

TIREX

PORTABLE CORD

Tirex will increase portable tool efficiency by reducing cord troubles and renewals to a minimum.

It stays on the job from four to five times as long as any fabric covered cord on the market.

May we send you a sample?

MILITARY SCIENCE DEPT.
HAS CHANGES IN PERSONNEL

With several changes in personnel and organization, the Military Science Department is ready for its year's task of initiating 600 verdant freshmen into the mysteries of warfare, and training as many upper classmen in the same.

The new officers in the department are as follows:

Captain Clayton, Signal Corps; Major Maish, Ordnance; Major McDonnell, Air Service; and Lieutenant Ogden, Engineers. Colonel J. B. Christian will be in charge of the department as last year, and Captain Clark, Major Ottosen, Major Pendleton, and Captain Wright will be at the Institute.

The freshman course will be much like that of last year, with five weeks of drill and five of lectures.

Prospects for the advanced work are better than ever before, as over 350 men are enrolled so far, and it is planned to take the work up on a larger scale than has been previously attempted.

MEETING OF MANAGERS

Managers and captains of all the teams recognized at the Institute will meet Sunday morning at 10 o'clock in Walker Library. According to E. H. Miller '23, the meeting is to be more or less of a general survey of the coming seasons, and will be mainly for the purpose of discussing plans, and matters pertaining to athletics.

Typewriters rented 3 months, \$6. Rebuilt machines, \$30 to \$65. Supplies, ribbons, and Carbon. See the "CENTURY" 17 1/2 pounds for \$47.

JAPANESE NAVAL OFFICER TO TAKE ADVANCED COURSES HERE

Engineer Captain K. Goto, of the Imperial Japanese Navy, will visit the Institute today. This noon he will give an informal dinner at the Copley Plaza to the officers of the Institute, to introduce to them Engineer Lieutenant Kamazo Kubota, who is to take graduate work here, beginning this fall.

Will Study Naval Architecture

Lieutenant Kubota is sent here by the Japanese Navy for a period of three years, and will take courses in the Department of Naval Architecture. Captain Goto is a graduate of Courses II and XIII here at the Institute, and took part in the Russo-Japanese war.

Dinner at the Copley Plaza

Mr. Everett Morse '85, of the executive committee of the Institute, president of the Boston Chamber of Commerce, and president of the Simplex Wire and Cable Company, will be present. Other guests are Acting Dean Professor Henry P. Talbot, Secretary of the Faculty Professor Allyne L. Merrill, and Professor Harry M. Goodwin, who is chairman of the Faculty committee on advanced degrees. Professor James R. Jack, head of the Department of Naval Architecture, and Professor Edward F. Miller, head of the Department of Mechanical Engineering, will also be present, as will Registrar Walter Humphreys and Dr. J. L. Tryon, Assistant Registrar.

CARPENTERS MAKE CHANGES

The Institute's carpenters have put in a busy season during the summer vacation. A number of the class rooms in Building 2 have had additional blackboard space installed. Part of the Study Room of the Electrical Engineering Department on the third floor of Building 10 has been transferred to the Research Laboratory of that department, and a large partition erected. The current electrical periodicals formerly there are now in a special case in the Central Library.

The painters have been busy repainting the Institute corridors, the Dormitories, and several of the offices in Walker.

The groundsmen have regraded the graveled area in the Great Court. The roads around the buildings have been patched and the parade ground oiled. A new parking system for autos has been put into effect at Building 3. The new tennis courts have been lengthened, and new fencing put up in front of Buildings 2 and 5.

INJURED IN CARPENTER SHOP

While sawing a stick of timber in the carpenter shop, Mr. George O'Hara had the misfortune to severely cut his right arm. He was attended by Dr. L. W. Croke of the Medical staff.
