

PLAN CO-OPERATIVE BUYING

At a meeting held in room 10-200 on Friday at 5 o'clock, S. M. Jones '21 was elected chairman of a committee composed of fraternity house managers, to co-operate in the buying of provisions in order to effect a saving thereby.

A dozen or so fraternities are entering into a campaign to discover ways and means of reducing expenses of house operation through the method of co-operative buying. Several houses that supply the fraternities with provisions are expected to grant lower prices for the food thus bought in large quantities.

With the beginning of the movement towards the lowering of costs of food Jones expects that ultimately a permanent organization will be effected to deal and discuss all problems relating to house management, one of the most important of which is that of servants.

Will Try To Get Best Terms

Further canvassing of provision houses will take place to decide which house will grant the best terms; meanwhile the support of the other fraternities will be enlisted to make the plan a successful one.

Another meeting of the house managers has been arranged for Friday, November 18, when definite proposals will be announced as to the provisions to be used and other plans will be formulated to set the machinery in working order at the beginning of the second year.

FEE HAVE RESPONDED

IN T. A. C. CAMPAIGN

(Continued from Page 1.)

year. There will be an arrangements committee to see to the disposal of tickets and the general arrangements for the meets here. The entertainment committee will look to the entertainment of the members of visiting teams and run dances for the benefit of athletics. No publicity committee is planned until final arrangements have been made with regards the proposed publicity manager of the M. I. T. A. A. Other minor committees will remove some of the burdens from the shoulders of the team managers.

Support of the club has been wholeheartedly given by the team managers, and they are urging the students to join the organization. Not only are they urging this, but they are also aiding materially in the membership campaign now going on, as has been mentioned. The managers appreciate how much a crowd means to a team when it is fighting for Technology. They know that a hearty cheer has gone into victory. They appreciate the financial and other aids that the club will give the teams, and how much this will add to the success of their season.

STONE & WEBSTER

INCORPORATED

DESIGN steam power stations, hydro-electric developments, transmission lines, city and interurban railways, gas and chemical plants, industrial plants, warehouses and buildings.

CONSTRUCT either from their own designs or from designs of other engineers or architects.

MANAGE public utility and industrial companies.

REPORT on going concerns, proposed extensions and new projects.

FINANCE industrial and public utility properties and conduct an investment banking business.

ANNOUNCE TRACK PLANS

As a result of a meeting of Technology's track men in room 10-267 last Monday the plans for the winter season are announced. Nearly all of last year's men and a fairly large number of freshmen attended and were addressed by Capt. Chittick and Frank Kanaly.

C. Y. Chittick '22, acting as captain of track in the absence of captain Dandrew, opened the meeting with a short talk. He reviewed the Institute's record of last year for the benefit of the new men—pointing out especially the winning of the N. E. I. C. A. A. meet and the scoring of 11 points in the I. C. A. A. A. He also outlined Technology's hopes for the coming season, emphasizing the I. C. A. A. A. as the goal of track competition.

Kanaly Addresses Candidates

Chittick was followed by Coach Frank Kanaly who talked to the men for the rest of the hour. Kanaly stated that with many veterans back and 170 men reporting for all branches of track the outlook for a successful year is very bright. The aim of the meeting, he said was to familiarize the new men with the customs in Technology track work and give the veterans the plans for the year's training.

His methods of assigning workouts to the new men, what was to be expected of each candidate, the necessity for outdoor work during the winter, and the kind of work to be done on the board track were explained. In place of the training table which he has not yet been able to arrange for, Kanaly said he would post a diet list to direct the men in their attempts to keep training by themselves.

Work To Be Reasonable

Kanaly then gave a brief but very interesting account of his career as an athlete and coach so that the men working under him might be better acquainted with their leader. As both an amateur and a professional runner Coach Kanaly has held national records in all distances from one half mile to five miles and world's records in the half and in the mile. He learned coaching under Moakley of Cornell probably the greatest living track mentor, and under Murphy, the famous English coach of some years ago. He came to M. I. T. in 1907 and built up the teams that have won the N. E. I. C. A. A. the last five years in succession.

Frank, as he is known to all track men, ended his talk by stating that he would always try to be reasonable and square with every man and all he asks in response is good honest effort in behalf of the team. The schedule for the coming season is as follows:

- 1—Handicap meet on Tech Field, Nov. 5.
 - 2—End of fall training.
 - 3—Beginning of winter practice.
 - 4—B. A. A. games, Feb. 4.
 - 5—East Armory Meet, Feb. 22.
 - 6—Indoor I. C. A. A. A. Meet, May 4.
 - 7—N. Y. A. C. Meet (pending).
 - 8—Johns Hopkins at Baltimore.
 - 9—N. E. A. A. U. Championships.
- (Dates of the last three not yet determined.)

ARTILLERY UNIT HOLDS SMOKER

The Coast Artillery Unit of the Institute will hold an interesting and instructive smoker in the Faculty and Alumni room of Walker Memorial, Tuesday, October 25, at 7:30 o'clock. The speakers of the evening include C. E. Brokaw '22, P. D. Appel '22 and A. J. Browning '22, will give short talks on work and play at camp. It is also planned to have a prominent officer of the Coast Artillery Corp address those present on the status of the men in the Officers Reserve Corp.

COLLEGE FOOTBALL RESULTS

EAST

Harvard 21, Penn State 21.

Brown Second 25, Tech '24 0.
W. and J. 14, Lehigh 7.

PENN STATE TEAM ALL
IT IS CRACKED UP TO BE

Thirty-eight thousand football enthusiasts were treated to some real football at the Stadium last Saturday by Coach Hugo Bezdek's Penn State warriors. Though the score was 21 to 21, Penn State outclassed the crimson after the first period. The crimson entered the game with a makeshift team, due to the many injuries from last week and before the game was over it put in every substitute who knew the least bit about football. Penn State started pounding the Harvard line in the second quarter and scored its first touchdown by romping up the whole field, making successive first downs.

Has Swift-Moving Backfield

The contest last Saturday was probably as interesting and tense a game as has been witnessed in several years at the Stadium. Harvard tied the score by unravelling the same desperate play as it did in the last few minutes of the Princeton game last year. It was a neat forward pass from Charlie Buell to Churchill, who before any one could realize it had the football in his possession and was dashing towards the goal line for a touchdown.

The rapidity and cleverness with which the Penn State backfield manoeuvred its shifts was a spectacle in itself. The forwards opened up a hole in the Crimson line big enough for a horse and wagon to drive through. Wilson and Killinger were two of the cleverest players ever seen in the Stadium.

REGISTRATION REACHES 3535

(Continued from Page 1.)

of the whole student body. The gain from the South Atlantic and North Central states is 24 per cent in each case.

The number of women students, in spite of the increase in registration, dropped from 40 to 38.

Scholarships Awarded

The scholarship committee of the faculty received applications from 556 students for aid and of these 220 received rewards from the Institute and 132 received state scholarships. One-half scholarships were held by 99 students. The total scholarship awards amounted to \$34,122.50. The aid of state scholarships has now been discontinued.

Another study in scholarship was made and as before, the second-year class was found to have the lowest standing. Contrary to the results of other studies the fourth-year class was found to drop in its standing and the third-year class to have stood highest.

Among the professional courses the number of students in Mechanical Engineering was larger than in any other course. Next in size came the course in Electrical Engineering and following that the course in Chemical Engineering. Among the larger courses the gain in Electrical Engineering and Chemical Engineering was greater than the percentage gain of the whole student body.

HARRIER TROUNCE HARVARD

(Continued from Page 1.)

as he passed Billy MacMahon, who stood near the finish, "This is not a race, this is fun."

Awarded Medals This Year

Six medals were at stake in the race, offered by the Harvard Association, all six being won by Tech men. The medals of gold, silver, and bronze for the first three finishers of the varsity race were obtained by Manager Waterman Saturday and will be distributed to the men who earned them: Sanborn, Flanders and Hendrie. The freshman medals were not ready yet so the three fresh harriers, Bemis, Sanbert and Parkinson will have to wait for theirs.

The meet was under the direction of the Harvard management whom the Beavers wish to thank for the courtesy of their treatment and the smoothness with which the meet was run off.

Varsity Wins by 18-40 Score

The scoring varsity team was: 1. Sanborn. Time 34 min. 23 sec.; 2. Flanders. Time 34 min. 32 sec.; Hendrie. Time 35 min. 34 sec.; 5. Robertson; 7. Poor. In addition to these Anderson and Holt, who finished 7th and 14th in the run will be on the season's varsity team. The scoring Harvard varsity team was: 4. Harris; 6. Lutz; 9. Coburn; 10. Pratt; 11. Burke. This made the score of the varsity run 18 to 40 in favor of Technology.

The scoring Technology team in the freshman race was: 1. Bemis; 2. Sanbert; 3. Parkinson; 4. Myrick; 5. Gardner. The five first Harvard freshmen finished as follows: 6. Barber; 7. Kent; 8. Thayer; 9. Daubin; 12. Jones. The tally of the run was 15 to 42 in favor of Technology. Bemis' time for the three miles was fast for a freshman race, being 17 min. 4 sec. The four other Tech scorers were right on his heels, however, the last being but 16 seconds behind him. Bateman, who finished 10th and Killinger who finished 11th are also on the team which meets Worcester next Saturday.

AT THE THEATRES

WILBUR: "The Rose Girl," 8:15. The only musical comedy in town playing to crowded houses. Good music, good show.

TREMONT: "Little Old New York," 8:15. Genevieve Tobin in a delightful comedy of life in 1819. A romance with quaint and interesting characters.

COLONIAL: "Ziegfeld Follies," 8:15. Gorgeous costumes, excellent music and among the 100 Ziegfeld Beauties there are some of the prettiest girls ever on a Boston stage. Fields, Hitchcock and Fannie Brice just as funny as ever.

SHUBERT: "Cornered," 8:20. Madge Kennedy in a play of sustained humor and interest, with capable acting throughout. Nothing of lasting interest, but an entertaining presentation of crook stuff and mind-reading, in a novel manner.

PLYMOUTH: "The Woman in Bronze," 8:15. A very emotional play in which Margaret Anglin takes the leading part with even more than her customary skill.

HOLLIS: "Deceit," 8:15. Ethel Barrymore triumphs again in a brilliant, emotional story of the adventures of a titled English lady adrift in the wilds of New York.

COPLEY: "The Mob," 8:20. Galsworthy's famous wartime play appears for the first time in Boston. An exceedingly strong and thought-provoking note is sounded.

MAJESTIC: 8:00. To be reviewed later.

BOSTON OPERA HOUSE: 8:15. "In the Night Watch." Buckets of

blood. Good dramatic action, well enough done. One more week.

ST. JAMES: 8:15. "Under Cover." A comedy with the smuggling of a valuable pearl necklace as the foundation. The customs officials get wind of the plot and do some work.

ARLINGTON: 8:15. "Il Trovatore." "The world's most popular opera." To be reviewed later.

KEITHS: 8:00. Featuring "The Singers Midget." To be reviewed later.

SYMPHONY HALL:

Tues. Oct. 25, at 8:15 and Wed. Oct. 26, at 2:30 and 8:15 three distinct concerts by the incomparable Anna Pavlova, her Ballet Russe, and her entire Paris and London organization with a Symphony Orchestra. The performances are the first of its kind in Boston this season and in all probability will be the last.

Oct. 28, at 8:15. Harvard Glee Club is to be heard in a special concert, the first since their return from Europe. Mary Garden, Prima Donna soprano, will assist in the program. Oct. 30, at 3:30. A vocal concert by Hulda Lashanska, soprano, is announced. The New York Tribune said: "Hers is one of the most beautiful voices now to be heard on either concert or operatic stage."

FENWAY: (All Week) "The Affairs of Anatol." We haven't seen this picture yet but we are sure it's a knockout for it is a DeMille picture and Wallace Reid, Gloria Swanson and Wanda Hawley head a list of twelve stars appearing in it.

SELWYN (Formerly Park Square): "The Three Musketeers," 8:15. Douglas Fairbanks in an unusually fine picture. Chuck full of mystery, intrigue and adventure. There is sparkling court life, fiery love, and action all the time.

TREMONT TEMPLE: "Over the Hill," 8:15. A sentimental story showing a cross section of home life. Well done.

GLOBE: "Way Down East," 8:15. The greatest melodrama yet screened.

THE
MASSACHUSETTS
INSTITUTE OF TECHNOLOGY

Cambridge, Mass.

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY aims to give thorough instruction in Civil, Mechanical, Mining, Electrical and Sanitary Engineering; in Chemistry, Electrochemistry, Architecture, Physics, Biology, and Public Health, Geology, Naval Architecture and Engineering Administration.

To be admitted to the Institute, the applicant must have attained the age of seventeen years and must pass examinations in algebra, plane and solid geometry, trigonometry, physics, history of the United States (or some other unit of history), English, French or German. Preparation in two units of a series of elective subjects is also required. A division of these examinations between different examination periods is allowed. In general, a faithful student who has passed creditably through a good high school, having two years' study of French and German, or three years of either, should be able to pass the Institute examinations. The history requirement may be fulfilled by a satisfactory certificate.

Graduates of colleges, and in general all applicants presenting certificates representing work done at other colleges, are excused from the usual entrance examinations and from any subjects already satisfactorily completed. Records of the College Entrance Examination Board, which holds examinations at many points throughout the country and in Europe, are also accepted for admission to the Institute.

Instruction is given by means of lectures and recitations, in connection with appropriate work in the laboratory, drawing-room or field. To this end extensive laboratories of chemistry, physics, biology, mining, mechanical engineering, electrical engineering, applied mechanics, hydraulics, and the mechanic arts, have been thoroughly equipped. Unusual opportunities for field-work and for the examination of existing structures and industries have been secured.

The regular courses are of four years' duration, and lead to the degree of Bachelor of Science. In most Courses the work may also be distributed over five years by students who prefer to do so. Special students are admitted to work for which they are qualified; and the degrees of Master of Science, Doctor of Philosophy, and Doctor of Science are given for resident study subsequent to graduation. Opportunity for research is offered in all the departmental laboratories, special opportunities are offered in the Course in Chemical Engineering Practice and in the co-operative course in Electrical Engineering in which the students spend part time in the industries for a combination of technical and industrial training.

The tuition fee, not including breakage in the laboratories, is \$300 a year. In addition, a student tax of \$9 per year is made besides laboratory fees.
