**FRIENDSHIP DRIVE NETS
\$759.04 PLUS SUPPLIES**

In the recent drive held at the Institute for the Student Friendship Fund \$759.04 in cash was contributed by undergraduates, members of the corporation, and faculty. In addition 434 articles of clothing and 55 books were contributed. Last year a total of \$938.03 was subscribed for this fund.

The following books and clothes were forwarded in two boxes and two barrels, May 2, 1923, from Technology to professors and students in Central Europe: Books—3 notebooks, 9 pamphlets, 42 books, 1 student's bag; clothes—15 pairs pajamas, 8 union suits, 23 hats, 6 caps, 2 sweaters, 38 coats, 28 vests, 30 pairs trousers, 1 raincoat, 1 mackinaw, 14 mufflers, 7 overcoats, 11 pairs silk socks, 31 pairs woolen socks, 22 pairs cotton socks, 46 neckties, 20 pairs gloves, 25 shirts, 1 travelling toilet case, 10 undershirts, 9 pairs underdrawers, 2 handkerchiefs, 50 collars, 20 pairs shoes, 1 pair moccasins, 3 belts, 1 pair garters, 2 pocket-books, 2 pair rubbers, 1 pair suspenders, 5 pairs overshoes.

**WEALTHY MEMBERS MAY
ADD TO ENDOWMENT FUNDS**

Further work on the endowment fund by Class of 1923 has resulted in the formation of an "interest fund," which will be a designated portion of the regular endowment. The money for this fund will be provided by the interest on the premiums paid, and will itself bear interest. It will serve three purposes.

First, thus any member of the class in future years desiring to increase his contribution will be able to do so by adding directly to this fund.

Secondly, in case any subscribing member of the class shall be unable to continue his payments after the first \$250, money will be taken from this fund to supply the necessary premium. This will enable the complete payment on all the policies subscribed to, and consequently will mean a minimum loss in case anyone drops out.

Thirdly, it is planned to have annual reunions of the Class of 1923, with a big time 25 years from now, when the endowment comes due. A portion of this fund will be available for the expense of these gatherings.

All arrangements in connection with the endowment will be left in the hands of the corporation and the insurance company officials. There are no specifications made by the class for what purpose the money will be available. It is to be handed over to the corporation to do with as it sees fit.

THE LOUNGER
(Continued from Page 2)

go to the beach between shifts. The alternative is to stop studying now, (if you ever started), go out every night, and leave it all to the night before each exam for the work end of it.

Both methods have their advantages. Financially they are about the same, unless you start going to the beach now instead of devoting your stamina to mere ocular strain. It must be admitted, nevertheless, that these warm nights are a cursed lure to even the strong of heart. And then it's only a comparatively short run to Norumbega. Nocturnal bliss is more thoroughly enjoyed in the company of one of Eve's descendants than in whispering sweet words of reprobation to an obstinate temperature-entropy chart which refuses to give the correct answer.

The Lounger of course can only present the two sides of the proposition. It is up to his readers to decide for themselves which course they will adopt. Needless to say, he has his own little private solution of the problem. Let it suffice to recall once more the advice of Friend Omar. And if the Lounger survives and is back next fall it will be circumstantial evidence that Omar was right. If not, well, what's one little tuition fee among friends?

Notices and Announcements

OFFICIAL
SCHOLARSHIP COMPETITION
Two scholarships of \$300 each are offered for special students in Course IV. Competition open to Americans between 21 and 28 who have had two years of office experience. Will be held June 30 to July 10. Applications should be made to Professor William Emerson, 491 Boylston Street, before May 15.

TALK ON RADIUM
Dr. C. H. Viol, Director of the Research Laboratory of the Radium Chemical Company, will speak on radium in room 10-250, today, at 4. His talk will include the production of radium in this country, recently developed deposits in Belgian Congo, and the present status of radium therapy.

MOVIES ON PAINTS
A motion picture, "The Finishing Touch," will be exhibited in room 5-330, Friday, May 18, from 4 to 5. It is given in connection with a short lecture by Mr. W. E. Kerrish of Wadsworth, Howlack and Co. The subject matter deals with the preparation and application of paints.

MINING LECTURE
Thomas T. Read of the U. S. Bureau of Mines will describe the mining operations at Morro Velho and Ouro Preto, Minas Geraes, Brazil, today in room 8-419, at 2. The lecture is illustrated by lantern slides.

LLOYD'S SCHOLARSHIP
Applications for the annual Lloyd's Scholarship in Naval Architecture and Marine Engineering, at the Institute, which is tenable for three years and of \$500 per annum, should be made immediately. Freshmen who expect to complete their first year with a satisfactory scholastic record are eligible. Applications must be in on or before May 31, at Headquarters of Department of Naval Architecture, Room 5-121.

SUMMER POSITIONS
The Arnold School in Pittsburgh offers opportunity to able men during September as instructors. Two men will be chosen to fill the following positions: one, as instructor in Manual Training and Elementary Mathematics and athletic coach; the other as instructor in History, and miscellaneous Junior High School subjects and as leader in some form of extra-scholastic activity. These positions pay from \$1700-\$1800.

**Institute Official
Investigates Danger
of Student Marriage**
**In Whole Student Body Finds
Only 102 Men and No
Co-eds Married**

As in other personal matters at the Institute, there seems to be no official attitude upon the question of student marriage. This is in marked contrast to the expressed intention of Syracuse University policy to consider undergraduate weddings as equivalent to resignation.

Whatever the cause for this, probably the great difference between Technology and Syracuse is that the latter is strongly co-educational and has a tendency toward the matrimonial agency type of institution. Over a third of the enrollment is the female of the species, as Kipling would have it, and they have been doing deadly work. Hence the edict of "two can't live cheaper than one—at Syracuse."

One Institute official said "We have just been making an investigation into this matter, and find that 102 out of a possible 3180 are married. These figures do not include janitors or office boys. The 102 do not include any co-eds. Since marriage does not occur between the students, but rather between students and outsiders, we cannot very well exclude anyone. Of course if the co-eds become too marriageable we must act, but that seems at present a remote possibility. After snooping around the Emma Rogers room for several days I have come to the conclusion that we need make no negative ruling. All men enter the marriage game at their own risk so far as marrying fellow-students is concerned."

One pretty co-ed of the took issue with this attitude, however, as she said: "Huh! What do I care about M13, EH13 and all those other foggy old bobs? I came here for just one reason—because I think there are some terribly handsome young men here at the Institute and I mean to have one of them for my very own. With such a dearth of feminine beauty, and so many eligible men I don't ever expect to become a Junior."

CIVIL SERVICE
The United States Civil Service Commission has requested that we co-operate with them in bringing to the attention of graduating students the opportunities offered in the United States Civil Service. We maintain a file in Room 3-210, of announcements of examinations and as many of the positions are technical in nature and could be filled to advantage by Technology men, it is suggested that any students who would be interested in spending a few years, or possibly their career, in the government service, can obtain information and application blanks at our office, Room 3-210.

**UNDERGRADUATE
CHORAL SOCIETY**
Will hold their second annual concert this evening at 8 in the main hall of Walker. Tickets can be secured in the main lobby or in the office of the Musical Clubs for \$1.

U. E. B.
Has available summer positions for experienced camp counselors, and can place men in railroad track work.

OUTING CLUB
Horseback ride will be held this week end. All interested watch the bulletin boards for further information.

Dances
MENORAH SOCIETY
Dance will be held in north hall, Walker, May 19, at 8. Tickets may be obtained from the officers of the society at \$2 per couple.

Elections
CATHOLIC CLUB
Elections will take place on Wednesday, May 16, in room 10-110 from 9 to 5.

Meetings
TECH SHOW
Scenario writers will meet in east lounge at 5 on Wednesday. The purpose of the meeting is to outline the program for next year's show and to give suggestions. Prof. R. E. Rogers and E. F. Hodgins '22, will speak.

M. I. T. ORDINANCE
Association will have a smoker tomorrow at 8 in room 5-330. "Steel X-ray Work at Watertown Arsenal" is the subject of a talk by Dr. F. C. Langenburg. Dr. Lester and Prof. E. F. Miller will also speak.

So take your choice. A lone co-ed is using the Institute as a stepping stone to marriage at the very time High Officials say it isn't possible. One thing is sure: the only subject that isn't taught at the Institute is "marriage," so why not let a fellow pick up the information on the outside?

**Advanced R.O.T.C. to
Compete for Places
in Rifle Contests**
**Entrants Selected from Men at
Summer Camps in First
Corps Area**

The advanced unit R. O. T. C. is to have some competitions as well as the freshmen. This will be for entrance in the national rifle matches at Camp Perry, Ohio, this summer. Seven students showing proficiency in rifle firing at the summer camps will be selected from the first Corps Area units. They will be sent to Camp Perry where they will be under government expense for for everything except cost for personal linen, toilet articles, etc. They will be reimbursed by the Government at the rate of five cents a mile for railroad travel to and from their homes. Participation will start September 1, and will probably last the rest of the month.

Although seven men will be sent from the First Corps Area, five will be chosen from among the four or five different units at Camp Devens. The artillery men therefore stand a better chance of being chosen, since two of them will be selected from the Coast Artillery Camp at Fort Wright, Conn. Colonel F. W. Phisterer and Major E. W. Putney visited this camp last Tuesday and Wednesday. Both were favorably impressed.

Facilities for entertainment which they thought should appeal to men intending to go there included a nine-hole golf course, ten tennis courts, swimming facilities, and others. On arrival the two officers learned that a rum runners' ship had run ashore close to the camp a few days before, and the tide kept sweeping bottles onto land. Major Putney refused to comment but suggested, "History repeats itself."

**OTTESEN USES
GUN ON CLASSES**

**C. A. C. Major Takes Drastic
Measures with Advanced
R. O. T. C. Students**

The Institute has now mounted a big gun at the crossroads near the new gym. The position appears advantageous but it might as well not be, for not a shot will be fired from the gun. No, it will not ward off invaders, but will serve to give the training of advanced R. O. T. C. men a wider scope.

Major P. H. Ottesen has decided to give his classes the use of the piece which has been at the Institute for three years. The men will work out their problems in range finding, and set the gun according to their data. This will give them experience in handling the gun, and by use of the sights they will be able to see how their theoretical deductions work out.

The gun is a French one, known as a 155mm. G. P. F., and was sent here by the government about three years ago. It has never been taken out of doors before, except once in a while to have its picture taken. It is not an easily manipulated piece of apparatus, weighing about ten tons, and requiring several hours to be set up for use.

**Plan Decorations for
Best Drilled Freshmen**

Another tradition is to be added to Technology's list, now not by student activity or class, but by the Military Science department. It will take the form of presentation of medals to the best drilled freshmen in the unit. The event, which will take place May 28, will be featured by a formal review of the entire body of R. O. T. C. men at the Institute, under student command. At this review the medals will be given out in the official manner. Dr. S. W. Stratton, it is expected, will personally distribute them. Following this the troops will execute a regular evening parade. The entire affair will be strictly formal.

Preliminary competitions will be held May 24 and 25. Two men will be selected from each platoon. Final competitions will be held May 28 at 4 o'clock, preceding the presentation by a single hour. The 10th Coast Artillery band from Fort Banks will furnish music.

The men will be chosen by an especially picked board of judges from successive competitions in platoons, companies, etc. The first medal will be of gold, the second of silver, and the third of bronze. It is not yet known of just what form these medals will be, as this is the first time that such medals have been presented at the Institute.

**E. I. N. A. CLOSES NEWS
CONVENTION HELD HERE**
(Continued from Page 1)

Transcript was the main speaker. He told of his opinion of the field for college papers, and emphasized the point that they were college newspapers and could not therefore always carry out the same policy as a city paper.

Chairman Allen of the Yale News was elected President of the Association for the coming year, Sparta Fritz of the Pennsylvanian, Vice-President, and Fairfax, business manager of the Yale News, Secretary and Treasurer. A standing committee on advertising was also elected of which H. N. Pratt, advertising manager of The Crimson, was chosen chairman. The next convention will be held at New Haven under the auspices of the Yale News.

**INSTITUTE RIFLE
TEAM COMPLETES
WINNING SEASON**

**Engineer Marksmen Make Five
Perfect Scores During
Past Season**

**CAPTAIN MURPHY LEADS
TEAM WITH FINE RECORD**

**Institute Team Takes Tenth
Position in Annual
N. R. A. Matches**

The Institute rifle team has just completed the most successful season that any Engineer marksman squad has ever had. The team went through a season with the class of the college teams with a record of thirteen wins out of nineteen starts. These wins include victories over Harvard, Yale, Princeton and Dartmouth. Besides these successes in the dual meets, the team finished tenth in the National Rifle Association matches, seven places better than last year.

The team did much better work this year than last and with the whole outfit back next year, the outlook for the best season yet is a bright one. The whole squad has been doing some mighty fine shooting, having sacked up five possibles to none for last year's outfit. Captain Ed Murphy has set a good example for the team throughout the season and finished with an average of 99.4 per cent for the entire season.

The season opened auspiciously enough with successive wins over Maine, New Hampshire State and Princeton. Then Syracuse defeated the Engineers in a close battle, but the team came back with a win over Dartmouth. Then came losses to Drexel, B. U., and Georgetown, who won the N. R. A.'s.

The team crashed through against Harvard, however, with a 497 to 483 win. The meet with Penn resulted in a tie with two perfect scores at 500 each. The shoot off resulted in a win for the Quakers. After the N. R. A.'s, the team hit its stride and rolled off five successive victories, including a perfect score against Yale. The team finished the season at top speed with three possibles in the last three matches.

Captain Ed Murphy has been the high man all season in the scoring. He has been well supported by the entire team, Holmes, Jackson, Fielding, Hastings, Carothers and Creveling doing the most consistent work. All these men have had a lot of experience.

The showing made by the team this year at the N. R. A. meet was the most encouraging feature of the season. Georgetown, who defeated the Engineers by only eight points in a dual meet was the winner, with Pennsylvania second. All five scoring men turned in good scores but the opposition was a little too great and tenth place went to the Engineers.

With the entire team back next year the rifle enthusiasts are looking forward to the best season they have had. The men have been working well this year and will doubtless be able to improve their work in the season to come. The final gathering of the squad was held Wednesday night at the Insignia award banquet when medals were presented to the members of the team.

For the season as a whole, Captain Murphy leads the squad with a season average of 99.4 per cent, with a record of 12 perfect scores. While Holmes, Creveling, Carothers, Fielding, Hastings, Jackson and Peterson, with averages of 98 or better, have all contributed largely to the success of the team. In addition, Cuthbertson, Gray and Conway, other reliable shooters who were usually eclipsed by the accurate work of their team-mates, have also been big assets to the team and will be on the job again next year.

**TECHNOLOGY DEBATERS
DEFEATED AT BROOKLYN**

According to dispatches recently received from Brooklyn, Technology's debating team encountered defeat in its argument with Brooklyn Polytech last Friday night. Tech men present report that the sentiment of the audience favored the Institute side, but the judges decided in favor of the home team.

The Speakers' Club will hear first hand accounts of the debate at its first banquet, which will be held Wednesday night in the Faculty dining room, Walker Memorial, at 6 o'clock. The unknown Mr. Smith, who has been giving the club financial backing, has been unable to accept his invitation to be present. Professor Pearson, of the English department, will present for discussion a project he has in mind—an intertechnical school debating league.
