TEACHERS DESERTING

Asserts H. L. Ferguson in Plea
For More Pay

In an address delivered by Homer L. Ferguson, former president of the United States Chamber of Commerce, a call was made upon the business men of the United States to give their active and earnest support to the movement to secure a wage consistent with present costs of living for America's school teachers.

Many Teachers Deserting

Mr. Ferguson pointed out that the standard of education in our public schools is being hit hard by reason of the fact that thousands of men and women are deserting the teaching profession for lines that offer more attractive compensation.

"Years of study are necessary to prepare teachers for their vocation, and a high certificate of character is required. And yet we wonder about the spread of socialistic ideas when those who teach our children know that under the beneficent plan of education in our great country they are paid one-half of what they ought to make under present conditions."

"Let Taxes Be Increased"

"Now, we cannot expect them to grow wildly excited about the great benefit of a capitalistic form of property owning and operation of industry, unless we as business men perform the duty we owe the teachers of the

United States to see that they receive a reasonable compensation for their services. And if our taxes must be increased, for heaven's sake, let them be increased for the noble men and women teaching our children; for the people who are giving their lives in an honorable service."

At the Other End of the Wire

A TWIST of the wrist and electricity lights cities and towns, turns the wheels of industry, or affords conveniences to millions of people.

But let us follow the wire carrying this energy to its source and we find either a waterfall, a coal mine or an oil well.

Much of the supply of fuel in this country is being used up rapidly while the power of water is running to waste. For the rivers and streams of this country could, if properly harnessed, develop enough electric power to save 300,000,000 tons of coal annually.

By studying nature's forces—coal, oil and water—by applying them to machines, and finally by the perfection of apparatus to insure uninterrupted power service under varying conditions, the General Electric Company is serving to make electric power cheaper, more plentiful and reliable.

GENERAL ELECTRIC COMPANY

A New Top For Your Car

Now is the time to re-top your car for winter use. You will get maximum service if you specify Pontop as your topping fabric.

No matter how severe the storm Pontop has the strength and structure to withstand it. Its rugged endurance survives every test of travel. Trim appearing and substantial, it keeps your top smart and shapely throughout long use.

You will always get top value in Pontop. Insist on having it used. Your trimmer has it or can get it for you quickly.
