Varsity basketball forward

COACH BOUTELIER
The mentor of the boxing team received appointment to a captaincy in the Boston Fire Department. Coach Boutelier has been coach of the Institute boxers since the formation of a team several years ago. He is able to give about three afternoons a week to the instruction of the Institute students in the noble art of self defence.

SIMPLEX WIRES AND CABLES

Insulated with rubber, cambric or paper

SIMCORE—National Electrical Code Standard. Every length is subjected to searching electrical tests to insure a first quality product. Ask for specifications.

CAOUTCHOUC—"B. C." A rubber covered, braided wire insulated with a 30% Para compound. Send for specifications.

LEAD COVERED CABLES AND WIRES—For under-ground distribution where a conduit system is used.

STEEL TAPED CABLE—Used where a conduit system is not available. It carries its own conduit. Descriptive booklet upon request.

FIBREX TREE WIRE—For installation among trees or wherever chafing may occur. It is non-inductive. Send for circular.

SUBMARINE CABLES—For power transmission or for telephone or telegraph service. Our engineering department is always available for consultation.

SIGNAL CABLE—Dependable insulated cable for police or fire alarm service.

IGNITION WIRES—Used extensively, and with satisfaction throughout the automotive field.

TIREX PORTABLE CORD—For electrical tools and appliances. Rubber-armored. Flexible. It cannot kink,—and has the wearing qualities of an automobile tire.

TIREX LAMP CORD—A rubber armored cord for drop lights or table lamps, made in colors. Send for folder.

TIREX MINING MACHINE CABLES—Heavily insulated, rubber-armored, portable cables with the wearing qualities of a cord tire.

A COMPLETE PAINT SERVICE

backed by the same type
of quality control

that produces Du Pont Explosives

THE manufacture of paints and varnishes is a science based on chemistry. So is the making of explosives. In entering the paint and varnish industry, the du Pont Company thus adds over a century of technical experience to the specialized knowledge of the four well-known paint and varnish houses now united under the du Pont Oval.

Du Pont Paints and Varnishes are produced today under an exact, scientific system of quality control similar to that which is responsible for the quality leadership of du Pont Explosives.

For the past five years du Pont Chemical Engineers, working with all the broad resources and cumulative experience of the du Pont Organization, have conducted an intensive study of paint problems in the engineering field.

The result has been the selection of paint products which will best meet every standard or special purpose of metal or timber protection—a complete "Paint Prescription Service" to the construction industry. When you specify Paints, simply specify du Pont.
