage stamps and the service of most postal stations can be obtained. Mail boxes are located here and at other convenient places in the buildings, and collections are made frequently during the day.

Those who have boxes of their own will find mail there; others, the office requests to conform to the hours given above to avoid unnecessary confusion.

HERO OF PRESENT WAR IS AT TECHNOLOGY

Aubrey S. McLeod Was First American Wounded in Overseas Units—He Now Takes Course XV

MEMBER OF CLASS OF 1921

Technology has the unique distinction of having as one of its Juniors Aubrey S. McLeod, the first man of the American Expeditionary forces to be injured in the World War.

Aubrey S. McLeod '21, of Marlboro, Mass., is a member of the Class of 1921 this year. He attended classes at the Institute for a short time last spring, and is now working on Course XV Option 3.

He is a veteran of the fifth Harvard Unit, which was one of the first American Units to cross the water. McLeod was attending Purdue University when our country entered the war. In June, 1917, when the call came for

AUBREY S. McLEOD '21

trained men to go overseas at once, he became a member of the fifth Harvard Unit which was in France before the end of June, 1917. He was assigned to immediate duty near the front in northwestern France. One day in September, 1917, while on duty close behind the lines, the hospital in which he was working was bombed by a Boche plane. McLeod was very unfortunate in that he lost both of his legs, a sacrifice nearly as great as the supreme sacrifice for his country.

He was in French hospitals for six months, and was then brought to the Walter Reed Hospital in Washington, D. C. Here American surgeons did wonderful work in fitting him with a means of getting about, and this has made it possible for him to attend Technology this year.

McLeod is an example of the type of American who did not hesitate to sacrifice everything for the good of the great cause. He sacrificed four years of his college work, as he was a member of the 1917 Class, and he gave his two legs to save his country.

POSTS FOR DUMMY ERECTED

During the last few days several questions have been asked about the up-rights which have been erected on the athletic field near the goal posts. And in answer to the questions different theories have been advanced which vary widely. Some stated that the up-rights were erected for the use of the soccer players, but only a few hit upon the truth; namely, that the up-rights form a support for the tackling dummy of the football team. The posts were set in the ground a few days ago and before long the inert form of the dummy will be seen hanging in place.

OLD CANNON TO BE SET UP

The old Civil War cannon which for some time has been set on end back of building 3, and meanwhile growing more and more rusty and dirty, is now resting in the old seaplane hangar where it is to undergo a thorough cleansing at the hands of Mr. C. C. Cooper and his men. The cannon is to be set up on the western corner of the yard in the rear of building 3, and pointing toward the armory. Two cement blocks are already in place to support it.

This cannon seems to have a little history that is partially shrouded in mystery. Following its discovery some years ago in a dump back of the old building on Garrison St., Boston, it was brought to the Institute, and passed its time set on end in an obscure corner. It was again discovered by Mr. J. P. Monroe, Secretary of the Corporation and head of the Institute on Historical Research. He championed its cause with such fervor that Bursar Ford's opinion of "It was found in the dump, and it ought to be taken to the dump and left," has never been carried out.

One of the big reasons for the cannon's present position of prominence is undoubtedly the theory of some people that the cannon was a possession of, or relates in some way to President Walker.

"JOIN YOUR SOCIETY" WEEK NETS MANY NEW MEMBERS

The first few days of "Join Your Society" week have produced very good results. The membership campaign started on Tuesday and although on that day only 115 men signed up, since then the results have come up to expectations. On Wednesday, approximately 250 men joined their societies and those in charge of the campaign think that by the end of the week practically every man in the Institute will be a member of his professional society.

The publicity committee has taken an ideal way of advertising the campaign. Early in the week conspicuous posters were placed on the various bulletin boards, and on Wednesday the "He! Fella" handbills were scattered broadcast. On the same day a large bill board appeared in the basement of the Institute, near the Massachusetts Avenue entrance, requesting men to join their respective societies at once. This advertising is, in a great measure, responsible for the gratifying results which have been produced.

NEW ORDNANCE COURSE STARTED UNDER GOVT. SUPERVISION

Professor E. F. Miller '86, head of the department of Mechanical Engineering has announced the opening of a new course which will lead to a Lieutenancy in the Reserve Corps and a temporary commission as Second Lieutenant in the Regular Army. No extra studies will be required of men taking Course IV and those in Courses V and VI are also eligible, but will be required to do a little extra work in order to obtain the necessary number of points.

Students taking this course will receive a regular government compensation of twelve dollars per month, without doing any military work. Eighteen "Ordnance Credits" are necessary, this being slightly less than the number of points required by the Institute. The class work will not be changed nor will the present subjects be altered except that the problems will be directed principally to Ordnance work. The only military experience that is required has been taken care of by the course in Military Science. The direction of the Ordnance School is under the general supervision of the Military Science Department, but the work will be directly in charge of Professor Miller, and any information desired can be obtained at his office.

TECHNIQUE 1919 CONTRIBUTES MONEY FOR WAR MEMORIAL FUND

The Technique 1919 Board has set aside a sum of money to form a nucleus for the establishment of a fund with which it is planned to erect a memorial of some kind to those Technology men who lost their lives in the service of their country during the Great War. The money is now in charge of Bursar Ford subject to his discretion. At the present time it is being used along with the Student Activity Trust Fund, the income of which is helping in the upkeep of activities.

The Technique Boards of 1920 and 1921 hope that their profits will be sufficient to allow them to add to this fund, but now no definite statement can be made concerning possible additions. The plan is to have other Technology organizations contribute to the fund in the hope that in time there will be enough money to pay for the erection of a suitable memorial.

Fascinating in Their Delicious Variety

CHOCOLATES

Deep coatings of the finest chocolate over centers of endless profusion, from thick creamy fudge and marshmallow or rich nuts and fruits, to light peppermint puffs of molasses or crispy nut brittles, always something new and fascinating.
