CLUBS ANNOUNCE CONCERT

(Continued from Page 1.)

2. As heretofore there will be the usual fraternity reservations. Reisman's Orchestra has been engaged to furnish the music for the dancing, and the price of the tickets will be \$5.00, including the supper.

A series of three dances has been arranged by the Clubs to be held in Walker Memorial on February 13, February 27, and March 12. The very best music will be obtained for the dances, which will last from 8 to 12. During the intermissions short programs will be given by the Musical Clubs together with several special acts. This is a new venture for the Clubs, but they believe that the dances will promote social good-fellowship.

Because of the many applications for specialty acts for the Clubs, the management will hold try-outs next Tuesday at 4 in Smith Hall, room 10-250. Postal card announcements have been sent to all who have entered their names. Anyone wishing to try-out new sets should report at that time prepared to put on the complete number.

Competition among college musical clubs is very keen, and in consequence the management is having difficulty in completing the schedule, because of the proximity of Harvard, Tufts and Dartmouth. Up to date the following concerts have been definitely arranged: December 16, Franklin Square House; January 19, Lynn and January 23, Arlington.

The following men have been retained in the competition for freshman Assistant Manager: E. M. Holding '22, F. H. Bush '23, G. Ferenbach '23, C. W. Hildreth '23, and W. Kirkpatrick '23.

WALTON LUNCH CO.

Nearest Luncheon Room
AT 78 MASSACHUSETTS AVE.

YOU'LL smoke a WDC more than an ordinary pipe, because it's a sweet, mellow smoke. Follow the old pipe connoisseurs and have three, four, or more WDC Pipes on your rack. Smoke a cool one every time. Then you'll know what a real smoke is. Any good dealer will furnish you with several select shapes.

A Gateway—Electrical

ONLY a forty-foot gateway bounded by two brick pilasters and ornamental lamps, but unlike any other gateway in the entire world.

For back of it is the General Electric Company's main office building, accommodating 2300 employees. And just next door is its laboratory with the best equipment for testing, standardizing and research at the command of capable engineers. Then down the street—a mile long—are other buildings where everything electrical, from the smallest lamp socket to the huge turbines for electrically propelled Battleships, is made

by the 20,000 electrical workers who daily stream through.

What a story this gate would tell, if it could, of the leaders of the electrical industry and business, of ambassadors from other institutions and from foreign lands.

The story would be the history of electric lighting, electric transportation, electric industries and electricity in the home.

This gateway, as well as the research, engineering, manufacturing and commercial resources back of it, is open to all who are working for the betterment of the electrical industry.

Illustrated bulletin, Y-863, describing the company's several plants, will be mailed upon request. Address General Electric Company, Desk 43, Schenectady, New York
