Entering the World Electrical

THE graduate of today enters a world electrical. Gathered from the distant waterfalls or generated by the steam turbine, electric power is transmitted to the busiest city or smallest country place.

Through the co-ordination of inventive genius with engineering and manufacturing resources, the General Electric Company has fostered and developed to a high state of perfection these and numerous other applications.

And so electricity, scarcely older than the graduate of today, appears in a practical, well developed service on every hand.

Recognize its power, study its applications to your life's work, and utilize it to the utmost for the benefit of all mankind.

HOG ISLAND YARD TERMED "THE CLYDE OF AMERICA"
(Continued from page 1)

launched over 3 6-10 working days and one delivered every 3 7-10 working days.

"The tonnage launched at the Hog Island yard, which, according to local rumors, will become a huge shipbuild-

ing, ship repair and terminal, when the American International Shipbuilding Corporation's contracts with the government are completed, from August 5, 1918, to date is twenty per cent. of the total tonnage of steel ships launched from all the shipyards of the United States during that period and is one-twelfth of the total deadweight tonnage of steel ships launched from all the shipyards of the United States for the United States Shipping Board Emergency Fleet Corporation.

"The eighty-three cargo carriers delivered to the Shipping Board by the Hog Island yard have received the highest rating of the American Bureau of Shipping and the Shipping Board

inspectors, while fifty of the vessels also received the highest classification from Lloyd's bureau.

First Ship Still Sailing
"One million, five hundred thousand, two hundred and thirty-one miles have been steamed by the Hog Island products, which carried 1,002,800 tons of cargo. Eleven rescues have been effected at sea by the Hog Island ships.

"The Quistconek, the first of the fabricated ships turned out at Hog Island and which was christened by Mrs. Woodrow Wilson, in the presence of the Nation's Chief Executive, has a record of 60,000 miles steamed. After completing 37,500 miles the vessel was dry-docked, carefully examined by ship building experts, who found her intact. The bottom of the hull was scraped clean of barnacles and then repainted and from the day of delivery with this one exception, the vessel has been in constant service, and has never failed, nor shown material, structural or workmanship weakness from the day it was launched, August 5, 1918, thereby establishing the fabricated standardized ship firmly with shipping interests the world over."

The figures issued by the shipbuilding company further shows the average daily working force during 1919 was 30,000 and the number of men employed as of March 31, 1920, 20,000. 59,665,781 rivets have been driven in the hulls and 336,662 tons of steel erected.

The Hog Island shipyard covers an area of 927 acres and has a river frontage of 2 1/4 miles. There are thirty-six warehouses in the shipyard and 82 miles of railroad track. The floor space of all the buildings cover 103 acres.

IF

(By Robert Isham Randolph, with Apologies to Rudyard Kipling.)

If you can swing an axe, or yield a brush-hook,
Or drive a stake, or drag a chain all day,
If you can scribble "fingers" in a note-book,
Or shoot a range pole half a mile away,
If you can sight a transit or a level
Or move a target up and down a rod,
If you fear neither man, nor devil,
And know yourself and trust the living God,
If you can wade a swamp, or swim a river,
Nor fear the deeps, nor yet the dizzy heights,
If you can stand the cold without a shiver,
And take the Higgin's ink to bed o' nights,
If you can turn a thumb screw with your fingers,
When every digit's like a frozen thumb,
If you can work as long as daylight fingers,
And not complain, nor think you're going some,
If you can sight through tropic heat's refraction,
Or toil all day beneath a blistering sun,
If you can find a sort of satisfaction
In knowing that you've got a job well done,
If you can be an eskimo and nigger,
And try to be a gentleman, to boot,
If you can use a "guessin' stick" to finger,
And know a coefficient from a root,
If your calculus and descriptive are forgotten,
And your algebra just serves you fairly well,
If your drafting and your lettering are rotten,
And your Trautwine's always hand by to tell,
If you can close a traverse without fudgin',
Or check a line of levels by a foot,
If you can set a slope stake, just by judgin',
And never kicked a tripod with your foot,
If you can run a line where you are told,
And make it stay somewhere upon the map

If you can read your notes when they get cold,
And know that contours mustn't ever lap,
If you can line a truss or tap a rivet,
Or make a sorry foreman come across,
If you can take an order, as well as give it,
And not have secret pity for the boss,
If you can climb a stool and not feel lowly,
And have your head turned by a swivel chair,
If you can reach your judgments slowly,
And make your rulings always just and fair,
If you can give yourself and all that's in you,
And make the others give their own best, too,
If you can handle men o' frown and sinew,
And like the men and make 'em like you too,
If you can't forget a college education,
Or if you've got a sheep-skin, can forget,
If you get a letter wise for compensation,
And give a little more than what you get,
If you can meet with trouble and disaster,
And meet the world without favor, nor with fear,
If you can hold your own and your own master,
If what is done, can't be a day's regret.

Good Traveling Companions

Craftsman Fabrikoid Luggage is the only luggage you can buy at a moderate price and depend on for real service year after year.

This luggage is stylish and strong and made with care from locks to lining. The Craftsman Fabrikoid covering is stain-proof, scar-proof and waterproof. It can always be washed with soap and water and its original beauty restored.

For rugged, beautiful luggage that will stand hard wear Craftsman Fabrikoid bags and suitcases have no equal. You will say so when you see them at your dealers.
