

COURSE XV TOURISTS INSPECT BIG PLANTS

(Continued from Page 1.)

o'clock, where final instructions and details will be given out. The complete program for the three days is as follows:

Wednesday, March 15
Leave Boston (South Station) at 7.35 o'clock on the Corporation XV Special Sleeper, arriving at Syracuse, N. Y., on the morning of Thursday, March 16.

Thursday, March 16
Morning and afternoon: Inspect the plants of the Solvay Process Company and H. H. Franklin Manufacturing Company, under the guidance of Technology Alumni.

Lunch: at the Merrell-Soule Company as guests of the Company. Demonstration of their food products.

Evening: Dinner meeting with Technology Alumni. Talks by company officials and informal reunion. Dancing party or other entertainment arranged by L. W. Conant '21. Sleep in Corporation XV Special Sleeper at Syracuse.

Friday, March 17
Early morning ride (in sleeper) to Schenectady.

Morning and afternoon: Inspect the plants of the General Electric Company, giving special attention to production and administrative methods.

Lunch: at General Electric Company's dining room.

Evening: Dinner at Union College with talks by Technology Alumni. Entertainment or theatre party at Schenectady or Albany.

Sleep in Corporation XV Special Sleeper at Albany.

Saturday, March 18
Early morning ride (in sleeper) to Springfield.

Morning and afternoon: Inspect Rolls-Royce and American Writing Paper Company plants where quality production will be observed.

Evening: Dinner meeting with Technology Alumni. Short talks or entertainment.

Leave Springfield at 8:30 o'clock P. M. in Corporation XV Special Pullman Sleeper, arriving in Boston at 11:20 o'clock P. M.

OPEN REGISTRATION FOR R. O. T. C. DANCE

(Continued from Page 1.)

are to be in the same places as the advanced camps.

Advanced Study by Courses

Those in the Sophomore class who intend to continue in the R. O. T. C. advanced courses leading to a reserve commission, enroll according to their respective Institute courses. All students having had the required freshman and Sophomore military training are eligible for the following units: engineer and coast artillery units open to men in all courses; air service open to men who take Applied Mechanics 222, in their courses; signal corps, to all men in Courses VI, VIIa, VIII, and XIV; ordnance unit, to men in Courses II and X.

Students can take particular advantage of the government's offer by attending the basic camp in their freshman or sophomore year and then going to the advanced camp in their junior year, thus getting the benefit and instruction of two government camps. A considerable number of students who have been to the advanced camps, have applied again this year for another chance to go, this time without pay. Communications have been sent to the War Department for permission to allow these men to go again. The men are held under military surveillance during the day but are furnished amusement in the evening and are also allowed free leave from Saturday noon to Monday morning. Many of the camps are near places of great historic interest and government plants which are visited and inspected.

ALUMNI NOTES

Dr. George E. Hale '90, director of the Mount Wilson Observatory, Pasadena, California, has been chosen as the American representative to the International Research Council at Brussels. Dr. Hale has the distinction of carrying the position as a celebrated astronomer in America and one of the world's greatest solar and stellar investigators. His preliminary training in physics and astronomy at Technology, at the Harvard Astronomical Observatory and at the University at Berlin qualified him for a professorship of astrophysics which included the directorship of the famous Yerkes Observatory. Few men in the United States have had so many honors conferred upon them by European and American scientific societies as Dr. Hale.

Edward A. Clark '90, an authority on gold-mining, died at his home on Commonwealth avenue, Boston, Wednesday, from a severe attack of bronchitis. Mr. Clark was 56 years old at the time of his death.

Mr. Clark has been prominently identified with many mining corporations, both in Boston and in the West. He had reorganized many concerns, the latest being the Carson Hill Gold Mines Company. He was a member of the Algonquin Club, the Country and Automobile Clubs, besides a number of local and national scientific organizations.

WILL PURCHASE CUPS FOR RECORD HOLDERS

(Continued from Page 1.)

the rules gave the vote to all men winning the minor letter, as to the eligibility of men receiving the T instead. This has been corrected by assuming that all T winners have qualified for the minor letter also.

Although no action could be taken, there was an informal discussion of the work on the new boat house. It is planned to enlarge it by the addition of two wings, to do away with the present central stairway, and to arrange the roof in such a way that it can be used as a club house by the student body in the summer. Along with these plans, there will be improvements of the adjacent land, planting of grass, trees, etc., and proper furnishing of the whole building.

SECURE BERT LOWE'S ORCHESTRA FOR PROM

(Continued from Page 1.)

Jazz band, which has played before this year.

Limit Number of Couples

The number of signups to be put on sale March 23 will be 400, thus limiting the size of the Prom to that number. The signup sale will start in the booth in the main lobby from 12 until 2 o'clock. The maximum number of signups to be sold to one man will be five and the Committee announces that not more than this will be given anyone. The names of the men for whom they are purchased are to be presented by the purchaser. The price of the signup will be \$5, the remainder of the price of the ticket, \$11, to be paid when the signups are redeemed. Preliminary dance orders will be given out at the time of the signup sale.

The committee is trying to arrange it whereby men who desire to sit together during the supper, which comes from 12 until 1 o'clock on the night of the Prom, may do so. The number of couples which will be assigned a table is five. These assignments will be made at the time of the redemption of the signups, and will be by groups numbering five or some multiple or fraction thereof.

SOLUTION OF ROOMING PROBLEM IN T. C. A. HANDS

(Continued from Page 1.)

tension of the present activities of the Technology Christian Association. The T. C. A., therefore, is going to work out a plan for taking care of this new work so as to accomplish it in the best way possible. A study of present conditions will be made by sending out questionnaires to all students occupying rooms other than at home, in fraternities or the present dormitories. The office of Inspector of Room Service will be created and rooms will be rated on a strict basis. There will be three men in charge of the room work, one of whom will have charge of rooms in Boston, one who will be in charge of rooms in Cambridge, and another who will have charge of the rooms in Allston and Brookline.

U. E. B. After Summer Jobs

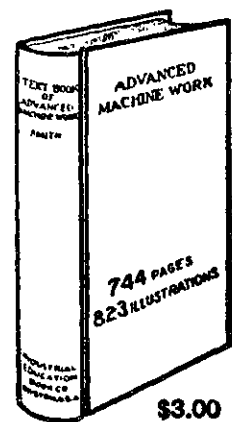

C. E. Bigelow '22, director of the summer work department of the Undergraduate Employment Bureau, has sent out, under date of March 8, a letter to 502 contractors and engineers in

and about Boston asking them to inform the bureau of any summer positions that Institute students can fill. In this way they hope to greatly aid many men who are dependent on this work for the summer months.

General Secretary W. M. Ross will attend a conference of Christian Association leaders at Concord, N. H., tomorrow. Representatives of the two New Hampshire Colleges, seven Preparatory Schools and 14 High Schools will attend this conference.

A LIBERAL EDUCATION IN MACHINE SHOP PRACTICE ADVANCED MACHINE WORK

By Robert H. Smith

Massachusetts Institute of Technology
Sixth Edition Revised and Enlarged

A BOOK that has revolutionized teaching and learning Machine Work.

It is used in Colleges, Technical, Apprentice and Vocational Schools, and Machine Shops.

WAR has taught, INDIVIDUALS, SHOPS and SCHOOLS the value of TEXTBOOKS.

INDUSTRIAL EDUCATION BOOK CO.

Boston, U. S. A.

Here's why
CAMELS are
the quality cigarette

BECAUSE we put the utmost quality into this one brand. Camels are as good as it's possible for skill, money and lifelong knowledge of fine tobaccos to make a cigarette.

Nothing is too good for Camels. And bear this in mind! Everything is done to make Camels the best cigarette it's possible to buy. Nothing is done simply for show.

Take the Camel package for instance. It's the most perfect packing science can devise to protect cigarettes and keep them fresh. Heavy paper—secure foil wrapping—revenue stamp to seal the fold and make the package air-tight. But there's nothing flashy about it. You'll find no extra wrappers. No frills or furbelows.

Such things do not improve the smoke any more than premiums or coupons. And remember—you must pay their extra cost or get lowered quality.

If you want the smoothest, mellowest, mildest cigarette you can imagine—and one entirely free from cigarettey aftertaste,

It's Camels for you.

Camel
