SPORTS

SWIMMING

Technology's star porpoises are at last to do battle. Tomorrow afternoon at 3.00 o'clock, they will enter the lists at New Brunswick, against no less formidable an opponent than Rutgers. Time trials show that the team has been improving this week, although only a few of the men are in really first class condition.

WRESTLING

Spilling the Beans is just what Technology's matmen did to Cambridge Y. M. C. A. Tuesday night, at the latter's quarters, when the Institute aggregation, with a score of 26 to 3, came near leaving the Red Triangle only a "goose-egg" as a remembrance. There was no doubt about the outcome of the meet. Only the length of time was indefinite.

(Special to TECH by E. I. N. A.)

Providence, Jan. 20.—The Brown wrestlers meet Tech with the chances of victory for either team about even, according to Coach Merrick. The hill men are in excellent physical condition from weeks of training and the last few days of especially hard work in preparation for their first meet.

Shurtieff, 175 pounds, is the individual star, being last year's New England intercollegiate champion in his class. Captain Dodge is another dependable performer and if these two men are in their usual form it is expected that they will win their matches.

Spellman, heavyweight, is exceptionally powerful and promising but as yet is somewhat inexperienced. Staples, the other first year man, is in the 115-pound class, and much is looked for from him. Although at present he too lacks experience.

Dustin is also a new man on the squad, while Holt and R. Spellman are men of several years' training.

The Technology meet is the first one on the Brown schedule, and the only one before the mid-year exams. During the second semester the team will meet in order: Yale, Harvard, Tufts, Cornell, Lehigh, and Columbia, which, with Technology, makes perhaps the hardest wrestling season of any college in the country.

"FATHERHOOD PRIME HONOR," SAYS SEERLY

(Continued from Page 1)

a man to be clean in mind must be clean in body."

"Let us make our life a fit life to pass on to the next generation," said Dr. Seerly, "the greatest honor that ever comes to any man is when he becomes a father."

Dr. Seerly devotes a certain amount of his time each year to giving lectures at various colleges. He is released for this purpose by the Springfield Y. M. C. A. College. Dr. Seerly graduated from that institution in 1883, and has since that time been an instructor there. "Womanhood" will be Dr. Seerly's subject in tomorrow's lecture which will be held in room 10-250 at 5 o'clock.

Richards' School of Dancing

30 HUNTINGTON AVENUE, BOSTON
Class Monday and Wednesday, 8 o'clock.
Socials, Tuesday and Friday evenings, 8.30. Private lessons daily. Tel. B. B. 56060.

TECHNOLOGY WOMEN'S CLUB MEETS SATURDAY

Under the auspices of the Technology Women's Association Signora Olivia Rossetti Agresti will give an illustrated lecture in the institute next Saturday afternoon at 3 o'clock, on recent industrial developments in Italy, and the possibility of American and Italian trade co-operation in the Mediterranean basin. After the lecture there will be a reception in the Emma Rogers room. The committee of arrangements consists of Mrs. Edward Cunningham, chairman; Miss Mabel K. Babcock, Miss Elizabeth F. Fisher and Mrs. Charles Winthrop Sawyer.

TECHNOLOGY BECOMING GRADUATE SCHOOL

(Continued from Page 1)

cent; 1919, 85 per cent; 1920, 92 per cent.

Of the total of 982 men admitted to the Institute last fall 445 came from other colleges and 482 from secondary schools, which as the above figures show, is in the ratio of 92 per cent. There were 39 foreign students entered last fall and 16 former Institute students readmitted to the Institute as freshmen.

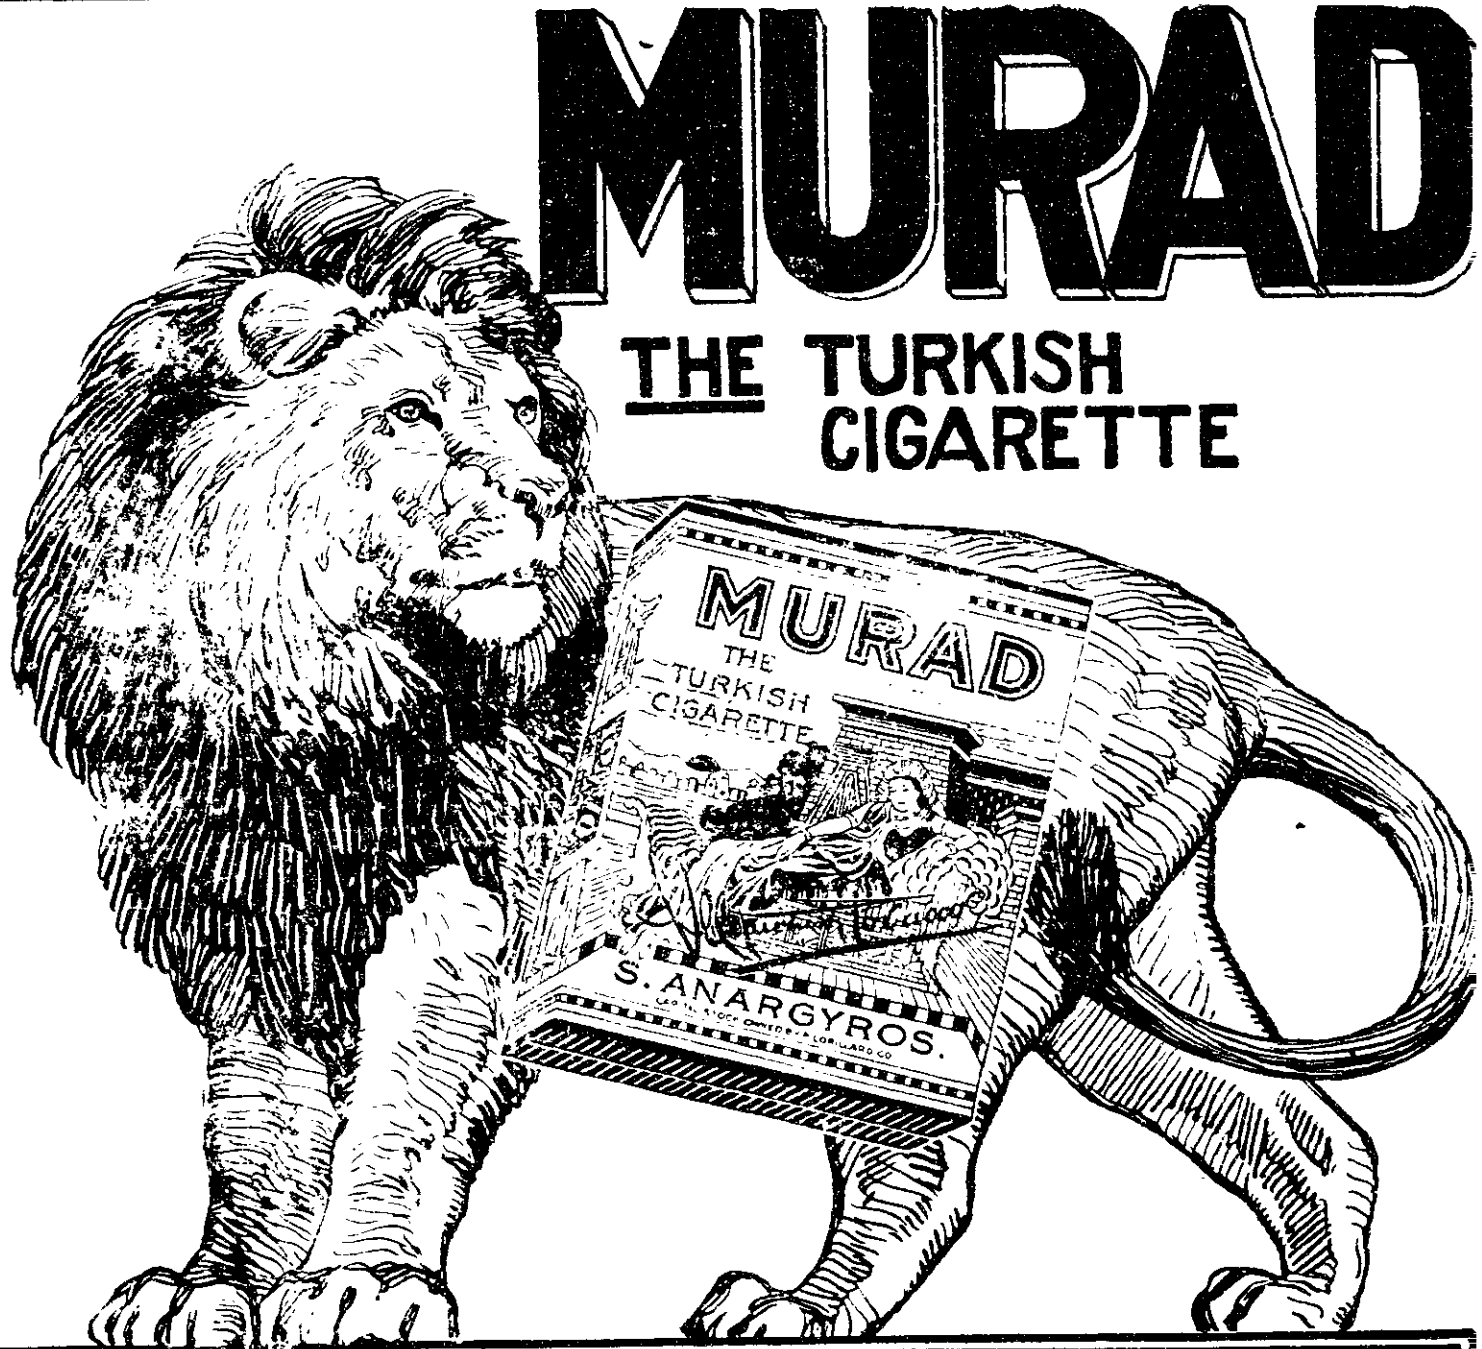

For the first time in the history of Technology, the majority of students in school are in the junior and senior classes, a record shown by probably no other institution of learning in the country. Before the opening of the fall term this year the Institute had received 640 applications from men at other colleges for permission to enter Technology. Of this number 445 registered at the opening of school.

The committee pointed out to the faculty in its report that "the result of this proportionally large number of transferees was a serious change in the character of the student body," and continued that "if the proportion continues to increase the Institute will be faced with the proposition of having to offer advanced courses on a more extended scale."

A new entrance requirement was fixed for men who enter in 1922. Those who enter as freshmen at that time will have to present a certificate of the successful completion of a course of 150 hours of chemistry. To offset this requirement, only one elective, instead of two, will have to be presented.

The committee recommended to prospective entrants in 1921 the desirability of a preparatory course in chemistry. The Institute will offer an intensive course in the subject next September for three weeks before the opening of school.

In the future, the fee for entrance examinations will be \$6.

Mrs. Fox was bragging one day about the large number of her cubs.

"How many cubs do you bring into the world at one time?" she asked the LIONESS.

"Only ONE," replied the Lioness—"but it's a LION."

MURADS COST 20 CENTS for a BOX of 10 — BUT THEY'RE MURADS!

MURADS would be lower priced if we left out all or part of the 100% Turkish tobaccos of the purest and best varieties grown—or if we substituted inferior grades of Turkish tobacco.

But they wouldn't be MURADS—they'd only be Foxes!

"Judge for yourself—!"

Special attention is called to Murad 20s in Tin Boxes
